This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

"If you're a parent who has decided to educate your children yourself, this book is the first you should buy."—Washington Times The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Jessie Wise and Susan Wise Bauer outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," the middle school "logic stage," and the high school "rhetoric stage." Using this theory as your model, you'll be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. This newly revised edition

contains completely updated ordering information for all curricula and books, new and expanded curricula recommendations, new material on using computers and distance-learning resources, answers to common questions about home education, information about educational support groups, and advice on practical matters such as working with your local school board, preparing a high school transcript, and applying to colleges.

As the regional lingua franca, the Uyghur language long underpinned Uyghur national identity in Xinjiang. However, since the 'bilingual education' policy was introduced in 2002, Chinese has been rapidly institutionalised as the sole medium of instruction in the region's institutes of education. As a result, studies of the bilingual and indeed multi-lingual Uyghur urban youth have emerged as a major new research trend. This book explores the relationship between language, education and identity among the urban Uyghurs of contemporary Xinjiang. It considers ways in which Uyghur urban youth identities began to evolve in response to the state imposition of 'bilingual education'. Starting by defining the notion of ethnic identity, the book explores the processes involved in the formation and development of personal and group identities, considers why ethnic boundaries are constructed between groups, and questions how ethnic identity is expressed in social, cultural and religious practice. Against this background, contributors adopt a special focus on the relationship between language use, education and ethnic identity development. As a study of ethnicity in China this book will be of huge interest to students and scholars of Chinese culture and society, Asian ethnicity, cultural anthropology, sociolinguistics and Asian education.

Based on expert review and research, this book provides an innovative standard and guide to social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of

social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)

The little-known story of a fierce rebellion against the Romans: "A very good read for anyone interested in ancient military history and historiography." —The NYMAS Review In the year AD 9, three Roman legions were crushed by the German warlord Arminius in the Battle of the Teutoburg Forest. This event is well known, but there was another uprising that Rome faced shortly before, which lasted from AD 6 to 9, and was just as intense. This rebellion occurred in the western Balkans—an area roughly corresponding to modern Croatia, Bosnia and Herzegovina, Slovenia, Montenegro, and parts of Serbia and Albania—and it tested the Roman

Empire to its limits. For three years, fifteen legions fought in the narrow valleys and forest-covered crags of the Dinaric Mountains in a ruthless war of attrition against an equally ruthless and determined foe, and yet this conflict is largely unknown today. The Great Illyrian Revolt is believed to be the first book ever devoted to this forgotten war of the Roman Empire. Within its pages, we examine the history and culture of the mysterious Illyrian people, the story of how Rome became involved in this volatile region, and what the Roman army had to face during those harrowing three years in the Balkans.
