NEW YORK TIMES BESTSELLER • An inspiring personal story of redemption, second chances, and the transformative power within us all, from the founder and CEO of the nonprofit charity: water. At 28 years old, Scott Harrison had it all. A top nightclub promoter in New York City, his life was an endless cycle of drugs, booze, models—repeat. But 10 years in, desperately unhappy and morally bankrupt, he asked himself, "What would the exact opposite of my life look like?" Walking away from everything, Harrison spent the next 16 months on a hospital ship in West Africa and discovered his true calling. In 2006, with no money and less than no experience, Harrison founded charity: water. Today, his organization has raised over \$400 million to bring clean drinking water to more than 10 million people around the globe. In Thirst, Harrison recounts the twists and turns that built charity: water into one of the most trusted and admired nonprofits in the world. Renowned for its 100% donation model, bold storytelling, imaginative branding, and radical commitment to transparency, charity: water has disrupted how social entrepreneurs work while inspiring millions of people to join its mission of bringing clean water to everyone on the planet within our lifetime. In the tradition of such bestselling books as Shoe Dog and Mountains Beyond Mountains, Thirst is a riveting account of how to build a better charity, a better business, a better life—and a gritty tale that proves it's never too late to make a change. 100% of the author's net proceeds from Thirst will go to fund charity: water projects around the world.

Some critics in England and France have long maintained that British director Terence Fisher, whose films dominated world markets in the 1950s and 60s, was one of the greatest directors of fantasy films in history. Since his death in 1980, Fisher's reputation has grown from relative obscurity and his influence on the development of the modern horror film has been widely recognized. However, Fisher's importance should not be limited to the context of the fantasy and horror film genres. His films should also be recognized as expressions of his generalizations about human spirituality. This critical study of Fisher's films begins with an introduction that provides biographical information on his film career, summaries of all of the films he directed and examples of his impact on contemporary cinema. All of Fisher's films are analyzed in terms of their Christian and religious themes as well as their mythical sources. Chapters are devoted to Fisher's work on the subjects of Frankenstein, Dracula, curses (The Devil Rides

Out), the ancient goddess (The Gorgon), the divided self (The Man Who Could Cheat Death) and the redeemer hero (The Stranglers of Bombay). The concluding chapter analyzes the role and influence of Biblical narratives in Fisher's films. Also included is a filmography; the work is fully indexed.

Ten years from now, what do you want or expect your students to remember from your course? We realized that in ten years what matters will be how students approach a problem using the tools they carry with them—common sense and common knowledge—not the particular mathematics we chose for the curriculum. Using our text, students work regularly with real data in moderately complex everyday contexts, using mathematics as a tool and common sense as a guide. The focus is on problems suggested by the news of the day and topics that matter to students, like inflation, credit card debt, and loans. We use search engines, calculators, and spreadsheet programs as tools to reduce drudgery, explore patterns, and get information. Technology is an integral part of today's world—this text helps students use it thoughtfully and wisely. This second edition contains revised chapters and additional sections, updated examples and exercises, and complete rewrites of critical material based on feedback from students and teachers who have used this text. Our focus remains the same: to help students to think carefully—and critically—about numerical information in everyday contexts.
