These essays by Robert F. Kennedy, which grew out of speeches, travel and his experience as Attorney General and a United States Senator, pose a simple question for America and consequently for the free world, in the 60s and 70s: Are you willing to dare? Today's challenges are awesome in scope and baffling in complexity. A military coup in Brazil may effect the entire hemisphere and endanger the Alliance for Progress.

Riots and decay in the American cities pose the dangers of war in the streets, and a permanent alienation of black and white America. Vietnam raises the possibility of recurrent draining conflict, with a huge and unknown China beyond. And overall loom the new weapons of war, threatening at every moment to destroy all they were designed to defend. But for all the problems, says the author, our fortunes need not and cannot be surrendered to an inscrutable fate. The question posed is not to America's resources, not to their ability, but to their commitment and character. This is the question Robert Kennedy repeatedly addresses in *To Seek a Newer World*. As a major architect of positions and policies at home and abroad since 1961, he is candid in assessing his countries shortcomings and mistakes. Yet his call for a new ordering of national priorities is a hopeful one - to match American heritage and power with a new effort and will - to seek a newer world for the United States and for the community of man.

A collection of essays by the respected social commentator on some problems faced by cities such as New York, Philadelphia, and Paris, on the architecture of Saarinen, Le Corbusier, and Wright, and on city and highway planning.

In this book, originally published in 1962, one of America's most distinguished historians defines the scope and variety of his field and outlines his views on history's objectives both as a science and as an art. The book provides insight into historians' methods of interpreting and presenting the past from Thucydides to twentieth century scholarship on Europe and America. It sets apart the different approaches to history – biographical, cultural, intellectual, geographical and political – illuminating the peculiar goals, problems and development of each discipline. It discusses the question of pre-history and its companion science, archaeology and spans the history of the collection and use of records.

The period between the Peace of Utrecht and the French Revolution is brought into focus in this essay. Professor Manuel deals with the age of the philosophes and the enlightened despots, when belief in man's ability to achieve a good society through reason was in its first hopeful flower. The powerful pressures of that time are evaluated - the rapidly increasing population, the phenomenal growth of cities and industries, the greater facility of travel and transportation, The modern nation-state, as exemplified in France, England, the Hapsburg Empire, Prussia, and Russia, was growing strong and centralized. The relations of these states to one another are discussed.

“The Splendid Century,” penned by the brother of famous author C. S. Lewis (“Alice in Wonderland”), is a depiction of various aspects of life in France during the reign of Louis XIV, gleaned through the author’s thorough research of records, correspondence, and journals of the time. Using anecdotal evidence, the book probes in detail various facets of life in France during this time, including the lives of nobles (particularly those at court) as well as commoners, religious institutions and conflicts, the organization of the French army and its restructuring, rural life and city life, what life was like on galley ships and passenger sailing ships, how doctors were trained, and the state of women’s education. The author also discusses the background behind Louis XIV’s policies, illustrating their impact on French civilization, both during this time and for generations to come. A must-read for anyone interested in French history. This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. Drawing on the greatest writers of its civilization, Hamilton vividly depicts the life and spirit of Rome. In this informal history of Roman civilization, Edith Hamilton vividly depicts the Roman life and spirit as they are revealed in the greatest writers of the time. Among these literary guides are Cicero, who left an incomparable collection of letters; Catullus, the quintessential poet of love; Horace, the chronicler of a cruel and materialistic Rome; and the Romantics Virgil, Livy, and Seneca. The story concludes with the stark contrast between high-minded Stoicism and the collapse of values witnessed by Tacitus and
