**Hierarchy in Natural and Social Sciences** Denise Pumain, 2006-02-09 Hierarchy is a form of organisation of complex systems that rely on or produce a strong differentiation in capacity (power and size) between the parts of the system. It is frequently observed within the natural living world as well as in social institutions. According to the authors, hierarchy results from random processes, follows an intentional design, or is the result of the organisation which ensures an optimal circulation of energy for information. This book reviews ancient and modern representations and explanations of hierarchies, and compares their relevance in a variety of fields, such as language, societies, cities, and living species. It throws light on concepts and models such as scaling laws, fractals and self-organisation that are fundamental in the dynamics and morphology of complex systems. At a time when networks are celebrated for their efficiency, flexibility and better social acceptance, much can be learned about the persistent universality and adaptability of hierarchies, and from the analogies and differences between biological and social organisation and processes. This book addresses a wide audience of biologists and social scientists, as well as managers and executives in a variety of institutions.

**Subaltern Urbanisation in India** Eric Denis, Marie-Hélène Zérah, 2017-03-01 This volume decentres the view of urbanisation in India from large agglomerations towards smaller urban settlements. It presents the outcomes of original research conducted over three years on subaltern processes of urbanization. The volume is organised in four sections. A first one deals with urbanisation dynamics and systems of cities with chapters on the new census towns, demographic and economic trajectories of cities and employment transformation. The interrelations of land transformation, social and cultural changes form the topic of the “land, society, belonging” section based on ethnographic work in various parts of India (Karnataka, Himachal Pradesh, Arunachal Pradesh and Tamil Nadu). A third section focuses on public policies, governance and urban services with a set of macro-analysis based papers and specific case studies. Understanding the nature of production and innovation in non-metropolitan contexts closes this volume. Finally, though focused on India, this research raises larger questions with regard to the study of urbanisation and development worldwide.

**Becoming the 'Abid** Marta Scaglioni, 2020-09-14 In 2011, after the popular uprising overthrew former President Zine el-Abidine Ben Ali, in Tunisia several issues came to the fore: among them, racism targeting “black” individuals. Few black rights associations emerged, and their struggle culminated in the promulgation of a law punishing racist acts and words in

October 2019. The step is historical, and stems from Tunisia's foreseeing policy concerning human and civil rights. In 1846, Tunisia was the first country to abolish slavery and the slave trade in the Ottoman Empire and in the Middle Eastern world. Becoming the 'Abid addresses the issue of the legacy of slavery in a southern Tunisian governorate, where racism towards "black" individuals is still a painful experience and takes the form of professional, educational, and marital discrimination. Referring to the concept of "structural inequality", the book goes beyond the simplistic idea that race is only related to phenotype, taking distance from the Western racial concepts, and highlights how processes of racialization are contextual, processual, and changing constructions.

Modern Urban and Regional Economics Philip McCann, 2013-01-31 The second edition of this accessible text provides an integrated framework of the study of urban and regional economics. It offers a concise and up-to-date introduction to the main foundational models, principles, and theories of the subject, and uses a range of international examples to illustrate ideas.

The Populist Radical Right Cas Mudde, 2016-10-04 The populist radical right is one of the most studied political phenomena in the social sciences, counting hundreds of books and thousands of articles. This is the first reader to bring together the most seminal articles and book chapters on the contemporary populist radical right in western democracies. It has a broad regional and topical focus and includes work that has made an original theoretical contribution to the field, which make them less time-specific. The reader is organized in six thematic sections: (1) ideology and issues; (2) parties, organizations, and subcultures; (3) leaders, members, and voters; (4) causes; (5) consequences; and (6) responses. Each section features a short introduction by the editor, which introduces and ties together the selected pieces and provides discussion questions and suggestions for further readings. The reader is ended with a conclusion in which the editor reflects on the future of the populist radical right in light of (more) recent political developments - most notably the Greek economic crisis and the refugee crisis - and suggest avenues for future research.

