

Green Books Libs At Palmer College Of Chiropractic

An incisive, witty, and tender debut novel about love and commitment, celebrity and obsession, poetry and reality TV. “This unassuming, sharp novel quietly questions love and the nature of perception in an overconnected world.”—The Seattle Times Reeling from a breakup with his almost fiancée, the narrator of Andrew Palmer’s debut novel returns to his hometown in Iowa to house-sit for a family friend. There, a chance flick of the TV remote and a new correspondence with an old friend plunge him into unlikely twin obsessions: the reality show *The Bachelor* and the Pulitzer Prize–winning poet John Berryman. As his heart begins to mend, his fascination with each deepens. Somewhere along the way, representations of reality become harder and harder to distinguish from real life. Soon he finds himself corresponding with multiple love interests, participating in an ill-considered group outing, and trying to puzzle through the strange turn his life seems to have taken. Intellectually ambitious and keenly observed, *The Bachelor* is also an absorbing coming-of-age tale that tells the story of finding one’s footing in love and art. If salvation can no longer be found in fame, can it still be found in romantic relationships? In an era in which reality TV can make two dozen women fall in love with one man in six weeks, where does entertainment end and reality begin? Why do we, season after season, repeat the same mistakes in love and life?

The multimedia artist, poet and novelist Brion Gysin may be the most influential cultural figure of the twentieth century that most people have never heard of. Gysin (1916–1986) was an English-born, Canadian-raised, naturalized American of Swiss descent, who lived most of his life in Morocco and France. He went everywhere when the going was good. He dabbled with surrealism in Paris in the 1930s, lived in the “interzone” of Tangier in the 1950s and traveled the Algerian Sahara with *Sheltering Sky* author Paul Bowles before moving into the legendary Beat Hotel in Paris. Gysin’s ideas influenced generations of artists, musicians and writers, among them David Bowie, Keith Haring, Patti Smith, Michael Stipe, Genesis P-Orridge, John Giorno and Brian Jones of the Rolling Stones. None was touched more profoundly than William S. Burroughs, who said admiringly of Gysin: “There was something dangerous about what he was doing.” It was Gysin who introduced the Rolling Stones to the exotica of Morocco and took Stones’ guitarist Brian Jones to Jajouka where he recorded the tribal musicians performing the Pipes of Pan. It was Gysin who provided the hashish fudge recipe published in Alice B. Toklas’ cookbook, promising “ecstatic reveries and extensions of one’s personality on several simultaneous planes.” It was Gysin who introduced Burroughs to an automatic writing method called the cut-up, a literary progenitor to sampling. And it was Gysin who developed—with Ian Sommerville, the Dream Machine—a device that allowed people, with the flick of a switch, to access altered states of consciousness without drugs. Working with the authorization of Gysin’s literary executor, William S. Burroughs, John Geiger has produced the first-ever biography of the painter, poet, piper Brion Gysin.

From a Hugo Award-winning author comes the third book in this action-packed sci-fi caper, starring Fergus Ferguson, interstellar repo man and professional finder. Fergus is back on Earth at last, trying to figure out how to live a normal life. However, it seems the universe has other plans for him. When his cousin sends him off to help out a friend, Fergus accidentally stumbles across a piece of an ancient alien artifact that some very powerful people seem to think means the entire solar system is in danger. And since he's the one who found it, they're certain it's also his problem to deal with. With the help of his newfound sister, friends both old and new, and some enemies, too, Fergus needs to find the rest of the artifact and destroy the pieces before anyone can reassemble the original and open a multidimensional door between Earth and a vast, implacable, alien swarm. Problem is, the pieces could be anywhere on Earth, and he's not the only one out searching.

Draws on the latest scientific information to recreate the story of life on Earth, with introductory articles on evolution and an index to the hundreds of species depicted in the illustrations.

This volume presents new research and original synthesis on key aspects of medical instruction, theoretical and practical, from early medieval times into the present century. Academic and practical aspects are equally examined, and balanced attention is given to different sites of instruction, be it the university or the hospital.

Bertha Palmer, one of the richest and most famous socialites in the early 20th century, came to a backwater area of southwest Florida and tried her hand at agriculture and cattle raising. She turned Sarasota the small settlement of Sarasota into a thriving town.

