**Bon Ku, Ellen Lupton**

*Graphic Design Thinking* Ellen Lupton, Jennifer Cole Phillips, 2011-07-27 Creativity is more than an inborn talent; it is a hard-earned skill, and like any other skill, it improves with practice. *Graphic Design Thinking: How to Define Problems, Get Ideas, and Create Form* explores a variety of informal techniques ranging from quick, seat-of-the-pants approaches to more formal research methods for stimulating fresh thinking, and ultimately arriving at compelling and viable solutions. In the style with which author Ellen has come to be known hands-on, up-close approach to instructional design writing brainstorming techniques are grouped around the three basic phases of the design process: defining the problem, inventing ideas, and creating form. Creative research methods include focus groups, interviewing, brand mapping, and co-design. Each method is explained with a brief narrative text followed by a variety of visual demonstrations and case studies. Also included are discussions with leading professionals, including Art Chantry, Ivan Chermayeff, Jessica Helfand, Steven Heller, Abott Miller, Christoph Niemann, Paula Scher, and Martin Venezky, about how they get ideas and what they do when the well runs dry. The book is directed at working designers, design students, and anyone who wants to apply inventive thought patterns to everyday creative challenges.

**A Century of Graphic Design** Jeremy Aynsley, 2001 The twentieth century was a landmark era in graphic design, the art that combines words with graphic images on posters, book and magazine covers, record jackets, billboards, and other print advertising and publicity media. This visually magnificent and factually informative volume tells the story of graphic design, then gives separate illustrated thumbnail biographies of more than 100 of the most influential and internationally known designers of the past 100 years. From the century's early decades we find artists' profiles and reproductions from the studios of Peter Behrens, Alexander Rodchenko, the Bauhaus, Laszlo Moholy-Nagy, a sampling of Art Deco, and much more. Examples of Mid-Century Modern include Lester Beall, Yusaku Kamekura, and jazz record covers from various sources. The Pop and Alternative Art eras gave us psychedelic graphics, militant socialist posters from Cuba, and the dramatic typographic designs of Herb Lubalin. Design in the Digital Era has included work by David Carson, Javier Mariscal, Eiko Ishioka, and many others. All illustrations are perfectly reproduced on high quality paper. The text was written by Jeremy Aynsley, an internationally recognized authority in the art of graphic design. Approximately 450 brilliant full-color photos and illustrations.

Health Design Thinking Bon Ku, Ellen Lupton, 2020-03-17 Applying the principles of human-centered design to real-world

health care challenges, from drug packaging to early detection of breast cancer. This book makes a case for applying the principles of design thinking to real-world health care challenges. As health care systems around the globe struggle to expand access, improve outcomes, and control costs, Health Design Thinking offers a human-centered approach for designing health care products and services, with examples and case studies that range from drug packaging and exam rooms to internet-connected devices for early detection of breast cancer. Written by leaders in the field—Bon Ku, a physician and founder of the innovative Health Design Lab at Sidney Kimmel Medical College, and Ellen Lupton, an award-winning graphic designer and curator at Cooper Hewitt Smithsonian Design Museum—the book outlines the fundamentals of design thinking and highlights important products, prototypes, and research in health design. Health design thinking uses play and experimentation rather than a rigid methodology. It draws on interviews, observations, diagrams, storytelling, physical models, and role playing; design teams focus not on technology but on problems faced by patients and clinicians. The book's diverse case studies show health design thinking in action. These include the development of PillPack, which frames prescription drug delivery in terms of user experience design; a credit card-size device that allows patients to generate their own electrocardiograms; and improved emergency room signage. Drawings, photographs, storyboards, and other visualizations accompany the case studies. Copublished with Cooper Hewitt, Smithsonian Design Museum

**The Senses** Ellen Lupton, Andrea Lipps, 2018-07-24 A powerful reminder to anyone who thinks design is primarily a visual pursuit, *The Senses* accompanies a major exhibition at the Cooper-Hewitt Smithsonian Design Museum that explores how space, materials, sound, and light affect the mind and body. Learn how contemporary designers, including Petra Blaisse, Bruce Mau, Malin+Goetz and many others, engage sensory experience. Multisensory design can solve problems and enhance life for everyone, including those with sensory disabilities. Featuring thematic essays on topics ranging from design for the table to tactile graphics, tactile sound, and visualizing the senses, this book is a call to action for multisensory design practice. *The Senses: Design Beyond Vision* is mandatory reading for students and professionals working in diverse fields, including products, interiors, graphics, interaction, sound, animation, and data visualization, or anyone seeking the widest possible understanding of design. The book, designed by David Genco with Ellen Lupton, is edited by Lupton and curator Andrea Lipps. Includes essays by Lupton, Lipps, Christopher Brosius, Hansel Bauman, Karen Kraskow, Binglei Yan, and Simon Kinnear.

**Design is Storytelling** Ellen Lupton, 2017 A playbook for creative thinking, created for contemporary students and practitioners working across the fields of graphic design, product design, service design and user experience. *Design is Storytelling* is a guide to thinking and making created for contemporary students and practitioners working across the fields of graphic design, product design, service design, and user experience. By grounding narrative concepts in fresh, concrete examples and demonstrations, this compelling book provides designers with tools and insights for shaping behaviour and

engaging users. Compact, relevant and richly illustrated, the book is written with a sense of humour and a respect for the reader's time and intelligence. Design is Storytelling unpacks the elements of narrative into a fun and useful toolkit, bringing together principles from literary criticism, narratology, cognitive science, semiotics, phenomenology and critical theory to show how visual communication mobilizes instinctive biological processes as well as social norms and conventions. The book uses 250 illustrations to actively engage readers in the process of looking and understanding. This lively book shows how designers can use the principles of storytelling and visual thinking to create beautiful, surprising and effective outcomes. Although the book is full of practical advice for designers, it will also appeal to people more broadly involved in branding, marketing, business and communication.

*Solving Problems with Design Thinking* Jeanne Liedtka,Andrew King,Kevin Bennett,2013-09-03 Design-oriented firms such as Apple and IDEO have demonstrated how design thinking can affect business results. However, most managers lack a sense of how to use this new approach for issues other than product development and sales growth. Solving Problems with Design Thinking details ten real-world examples of managers who successfully applied design methods at 3M, Toyota, IBM, Intuit, and SAP; entrepreneurial start-ups such as MeYou Health; and government and social sector organizations, including

the City of Dublin and Denmark's The Good Kitchen. Using design skills such as ethnography, visualization, storytelling, and experimentation, these managers produced innovative solutions to such problems as implementing strategy, supporting a sales force, redesigning internal processes, feeding the elderly, and engaging citizens. They elaborate on the challenges they faced and the processes and tools they used, providing a clear path to implementation based on the principles and practices laid out in Jeanne Liedtka and Tim Ogilvie's *Designing for Growth: A Design Thinking Tool Kit for Managers*.
