Each Scientific Discipline Has A Philosophy And Methodology. The Philosophies Are Essential Because They Create A Set Of Subjectively Imposed Constraints Within Which The Individual Does Research. Closely Associated With Philosophy Is The Methodology. A Methodology Is The Logic Of An Explanation With Ensuring That Our Arguments Are Rigorous, That Our Inferences Are Reasonable And That Our Method Is Internally Coherent. The Present Book Has Been Designed To Explain The Methodological Problems Of Geography. The First Paper Gives An Account Of The Changing Techniques In Geography Followed By Methodological Foundations Of Change And The Scientific Methods In Geography . The Modern Philosophy Like Positivism, Empiricism And Quantitative Revolution In The Discipline Has Been Cogently Given In The Subsequent

Evolution of Geographical Thought

Geographic Thought At Any Point Of Time Is A Manifestation Of The Interaction Between The Prevailing Philosophical View Points And The Major Methodological Approaches In Vogue. Because Of The Extreme Diversity Of View Points On Both Philosophy And Methodology, There Has Been A Constant Extension, And Even A Shift, In The Focus Of The Discipline. As A Reaction To The Quantitative Revolution The Philosophical Approach Of Humanistic Geography Emerged In Geography In The Middle Of The 1970s. Humanistic Geography Is An Approach In Human Geography Distinguished By The Central And Active Role It Gives To Human Awareness, Agency And Creativity. It Emerged As A Criticism And Rejection Of The Geometric Determinism . Though Enough Literature Has Been Produced By Applying Humanistic Approach, The Concepts, Principles And Methodology Has Not Been Given In One Book. The Present Volume Fills Up

These Articles Written By The Eminent Scholars Of The Contemporary Period Provide A Vivid And In-Depth Understanding Of The Humanistic Approach In Geography And Also Give The Limits Of Such A Philosophy And Conceptual Aspect Of The Humanism In Geography But An Appraisal Of The Meaning And Development Of This Humanistic Geography In The Light Of Its Outstanding Leaders. Economic and Social Geography reviews developments in the study of economic and social geography and brings together in a single volume work which is dispersed in many specialist textbooks. An attempt has been made to achieve a balance between oversimplification and over-elaboration, and to present essential concepts in a clear, concise manner. The book contains 25 chapters organized into five parts. Part One deals with the study of economic and social geography, including approaches to the study of human geography and environmental perception and behavior. Part Two on population geography covers topics such as population geography, population change, and population growth. Part Three on economic geography includes discussions of transportation, agriculture, and mineral resources. Part Four on settlement geography examines urbanization, the internal structure of towns and cities, and rural settlement. Part Five is devoted to urban and rural

planning, problems of economic development, and resources. This book, together with its companion volume, *Physical Geography Made Simple*, should be of value to a variety of people. First, to those who are coming to academic geography for the first time, especially to those studying for GCE Advanced Level or ONC/OND examinations. It should also provide a concise introduction to first-year courses in further and higher education, including degree courses with a geography component, HNC/HND, and Certificate in Education courses.

"Physical geography deals with the spatial and temporal characteristics and relationships of all phenomena within the physical environment of the earth. A systematic study of physical geography is of immense help in understanding the numerous environmental challenges of the contemporary period. Earth is a place of great physical and cultural diversity, yet people know little about it. The book is aimed to explain the spatial dimensions of the earth's natural systems and their processes. The chapters of this thoroughly revised and updated third edition of the bestselling introductory reader have been organised in a logical sequence well suited to the curriculum of established physical geography courses. The text includes many special features that are intended to enhance and clarify students' understanding and mastery of the material. Throughout, the scientific ideas and processes are explained in a simple manner supported by a range of illustrative material including maps, diagrams and photographs. The book will be an essential resource for

students and teachers, and for anyone wishes to acquire more knowledge about the physical aspects and the processes responsible for various orders of the earth."

"Human Geography, which now runs into the third edition, is a core textbook for geography students at the university level. It is mainly designed to introduce the discipline to the students in a social science perspective. The book covers the wide canvas of Human Geography covering the cultural, historical, political, regional, social, urban and economic aspects of it. The text has been written in a lucid, cogent and convincing style, documented with interesting maps and diagrams and illustrated with apt and appropriate examples from both developed as well as developing regions of the world. This edition contains a wealth of new material and latest data to ensure that it remains an unparalleled resource for the new generation of students and teachers."

