This Handbook offers a developmentally oriented and socially contextualized survey of research into individual bilingualism, comprising the learning, use and, as the case may be, unlearning of two or more spoken and signed languages and language varieties. A wide range of topics is covered, from ideologies, policy, the law, and economics, to exposure and input, language education, measurement of bilingual abilities, attrition and forgetting, and giftedness in bilinguals. Also explored are cross- and intra-disciplinary connections with psychology, clinical linguistics, second language acquisition, education, cognitive science, neurolinguistics, contact linguistics, and sign language research.

“Why don’t the other animals understand me when I talk?” he asks. Join Bosley as he discovers the power of communication and how to open up a new world of possibilities by learning how the other animals talk. Bosley learns patience as he diligently learns how to speak other languages, one word at a time, and he discovers a wide world of new friends waiting to be made. This book will impress upon any child the importance of language learning in a way that they can relate to.

From its beginnings in the 1960s, sociolinguistics

developed several different subfields with distinct methods and interests: the variationist tradition established by Labov, the anthropological tradition of Hymes, interactional sociolinguistics as developed by Gumperz, and the sociology of language represented by the work of Fishman. All of these areas have seen a great deal of growth in recent decades, and recent studies have led to a more broadly inclusive view of sociolinguistics. Hence there is a need for a handbook that will survey the main areas of the field, point out the lacunae in our existing knowledge base, and provide directions for future research. The Oxford Handbook of Sociolinguistics will differ from existing work in four major respects. First, it will emphasize new methodological developments, particularly the convergence of linguistic anthropology and variationist sociolinguistics. Second, it will include chapters on sociolinguistic developments in areas of the world that have been relatively neglected in the major journals. Third, its chapters are written by contributors who have worked in a range of languages and whose work addresses sociolinguistic issues in bi- and multilingual contexts, i.e. the contexts in which a majority of the world's population lives. Finally, it will include substantial material on the rapidly growing study of sign language sociolinguistics.
