Are you sitting the new 9 to 1 GCSE examinations and wish to achieve good grades? Are you overwhelmed by the new syllabus and the workload? Do you need some useful and reliable guidance from a student who has nailed the exams? This book has been written by a teenager, like you. Having achieved seven 9s, three A*s and one A in his GCSEs, the author has shared his revision style to help many other teenagers to realise their potential. In his book, Rohan has outlined his tried and tested methods to achieve the best grades. There is step by step guide on planning, making a timetable, and revision techniques leading up to the GCSE exams. There are separate chapters for subject-specific advice as the same technique cannot work for subjects like English and Chemistry. There are tips on how to stay motivated and also relax and enjoy at the same time. Smart working rather than a lot of working helps. Read this book and arm yourself with studying techniques which will help you not only in your GCSEs but all future exams.

This book will provide an idea of questions that have been asked in the previous Years exams, so aspirants can do better preparation for upcoming examinations. Presentation of language is simple and clear.

As part of the discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. *Dual Coding With Teachers* is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35 teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

Exam board: AQA, Edexcel, OCR, WJEC, WJEC Eduqas Level: A-level Subject: Geography First teaching: September 2016 First exams: Summer 2018 Master the skills you need to set yourself apart and hit the highest grades. This year-round course companion develops the higher-order thinking skills that top-achieving students possess, providing step-by-step guidance, examples and tips for getting an A grade. Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons.

It is grounded in the notion of social justice and the idea that all students are entitled to a high-quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Thoroughly updated to take account of the latest research, evidence and policy, this new edition reflects new developments in technology as well as current thinking on curriculum, pedagogy and assessment. Exploring the fundamentals of teaching and learning geography in school, chapters cover: Why we teach geography – its purposes and intent Understanding and planning the curriculum – what to teach Effective pedagogy – how to teach Inclusion Assessment Developing and using resources Fieldwork and outdoor learning Values and school geography's contribution to 'citizenship' Professional development Intended as a core textbook and written with both university and school-based initial teacher education in mind, Learning to Teach Geography is essential reading for all those who aspire to become able, effective and above all, thoughtful and reflective teachers.

In over 220 drawings and photographs, Robert Mellin presents the development of architecture in the decades immediately following Newfoundland's 1949 union with Canada. Newfoundland's wholehearted embrace of modern architecture in this era affected planning as well as the design of cultural facilities, commercial and public buildings, housing, recreation, educational facilities, and places of worship, and Premier Joseph Smallwood often relied on modern architecture to demonstrate the progress made by his administration. Mellin explores the links between Smallwood and modern architecture, revealing how Smallwood guided the development of numerous architectural projects. He also looks at the work of two innovative local architects, Frederick A. Colbourne and Angus J. Campbell, showing how their architecture was influenced by their life-long interest in art. The first comprehensive work on an important period of architectural development in urban and rural Newfoundland, Newfoundland Modern complements Mellin's award-winning book on the outpost of Tilting, Fogo Island.
