Greek and Latin Roots Martin Duran, 2020-08-06 Over 60 percent of all English words have Greek or Latin roots. In the vocabulary of the sciences and technology, the figure rises to over 90 percent. About 10 percent of the Latin vocabulary has found its way directly into English without an intermediary (usually French). This handbook is designed to increase and consolidate the English vocabulary of Greco-Latin origin. It is divided into two practically equal sections, which present,

respectively, the vocabulary of Latin origin and that of Greek origin. Each of these sections begins with a list of the main English roots derived from Latin or Greek. These roots, unlike other handbooks, are classified according to the order of Latin or Greek grammar. That is, they are presented by grammatical categories (nouns, adjectives, verbs, etc.). Within each grammatical category, the structure of Latin or Greek grammar is followed: name of the declension, type of verb, etc. Thanks to this, the reader can more easily grasp the similarity between English and Latin or Greek words. After this list of roots, there is a section of prefixes and suffixes of Latin or Greek origin. Affixes are a very important mechanism for building new words. In Latin and Greek, they were very productive, and English has inherited this productivity, which coexists with other mechanisms typical of its Germanic origin. Greco-Latin affixes are still alive and many new words being created use them. Finally, in the section on Greek etymologies, a chapter groups Greek and Latin terminology according to the semantic field. In this way, the reader can observe and practice the areas in which Latin and Greek have been most decisive: medicine, botany, social sciences, etc. In each of these sections, there are review and consolidation exercises. These exercises are intended to be varied and insist on the most important roots that should be thoroughly understood. Not all the words presented throughout the book are equally important. Some belong to the everyday lexicon, while others are only found in very specialized contexts. We have decided to present the maximum number of words, to understand the impact of the Greco-Latin influence, and to facilitate their memorization, by grouping all the words from the same root. The book has an answer key at the end.

Greek and Latin Root Words David S Dye M Ed, 2021-07-04 Objective: The purpose of this book is to help students improve their vocabulary by learning more than fifty Greek and Latin prefixes, suffixes, and root words. Best for Grades 5 - 8. With this knowledge, students will learn to identify these root words and use context clues to identify the meaning of thousands of words that contain these roots. Students will be given a mix of direct instruction learning root words and practical application using the root words. This two-part approach will give the students the best opportunity to make learning and using root words a regular part of their lives. Introduction: Every year I tell my students a story about an experience I had while in college regarding learning the word somnambulism. A newspaper headline read Dodgers Suffer from Somnambulism! Not knowing what the word meant, I began to break the word into parts. I write the parts of the word on the board: Somn is found in insomnia. In means not. Since insomnia means un able to sleep, somn must mean sleep. Next, there is amble which I know means to walk. Finally, there is ism which can refer to a condition of. Put them together, and what do you get? Somn - Sleep / Amble - Walk. Oh, the Dodgers must have been sleepwalking through their game. This book uses a similar process to help students decipher thousands of words that they would normally need to look up in the dictionary. This can only help lead to a much broader vocabulary for students using this book. Unit 1 - Greek and Latin Prefixes and Suffixes The purpose of this section is to show students the difference between prefixes and suffixes. Prefixes change the meaning of words while suffixes change the word's part of speech. Take the word happy. Adding the prefix un- changes the meaning of the word to not happy. Adding the suffix ness, making happiness, keeps the meaning, but changes the word from an adjective to a noun. Knowing this difference is an important step in developing an instinct for using root words on a regular basis. Within this section, students will be given dozens of prefixes and suffixes to learn. They will break words into parts and analyze how the pieces come together. They will practice making educated guesses of definitions to high level vocabulary words and use a dictionary (Internet or hard cover) to confirm the accuracy of their answers. Next, they

will practice seeing these high level words in context, and finally, use these words themselves in their writing. Unit 2 - Greek and Latin Root Words In this section, the students are given a list of twenty-four Greek and Latin root words. Each root word has three English words that use each particular root. The teacher can choose to have the students learn them all at once and test them at the end, or she can assign a few each week and learn them over the course of the year. For each of the sets of root words, the students can use the worksheets to help them practice learning the words. The students will write the words and definitions, then draw a study picture to help them internalize the words. Unit 3 - Greek Root Words (4 Week Unit) Each week, students are given three sets of words. Each set contains a root word and five English words that use those root words. There is also a spelling routine that gives the students activities to practice each day to become familiar with the words. These activities actually take about two weeks to finish if they are done 10 - 15 minutes a day. Therefore, at the end of the first week, the students take a spelling test. Next, the students use the second week to complete vocabulary activities until they are ready for the vocabulary test at the end. You can also choose to give the spelling and vocabulary test together at the end of the second week.