World Geography provides a coherent and organized geography of the world as we now know it - where we are. It studies how people are distributed over the earth, how they make their living from it, and how they transform it. Various geographical regions of the world have been discussed in eighteen chapters with individual nations within each of these regions. Written in a logical, cogent and convincing style, the principles of brevity and clarity have been followed all through the book. Combining informative text with a wealth of latest data, maps and illustrations, this attempt offers a comprehensive coverage of almost all the countries of the world in a

This book maps the evolution of India's North East into a constituent region of the republic and analyses the perpetual crisis in the region since

Independence. It highlights how land, language and leadership issues have been the seed of contention

in the North East and how factors like ethnicity, ideology and religion have shaped the conflicts. It

also throws light on the major insurgencies, internal displacements, protest movements and the regional

drug and weapons trade in the region. It examines 'the crisis of development' and the evolution of the

polity before offering a policy framework to combat the crises. The book includes a large body of original

data, documentation and field interviews with major players as well as stakeholders. It is an important

reference resource for students of politics and international relations, especially for those involved

in South Asian studies and conflict studies. It is also an informative read for decision-makers, bureaucrats

dealing with the North East and those involved in counter-insurgency operations in the area.

with an exploration of the founding concepts of human geography in the nineteenth century academy, the authors examine the range of theoretical perspectives that have emerged within human geography over the last century from feminist and marxist scholarship, through to post-colonial and non-representational theories. Each chapter contains insightful lines of argument that encourage readers towards independent thinking and critical evaluation. Supporting materials include a glossary, visual images, further reading suggestions and dialogue boxes.

This book gives voice, in unusual depth and immediacy, to ordinary villagers and landlords (Junkers) in the Prussian-German countryside, from the late Middle Ages to the nineteenth century. The trials and fortunes of everyday life come into view - in the family, the workplace, in the private lives of both men and women, in courtroom and jailhouse, and under the gaze of the rising Prussian monarchy's officials and army officers. What emerges is a many-dimensional, long-term study of a rural society, inviting comparisons on a world-historical level. The book also puts to a test the possibilities of empirical historical knowledge at the microhistorical or 'grass-roots' level. But it also reconceptualizes, on the scale of Prussian-German and European history, the rise of agrarian capitalism, challenging views widespread in the economic

history literature on the common people's working standards, and including massive documentation on women's condition, rights and social roles.

This book covers a wide canvas of the story of geographical thoughts, ideas, and knowledge, from the early Greek period to modern contemporary geography. Presenting an introduction to the philosophy, history, and methodology of geography, the book maps the intellectual changes in the discipline over the years. To keep students abreast with the recent trends in geography, along with its methodological problems, the book has been updated and revised, making it a comprehensive textbook on geographical thought. The main objective of the sixth edition is to incorporate a number of relevant new topics and concepts which will expand the geographical base of interested students about the philosophy and methodology of geography. The book is presented in a larger format with improved maps and illustrations. A new chapter introduces students to a contemporary sub-discipline of Feminist Geography. Also included is a comprehensive list of biographic notes on selected geographers. [Subject: Geography]

broader themes in philosophy and social theory. Beginning with existential phenomenology and humanistic geography, the book covers Marxism and radical geography, structuralism, structuration theory, realism, locality studies, various streams of poststructuralism and postmodernism, and feminism. Each chapter examines a few theories in depth, concentrating on the major works and the nature of their contribution. Many of the ideas covered are dense and complex, but the reader is drawn gradually into the text through notions understandable to students. After spending time with this book the reader should be able to tackle virtually any philosophical theme in contemporary geographic thought. The book will be central to courses in geographical thought and the history of geographical thought, and as part of virtually all courses in human geography which entail philosophy and theory.

""Models in Geography"" aim at presenting the important models and theories in human geography at one place in a concise and cogent manner. These include System Analysis, Malthusian, Marxian and Demographic Transitional Models, Central Place Theory of Christaller and Losch, von Thunen Model of Agricultural Land Use, Weber's Theory of Industrial Location, Rostow's Stages of Growth, Heartland and Rimland Theories, and Laws of International Boundaries and Frontiers. Besides, the Limits to Growth and Laws of Migration have also been examined. A full chapter has been devoted to types and patterns of rural settlements, primate city, rank-size rule and models of urban land. Documented with the latest data, maps and diagrams, one chapter has been written on climatic change. It is hoped that the book will be of immense help to the students and teachers alike. This will also be useful for those preparing for various competitive examinations."
