Across the world, education is being restructured to include greater focus on developing critical and creative skills. In second language education, research suggests that cognition and language development are closely related. Yet despite increasing interest in the teaching of thinking skills, critical thinking has not been widely intergrated into language teaching. Thinking Skills and Creativity in Second Language Education presents a range of investigations exploring the relationship between thinking skills and creativity, and second language education. Focusing on cognitive, affective, social, and emotional perspectives, this book highlights current research and raises questions that will set the direction for future research. Its aims are as follows: Provide an in-depth understanding of the link between second language development and thinking skills. Consider approaches to developing thinking skills in second language instruction. Examine practices in implementing thinking skills in second language learning. Offer an updated list of sources of information on thinking skills in second language education. A new addition to the Research on Teaching Thinking and Creativity series, this book is relevant to researchers in the field of educational psychology, to Masters degree and PhD students in this field, and to anyone interested in developing thinking skills.

Acing Admissions is the only guide you need to help navigate the US undergraduate studies application process. Written with the international student in mind, Acing Admissions outlines frameworks for developing a college list, provides a step-by-step guide to submitting your application and describes the range of financial aid options available to international students. The book also gives detailed timelines with checkpoints for students who want to start planning as early as 8th grade. Practical advice is conveyed through

anecdotes and case studies featuring real applicant stories, based on the authors' years of experience running an education consulting practice for students and families living outside the US.

In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid large-scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two-volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music, and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and US-focused approaches to music education assessment. Chapters address assessment in different types of US classrooms; how to assess specific skills or requirements; and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of The Oxford Handbook of Assessment in Music Education pave the way forward for music educators and researchers in the field.

This volume examines the accounting issues within Central and Eastern Europe, looking back to the fall of communism (1980s-90s) and its effect on the countries' accounting and business models.

th CICLing 2009 marked the 10 anniversary of the Annual Conference on Intelligent Text Processing and Computational Linguistics. The CICLing conferences provide a wide-scope forum for the discussion of the art and craft of natural language processing research as well as the best practices in its applications. This volume contains 76 invited papers and the regular papers accepted for oral presentation at the conference. The papers accepted for poster presentation were published in a special issue of another journal (see the website for more information). Since 2001, the proceedings of CICLing conferences have been published in Springer's Lecture Notes in Computer Science series, as volumes 2004, 2276, 2588, 2945, 3406, 3878, 4394, and 4919. This volume has been structured into 12 sections: – Trends and Opportunities – Linguistic Knowledge Representation Formalisms – Corpus Analysis and Lexical Resources – Extraction of Lexical Knowledge – Morphology and Parsing – Semantics – Word Sense Disambiguation – Machine Translation and Multilinguism – Information Extraction and Text Mining – Information Retrieval and Text Comparison – Text Summarization – Applications to the Humanities A total of 167 papers by 392 authors from 40 countries were submitted for evaluation by the International Program Committee, see Tables 1 and 2. This volume contains revised versions of 44 papers, by 120 authors, selected for oral presentation; the acceptance rate was 26.3%.

In this Third Volume of the series, Research on Education in Africa, the Caribbean and the Middle East, the volume continues with the previously established overarching purpose of publishing chapters that are based upon research conducted in those regions by scholars, many of whom are indigenous to the regions they write about and are, therefore, able to provide cultural insights about relevant issues, as well as nonindigenous scholars who have conducted their studies in countries within the regions or about those regions. This mixture of indigenous scholarship offering emic perspectives and outside scholarship offering etic perspectives continues to be a relative strength and uniqueness of this book series. In addition, several chapters in the current volume constitute collaborations between the authors etic and emic to the contexts about which they write. This bifocality in the gaze cast upon issues covered in this book series has been well received by readers of earlier volumes of the series.

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format that will be useful

for both new and experienced teachers.

Inhaltsangabe:Introduction: In Germany, education matters lie within the scope of each of the 16 German federal states. Consequently, there is no unique educational system which is valid for the entire Federal Republic of Germany, but 16 individual ones. However, a German-wide basic framework, including regulations about the compulsory school attendance for instance, does exist. The duration of compulsory schooling until passing the Abitur at the Gymnasium, however, is not regulated by this framework, but belongs to the power of decision of each federal state. For instance, in Thuringia and Saxony, the duration of compulsory schooling at the Gymnasium has been limited to eight years, as it was already the case before the reunification of Germany in 1990. In the other federal states, like North-Rhine Westphalia for example, the duration of compulsory schooling at the Gymnasium included an additional ninth year, resulting in the fact that the students attended the Gymnasium from grade 5 until grade 13. Nevertheless, in 2001, the ministry of education of the federal state Saarland decided for a reduction of the duration of compulsory schooling at the Gymnasium by one year. By now, all the other federal states have followed and therefore also made the decision for a reduced duration of only eight years at the Gymnasium. After many heated discussions, also the North-Rhine Westphalian ministry of education decided for a reduction of the duration of compulsory schooling at the Gymnasium. As a consequence of this decision, students of two grades (G8 and G9 students) entered the upper secondary level at all North-Rhine Westphalian Gymnasien on August 31st, 2010 (Ministerium für Schule und Weiterbildung des Landes Nordrhein-Westfalen, n.d.a). The students of this so-called Doppeljahrgang will all graduate in 2013 and therefore all of them will have to pass the same Abitur exams. Hence, it must be guaranteed that G8 students have the same preconditions as G9 students, despite having one year less of general schooling before graduating. Since no students have entered the upper secondary level after only five years at the Gymnasium in North-Rhine Westphalia before 2010, empirical research in this area is hardly available by now. Nevertheless, this Doppeljahrgang offers the unique chance of directly comparing G8 and G9 students in order to find out in how far the new G8 system was implemented successfully or not. Especially in the context of learning [...]

The Secret Lives of Saints paints a troubling portrait of an extreme religious sect. These zealous believers impose severe and often violent restrictions on women, deprive children of education and opt instead to school them in the tenets of their faith, defy the law and move freely and secretly over international borders. They punish dissent with violence and even death. No, this sect is not the Taliban, but North America's fundamentalist Mormons. Daphne Bramham explores the history and ideas of this surprisingly resilient and insular society, asking the questions that surround its continued existence and telling the stories of the men and women whose lives are so entwined with it—both the leaders and the victims.
