This book introduces students of education to the elements of educational psychology. It also relates as closely as possible the findings of research to classroom practice. In order to make clear the fundamental processes involved in psychological development, the book starts with a study of the way in which the young child adapts its behaviour to its environment. This study considers some of the key aspects of physical development, mainly the central nervous system. At the same time the way physical growth and psychological development are influenced by the experience of the individual is also discussed. This discussion of development is followed by an examination of the processes of learning, with particular attention paid to the works of Piaget. The salient points of each chapter are brought together in a summary which may be used by the reader to obtain a preliminary overview of the content of the chapter, and as an aid to revision. This title provides realistic and invaluable test practice for the new grammar, punctuation and

This is the first title in this new series, which is aimed principally at secondary PGCE and BAEd students and school- and HEI-based tutors. Each book provides a digest of the central issues around a particular topic or issues, grounded in or supported by examples of good practice, with suggestions for further reading, study and investigation. The books are not intended as 'how to' books, but rather as books which will help students and teachers to explore and understand critical theoretical issues in ways that are challenging, that invite critical reappraisals of taken-for-granted practices and perceptions, and that provide appropriate links between theory and practice. Issues related to equal opportunities and special needs are included in each separate volume . There are boxes of questions, 'think abouts' , further reading, and bulleted summary lists for the reader. This book is written specifically for teachers-in-training which will clarify the 'big picture' of monitoring and assessment and makes the crucial distinctions in this large (and still taken-for-granted) field. The authors have written widely on assessment matters and have also worked in various capacities for the QCA (and its former manifestations). They are also engaged in initial teacher education and so know the level and market extremely well.
