War bears down on her peaceful little village after the Italians sign a separate peace with the Allies-transforming the Germans into an occupying army. But when her brother joins the Resistance, he asks Giovanna to hide a badly wounded fighter who is Jewish. As she nurses him back to health, she falls helplessly in love with the brave and humble Marco, who comes from as ancient and noble an Italian family as she does. They pledge their love, and then must fight a real battle against the Nazis who become more desperate and cruel as the Allies close in on them...

Buried in the bowels of one of the several intelligence agencies in the US government is an office of clandestine medical personnel. Their mission is to analyze the health and mental state of international persons of interest and report their findings to America's policymakers. The team is on call 24/7 to comment on and analyze any written observations, pictures or videos of such persons of interest that may come into the hands of the U.S. government. The goal is to provide timely information to policymakers and negotiators so that the United States of America may achieve maximum success in dealing with the people concerned. Usually this is done in the safe confines of the Agency walls, but sometimes the analysts are forced to place themselves in harms way. Through it all and despite the circumstances, their Code of Honor is to Do No Harm.

Our market-based, profit-driven health care system in the United States has put necessary care increasingly beyond the reach of ordinary Americans. Primary health care, the fundamental foundation of all high-performing health care systems in the world, is a critical but ignored casualty of the current system. Unfortunately, primary care is often poorly understood, even within the health professions. This book describes what has become a crisis in primary care, defines its central role, analyzes the reasons for its decline, and assesses its impacts on patients and families. A constructive approach is presented to rebuild and transform U.S. primary care with the urgent goal to address the nation's problems of access, cost, quality and equity of health care for all Americans.

From the author of *The Deep & Dark Blue* comes a tender graphic novel, perfect for our time, that gently explores themes of self-discovery, friendship, healing from tragedy, and hope for a better tomorrow. Struggling with anxiety after witnessing a harrowing instance of gun violence, Manuel Soto copes through photography, using his cell-phone camera to find anchors that keep him grounded. His days are a lonely, latchkey monotony until he's teamed with his classmates, Sebastian and Caysha, for a group project. Sebastian lives on a grass-fed cattle farm outside of town, and Manuel finds solace in the open fields and in the antics of the newborn calf Sebastian is hand-raising. As Manuel aides his new friends in their preparations for the local county fair, he learns to open up, confronts his deepest fears, and even finds first love. This title will be simultaneously available in hardcover. The discussions in this book focus on the "Golden Hour", that period where life and death outcomes are decided in the critical or emergency care of children. The book utilizes a step-by-step approach to handling critical situations such as airway management, cardiopulmonary resuscitation, trauma, medical emergencies, burns, and child abuse.

The Golden Hour is a well-established concept in emergency medicine, related to the critical period of one hour after an injury, accident or trauma. This term implies that the mortality rates increase substantially if efficient care is not provided within 60 minutes after the trauma. This book is intended as a practical manual in Trauma Care within the context of the golden hour, addressing all trauma types and all body parts. Readers will find essential decision-making algorithms and protocols with commentary for traumas, along with easily accessible information on how to treat patients in a very practical and handy fashion. Furthermore, the content is presented in a didactic way suitable for a wide audience, from medical students who want to learn about the basics of trauma care to experienced surgeons seeking a comprehensive guide to trauma-related interventions. The book combines contributions from experts at two renowned Trauma Centers, the Hospital do Trabalhador at Curitiba, Brazil, and the Ryder Trauma Center in Miami, USA. Therefore, considering the different local environments and resources, the book provides distinct perspectives for several injuries, presenting the state of the art in Trauma Care. The diversity of perspectives in this book contributes to a global health care approach suitable for trauma-related events from developed countries to remote areas. The Trauma Golden Hour – A Practical Guide celebrates the Centennial Anniversary of the Federal University of Parana (Brazil), the 25th Anniversary of the Ryder Trauma Center (USA) and the 20th Anniversary of the Hospital do Trabalhador (Brazil).

The new edition of this essential handbook includes user-friendly modified outline format for easy access to information, new color dermatology photographs to aid in accurate diagnosis, updated information on AIDS, blood gases, and a new section on neonatal complications of various maternal conditions.

A frustrated artist with a traumatic past finds mystery and healing on a remote Maine island in this “richly told and hauntingly beautiful” novel (Heather Gudenkauf, New York Times bestselling author). Years ago on a spring afternoon, thirteen-year-old Wyn Davies took a shortcut through the woods in her New Hampshire hometown and became a cautionary tale. Now, twenty years later, she lives in New York, on the opposite side of a duplex from her ex, with their

four-year-old daughter shuttling between them. Wyn makes her living painting commissioned canvases of birch trees to match her clients' furnishings. But the nagging sense that she has sold her artistic soul is soon eclipsed by a greater fear. Robby Rousseau, who has spent the past two decades in prison for a terrible crime against her, may be released based on new DNA evidence—unless Wyn breaks her silence about that afternoon. To clear her head, Wyn agrees to be temporary caretaker for a friend's new property on an island off the coast of Maine. The house has been empty for years, and in the basement Wyn discovers a box of film canisters labeled "Epitaphs and Prophecies." Like time capsules, the photographs help her piece together the life of the house's former owner, an artistic young mother. But there is a mystery behind the images too, and unraveling it will force Wyn to finally confront what happened in those woods—and perhaps escape them at last. "An emotionally charged novel with many layers, rounded out by a cast of memorable characters."—Publishers Weekly
