heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

The Magisterium of the Catholic Church teaches that Mary, the Mother of God, is a grace-filled, flesh and blood woman, who unsurpassingly loves each of us by name. Mary, the Beloved, affirms that teaching, providing a theological and philosophical portraiture of our Heavenly Mother that plunges both heart and intellect deeply into her mystery. It's not simply to teach doctrine that this book was written, but to introduce the reader to a real Lady who will fill their hearts.

Despite the increased trend towards secularisation in state schooling, issues of religion and spirituality have remained important. Increased pluralism within societies through expanding migration patterns is changing the religious and cultural contours of many countries in Europe and North America, and is creating

a need for a deeper understanding of religious diversity. However, the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism. More recently, religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions, in particular. These are profound concerns and there is an urgency to examine how religion, religious education and interfaith initiatives can address such misconceptions. This book is thus timely, focusing on an area that is often neglected, particularly on the role of religion in education for sustainable development. While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries, their role in reaching development goals has not always been explicitly recognised, as is evident even in the United Nations' most recently conceptualised 2030 Agenda for Sustainable Development. Undeniably, the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries. This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and comparative

understanding of the role of religious education and institutions in advancing the post-2015 development agenda. The contributors to this volume each demonstrate that, while religion in education can contribute to understanding and respect, it is also a space that can be contested and co-opted. Without addressing the salience of religion, however, it will not be possible to foster peace and combat discrimination and prejudice. This book will be of interest to researchers, scholars and students in the field of comparative education and development, religious studies, theology and teacher development and training. This book may also be of interest to national and international policy makers. There are also numerous faith-based organisations, as well as other non-governmental organisations (NGOs) working on religion and education issues that may find these case studies a useful resource.

In *Homophobia in the Hallways*, Tonya D. Callaghan interrogates institutionalized homophobia and transphobia in the publicly-funded Catholic school systems of Ontario and Alberta.

For decades after the declaration of the Republic of Turkey in 1923, the Turkish state promoted the idea of a desired citizen. The Kemalist state treated these citizens as superior, with full rights; but the 'others', those outside this desired citizenship, were either tolerated or considered undesirable citizens. And this

caused the marginalization of ethnic and religious minorities, religious Muslims and leftists alike. In this book, Ihsan Yilmaz shows how historical traumas, victimhood, insecurities, anxieties, fears and siege mentality have negatively impacted on and radicalised the nation-building projects of the two competing hegemonic ideologies/regimes (those of Ataturk and Erdogan) and their treatment of majority and minority ethnic, religious and political groups. Yilmaz reveals the significant degree of overlap between the desired, undesired citizen and tolerated citizen categories of these two regimes, showing how both regimes aimed to create a perception of a homogenous Turkish nation.

The real Axis of Evil is... * The Religion of Humanism * American Civil Liberties Union (ACLU) * National Education Association (NEA) It's time to get back to some old-fashioned values like commitment and sacrifice and responsibility and purity and love and the straight life. Not only will our children benefit from our self-discipline and perseverance, but we adults will live in a less neurotic world, too! In the case *Torcaso v. Watkins* (in 1961) the U.S. Supreme Court stated, "Among religions in this country which do not teach what would generally be considered a belief in the existence of God are Buddhism, Taoism, Ethical Culture, Secular Humanism and others."

This volume is the completely reset Second Edition of Jeanne Marie Neumann's *A College Companion* (Focus, 2008). It offers a running exposition, in English, of the Latin grammar covered in Hans H. Ørberg's *Familia Romana*, and includes the complete text of the Ørberg ancillaries *Grammatica Latina* and *Latin–English Vocabulary*. It also serves as a substitute for Ørberg's *Latine Disco*, on which it is based. As it includes no exercises, however, it is not a substitute for the Ørberg ancillary *Exercitia Latina I*.

Though designed especially for those approaching Familia Romana at an accelerated pace, this volume will be useful to anyone seeking an explicit layout of Familia Romana's inductively-presented grammar. In addition to many revisions of the text, the Second Edition also includes new units on cultural context, tied to the narrative content of the chapter.

The classic reference work that provides annually updated information on the countries of the world.

This document's purpose is to spell out the Church's understanding of the nature of revelation--the process whereby God communicates with human beings. It touches upon questions about Scripture, tradition, and the teaching authority of the Church. The major concern of the document is to proclaim a Catholic understanding of the Bible as the "word of God." Key elements include: Trinitarian structure, roles of apostles and bishops, and biblical reading in a historical context.

(© 2012) This textbook has been found in conformity with the Catechism of the Catholic Church. Our Catholic Faith: Living What We Believe offers a general overview of the Catholic faith as outlined by the four pillars of the Catechism of the Catholic Church and is designed for use in an introductory Catholic high school theology course. Because students enter Catholic high school with diverse catechetical instruction and formation experiences, a primary objective of this text is to get students up to speed early in their high school careers. Students are challenged to accept Jesus, commit themselves to

him through the Church, and to live lives of loving service.

In states in which the public role of religion is controversial, religious instruction becomes both a means and an end of politics. This groundbreaking collection of case studies drawn from Arab, Asian and European countries examines different aspects of religious instruction: how it is regulated, who decides its content, the values it imparts and, in particular, whether it triggers, deepens or reduces conflict.

Demonstrating that in late modernity, parallel to rising nationalisms, there is a shift towards religious communities becoming the central axis for cultural organization and progressive thinking, this book presents Greece as a case study based on empirical field data from contemporary theology and religious education, and makes a unique contribution to ongoing debates about the public role of religion in contemporary Europe.

In the post-communist era democracies in Eastern Europe will be determined by many factors. The Orthodox and Roman and Greek Catholic churches have imposed their views through political engagement and the Romanian Orthodox has sought to consolidate its position of national Church, the book examines the relationship between church and state.
