Hubert Harrison was an immensely skilled writer, orator, educator, critic, and political activist who, more than any other political leader of his era, combined class consciousness and anti-white-supremacist race consciousness into a coherent political radicalism. Harrison's ideas profoundly influenced "New Negro" militants, including A. Philip Randolph and Marcus Garvey, and his synthesis of class and race issues is a key unifying link between the two great trends of the Black Liberation Movement: the labor- and civil-rights-based work of Martin Luther King Jr. and the race and nationalist platform associated with Malcolm X. The foremost Black organizer, agitator, and theoretician of the Socialist Party of New York, Harrison was also the founder of the "New Negro" movement, the editor of *Negro World*, and the principal radical influence on the Garvey movement. He was a highly praised journalist and critic (reportedly the first regular Black book reviewer), a freethinker and early proponent of birth control, a supporter of Black writers and artists, a leading public intellectual, and a bibliophile who helped transform the 135th Street Public Library into an international center for research in Black culture. His biography offers profound insights on race, class, religion, immigration, war, democracy, and social change

in America.

**PSYCHOLOGICAL TESTING: PRINCIPLES, APPLICATIONS, AND ISSUES**, Ninth Edition explains the fundamentals of psychological testing, their important applications, and the controversies that emerge from those applications in clinical, education, industrial, medical, and legal settings. Kaplan and Saccuzzo's engaging and thorough text demonstrates how psychological tests are constructed and used, both in a professional setting and in everyday lives. It explains core concepts that affect the evaluation of all tests, major types of psychological tests, and current issues affecting testing such as stereotype threat, bias, laws, and ethics. Chapters are independent enough to allow instructors to structure their class to achieve course objectives. Test profiles and sample items illustrate how psychological testing is used and reported. Case studies demonstrate the uses and misuses of psychological testing, while technical examples assist students in grasping complex statistical concepts. “A career can be like a snake and ladder journey, full of ups and downs, but remember, your career is a journey, not a destination.” Your career does not start and end when you get a job. You start your career when you begin doing activities at school, playing sports on weekends, or working at your part-time or volunteer job. There are skills that

you can develop and steps you can take each time you are faced with your next career transition. Your career will be a rich and rewarding experience that will require you to make many critical decisions throughout your life. So why won't you just leave school and go straight into a job that you'll have for life? Lots of reasons! You might find out you don't suit a job, you might want to earn more money, you may be offered the chance to do something more challenging, or your passion is something else. That's when you need to work through your career decision-making process and review the career you think is the best for you. The Right Hand to Eat helps you choose your career—it doesn't choose you!

Environmental problems – particularly climate change – have become increasingly important to governments and social researchers in recent decades. Debates about their implications for social policies and welfare reforms are now moving towards centre stage. What has been missing from such debates is an account of the history of the welfare state in relation to environmental issues and green ideas. A Green History of the Welfare State fills this gap. How have the environmental and social policy agendas developed? To what extent have welfare systems been informed by the principles of environmental ethics and politics? How effective has the welfare state been at addressing environmental problems? How might the history of social policies be reimagined? With its lively,

chronological narrative, this book provides answers to these questions. Through overviews of key periods, politicians and reforms the book weaves together a range of subjects into a new kind of historical tapestry, including: social policy, economics, party politics, government action and legislation, and environmental issues. This book will be a valuable resource for students and scholars of environmental policy and history, social and public policy, social history, sociology and politics.