Attentional Capture Bradley S. Gibson, Charles Folk, Jan Theeuwes, 2008 The notion that certain mental or physical events can capture attention has been one of the most enduring topics in the study of attention owing to the importance of understanding how goal-directed and stimulus-driven processes interact in perception and cognition. Despite the clear theoretical and applied importance of attentional capture, a broad survey of this field suggests that the term capture means different things to different people. In some cases, it refers to covert shifts of spatial attention, in others involuntary saccades, and in still others general disruption of processing by irrelevant stimuli. The properties that elicit capture can also range from abruptly onset or moving lights, to discontinuities in textures, to unexpected tones, to emotionally valenced words or pictures, to directional signs and symbols. Attentional capture has been explored in both the spatial and temporal domains as well as the visual and auditory modalities. There are also a number of different theoretical perspectives on the

mechanisms underlying capture (both functional and neurophysiological) and the level of cognitive control over capture. This special issue provides a sampling of the diversity of approaches, domains, and theoretical perspectives that currently exist in the study of attentional capture. Together, these contributions should help evaluate the degree to which attentional capture represents a unitary construct that reflects fundamental theoretical principles and mechanisms of the mind.

**Accidents in History** ,2020-01-29 There is now an extensive literature on the social and environmental consequences of living in the risk society. Studies of trauma are also increasingly prominent. But scant attention has been paid to perceptions of risk and danger in the past — in particular, to the history of accidents and the meanings of the accidental. This collection of interdisciplinary essays addresses this lacuna providing a theoretically informed historical sociology of the accident and risk. It explores the social and cultural contexts in which 'acts of God', calamities, catastrophes, disasters, injuries, casualties, and other category of 'mishaps' were experienced, conceptualized and responded to. Drawing on the skills of British, European and North American scholars, *Accidents in History* combines philosophical, sociological and ecological overviews with in-depth historical case-studies. It spans the period from the eighteenth century to the present, probing the epistemological, social and political roots of the accidental. The authors differentiate between industrial and other forms of injury; trace the origins of the normalization of accidents; and analyze the interactions and gendered discrepancies between domestic and non-domestic mishaps. They also investigate the medicalization of sudden injury, and discuss the emergence of new socio-medical and humanitarian discourses around the organization of relief for victims.

*The Herbarium Handbook* Diane M. Bridson,Leonard Forman,Royal Botanic Gardens, Kew,1998 Contains chapters on the conservation of herbarium sheets and on the collection and curation of the larger algae. The chapter on computers has been completely rewritten and much enlarged, as have those on pests and treatments, larger fungi and economic botany. The sections on liquid preservatives and on pesticides have been revised to take into account new health and safety regulations. An essential reference work for herbarium managers and technicians and for all those who are involved with the making and maintenance of herbarium collections. --NHBS Environment Bookstore.

Leading Issues in Rural Development ,2015 Stories of rural transformation in Bangladesh based on perceptions of rural people as described by them.

Erstarrtes Denken Günther Blaicher,1987

**Class Politics and the Radical Right** Jens Rydgren,2013 This volume, which brings together the leading scholars within this field, makes a unique contribution by focusing on the relationship between class politics and the radical right

The Tea Party and the Remaking of Republican Conservatism Theda Skocpol,Vanessa Williamson,2016 In this penetrating new study, Skocpol of Harvard University, one of today's leading political scientists, and co-author Williamson go beyond the inevitable photos of protesters in tricorne hats and knee breeches to provide a nuanced portrait of the Tea Party. What they

find is sometimes surprising.

*The Explanatory Power of Models* Robert Franck, 2013-11-11 This book progressively works out a method of constructing models which can bridge the gap between empirical and theoretical research in the social sciences. It aims to improve the explanatory power of models. The issue is quite novel, and has benefited from a thorough examination of statistical and mathematical models, conceptual models, diagrams and maps, machines, computer simulations, and artificial neural networks.

*Revolt on the Right* Robert Ford, Matthew J Goodwin, 2014-03-17 Winner of the Political Book of the Year Award 2015 The UK Independence Party (UKIP) is the most significant new party in British politics for a generation. In recent years UKIP and their charismatic leader Nigel Farage have captivated British politics, media and voters. Yet both the party and the roots of its support remain poorly understood. Where has this political revolt come from? Who is supporting them, and why? How are UKIP attempting to win over voters? And how far can their insurgency against the main parties go? Drawing on a wealth of new data - from surveys of UKIP voters to extensive interviews with party insiders - in this book prominent political scientists Robert Ford and Matthew Goodwin put UKIP's revolt under the microscope and show how many conventional wisdoms about the party and the radical right are wrong. Along the way they provide unprecedented insight into this new revolt, and deliver some crucial messages for those with an interest in the state of British politics, the radical right in Europe and political behaviour more generally.