First edition. *Libraries and the Book Trade* is a well-researched collection of scholarly essays on the book trade and its close relationships with the growth of libraries. Eight leading bibliographical scholars examine the unique relationships between booksellers and the growth of libraries from the sixteenth century through the birth of the circulating libraries of the nineteenth century. This is the twentieth title in the distinguished *Publishing Pathways Series*. Co-published by St. Paul's Bibliographies.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

From a Hugo Award-winning author comes the second book in this action-packed sci-fi caper, starring Fergus Ferguson, interstellar repo man and professional finder. As a professional finder, Fergus Ferguson is hired to locate missing objects and steal them back. But it is rarely so simple, especially after his latest job in Cernee. He's been recovering from that experience in the company of friends, the Shipmakers of Pluto, experts at crafting top-of-the-line AI spaceships. The Shipmakers have convinced Fergus to finally deal with unfinished business he's been avoiding for half his life: Earth. Fergus hasn't been back to his homeworld since he was fifteen, when he stole his cousin's motorcycle and ran away. It was his first theft, and nothing he's stolen since has been anywhere near so easy, or weighed so heavily on his conscience. Many years and many jobs later, Fergus reluctantly agrees that now is the time to return the motorcycle and face his family. Unfortunately, someone has gotten to the motorcycle before him. And before he can figure out where it went and why the storage unit that held it is now filled with priceless, stolen art, the Shipyard is attacked. His friends are missing, presumably kidnapped. Accompanied by an untrustworthy detective who suspects Fergus is the art thief and the sole friend who escaped the attack, Fergus must follow the tenuous clues to locate and save his friends. The trail leads them to Enceladus, where Fergus plans to go undercover to the research stations that lie beneath the moon's thick ice sheet deep in a dark, oppressive ocean. But all movement and personnel are watched, and the limited ways through the thick ice of the moon's surface are dangerous and highly monitored. Even if Fergus can manage to find proof that his friends are there and alive, getting out again is going to be a lot more complicated than he bargained for.

From the 2017 John W. Campbell Award Winner for Best Writer, Ada Palmer's *Perhaps the Stars* is the final book of the Hugo Award-shortlisted *Terra Ignota* series. *World Peace* turns into global civil war. In the future, the leaders of Hive nations—nations without fixed location—clandestinely committed nefarious deeds in order to maintain an outward semblance of utopian stability. But the facade could only last so long. The comforts of effortless global travel and worldwide abundance may have tempered humanity's darkest inclinations, but conflict remains deeply rooted in the human psyche. All it needed was a catalyst, in form of special little boy to ignite half a millennium of repressed chaos. Now, war spreads throughout the globe, splintering old alliances and awakening sleeping enmities. All transportation systems are in ruins, causing the tyranny of distance to fracture a long-united Earth and threaten to obliterate everything the Hive system built. With the arch-criminal Mycroft nowhere to be found, his successor, Ninth Anonymous, must not only chronicle the discord of war, but attempt to restore order in a world spiraling closer to irreparable ruin. The fate of a broken society hangs in the balance. Is the key to salvation to remain Earth-bound or, perhaps, to start anew throughout the far reaches of the stars? Revitalize your garden—and go beyond compost—by making your own biologically diverse inoculants and mineral-rich amendments using leaf mold, weeds, eggshells, bones, and other materials available for little or no cost! In *The Regenerative Grower's Guide to Garden Amendments*, experimental gardener and author Nigel Palmer provides practical, detailed instructions that are accessible to every grower who wants to achieve a truly sustainable garden ecosystem—all while enjoying better results at a fraction of the cost of commercial fertilizer products. These recipes go beyond fertilizer replacement, resulting in greater soil biological activity and mineral availability. They also increase pest and disease resistance, yields, and nutrient density. Recipes include: Extracting nutrients from plant residues using simple rainwater techniques Extracting minerals from bones and shells using vinegar Fermenting plant juices and fish Culturing indigenous microorganisms (IMO) Inspired by the work of many innovative traditional agricultural pioneers, especially Cho Ju-Young (founder of the Korean Natural Farming method), *The Regenerative Grower's Guide to Garden Amendments* also includes a primer on plant-soil interaction, instructions for conducting a soil test, and guidance on compost, cover cropping, mulching, measuring the quality of fruits and vegetables using a refractometer, and other aspects of sustainable gardening—making it a must-have resource for any serious grower.

Radio Frequency Identification (RFID) has had a rapid impact on the library world. Its advantage over other technologies used in libraries is usually seen to be its ability to combine the functions of the barcode and the security tag, but with the added advantages of being able to read multiple items seemingly simultaneously without need of line of sight. The customer-friendly self-service that this combination of features makes possible is at the heart of the attraction of RFID for most libraries. This practical and straightforward book is designed to help library managers decide whether RFID has anything to offer them and - if so - how to make the most of the benefits while coping with the challenges inherent in this rapidly developing technology. It also offers many further sources of information to follow up. Applicable to all types of libraries, its contents include: RFID, libraries and the wider world RFID in libraries: the background and the basics RFID, library applications and the library management system standards and interoperability privacy RFID and health and safety RFID and library design building a business case for RFID in libraries, and requesting proposals staffing: savings, redeployment or something

else? buying a system: evaluating the offers installing RFID: project management making the most of RFID: a case study RFID, libraries and the future. Readership: RFID has the potential to revolutionize many aspects of library service delivery. Written by an expert in the field, this book is a very worthwhile investment for all those library professionals considering converting to RFID for their libraries, as well as those who are implementing it already.

As you age, you may find yourself worrying about your memory. Where did I put those car keys? What time was my appointment? What was her name again?
