"Does it make you more attractive to women?" Potter shouted in his ear. "No. " "What is it good for then?" "Worms?" "Intestinal worms. You'll never again pass a worm if you eat a fistful of dulse first thing in the morning and last thing at night. With modern techniques of chemical isolation and structure determination, the old distinction between herbal and chemical remedies has largely been broken down. By chemotherapy we now mean simply the treatment of disease by drugs (the word medicines has unhappily been eclipsed). The distinction made between chemotherapy and non chemical therapy (e. g. , radiation, physiotherapy, surgical intervention, immunomodulation) remains useful despite some minor overlapping. The present work thus deals with drugs and their use in parasitic

disease. (Since we are dealing with the treatment of incipient as well as established infection, chemotherapy subsumes chemoprophylaxis as well as chemotherapeutics per se. ) Definition of parasitism as a biological *modus vivendi*, although important in itself, need not concern us here. We need simply delimit the scope of the book, and that is easily done.