**The Radical Right in Western Europe** Herbert Kitschelt, Anthony J. McGann, 1997 An in-depth analysis of radical right parties in seven countries.

**Keys to the 21st Century** Jérôme Bindé, 2001 Since September 1997, UNESCO's Analysis and Forecasting Office has been arranging a series of Twenty-First Century Talks, each of which brings together two or three leading scientists, intellectuals, creators or decision-makers from all parts of the world. The Office also organized the first Twenty-First Century Dialogues in September 1998, in which 60 international participants took part in discussions on the general theme of Will the Twenty-First Century Take Place? This text represents an anthology of the contributions made to these future-oriented discussions, up to the ninth session of the Talks held in June 1999. Topics include population, biotechnologies, pollution, energy, the food supply, culture, pluralism, education, democracy, human rights, women, childhood, work, urban living, globalization, poverty, and human conflicts. *Institutional Governance and Regulation of Water Services* Michael J. Rouse, 2013-09-14 Institutional Governance and Regulation of Water Services aims to provide the key elements of policy, governance and regulation necessary for sustainable water and sanitation services. On policy matters, it covers important aspects including separation of policy and delivery, integrated planning, sustainable cost recovery, provisions for the poor, and transparency. Regulation and Regulatory Bodies

are presented in their various forms, with discussion of why some form of independent scrutiny is essential for sustainability. The focus is on what works and what does not, based on consideration of basic principles and on case studies in both developing and developed countries. The early chapters discuss the key elements, with later chapters considering how these elements have come together in successful reforms of public sector operations. A chapter is devoted to the successful use of the private sector based on lessons learnt from 'failures' of private contracts and the need for the application of sound procurement principles. The current trend is for a public sector model which benefits from business approaches, the so-called corporatised public utility. Experience since the publication of the first edition in 2007 reinforces the importance of the key elements for sustainable water services. This second edition brings the material up to date and with some increased emphasis on public participation in its many forms. It refers to the opportunity for progress provided by the UN Declaration of Water and Sanitation as a Human Right, but only if it is implemented in a practical and sustainable way. Institutional Governance and Regulation of Water Services is aimed at providing an informative source for national and local governments responsible for water policy, for water utility managers, and for students who will be the policy makers of tomorrow. It is a teaching aid for courses on water policy, governance and regulation. About the Author: Michael Rouse is a Distinguished Research Associate at the University of Oxford and manages the Institutional Governance and Regulation module of the University's MSc Course on Water Science, Policy and Management. He was formerly Head of the Drinking Water Inspectorate in London and has extensive knowledge and experience of water governance and regulation, including all aspects of audit and enforcement, and the governance issues related to both public sector management and privatisation. He has wide knowledge of water technical and operational matters, based on his applied research and development background at the Water Research Centre, where he spent 9 years as Managing Director. Michael has a good understanding of international water matters and advises governments on policy and regulation. He is a Past President of the International Water Association. He is a visiting professor at Tsinghua University in Beijing and at the Shanghai Academy of Social Science. In 2000 he was awarded the CBE (Commander of the British Empire) for his professional services.

A Companion to Greek and Roman Political Thought Ryan K. Balot, 2012-12-21 A COMPANION TO GREEK AND ROMAN POLITICAL THOUGHT Justice, virtue, and citizenship were at the center of political life in ancient Greece and Rome and were frequently discussed by classical poets, historians, and philosophers. This Companion illuminates Greek and Roman political thought in all its range, diversity, and depth. Thirty-four essays from leading scholars in history, classics, philosophy, and political science provide stimulating discussions of classical political thought, ranging from the Archaic Greek epics to the final days of the Roman Empire and beyond. These essays strike a judicious yet thought-provoking balance between theoretical and historical perspectives. A Companion to Greek and Roman Political Thought is an authoritative guide to the ancient Greek and Roman political questions that continue to shape and challenge the modern world.

**The House of Ulloa** Emilia Pardo Bazan,2013 The House of Ulloa follows pure and pious Father Julian Alvarez, who is sent to a remote country estate to put the affairs of the marquis, an irresponsible libertine, in order. When he discovers moral decadence, cruelty and corruption at his new home, Julian's well-meaning but ineffectual attempts to prevent the fall of the House of Ulloa end in tragedy.
