"The most important and challenging book on Arthurian and Grail tradition for many a long year." - Gareth Knight. The relationship between human and Faery lies at the very core of the Arthurian stories. In this radical re-evaluation of the Grail legends, Wendy Berg brings the ancient mythology of the British Isles into sharp focus centred around the marriage of King Arthur to the Faery Gwenevere and the origin and destiny of the Grail Hallows. Drawing upon numerous Arthurian sources and other related texts from the Book of Genesis to The Lord of the Rings, she explores the magical ritual underpinning of the legends and their connection to the ancient stellar deities of Britain. "When these stories are read with the additional level of understanding that they are for the most part a record of the lives and relationships of Faeries and humans working together about the Round Table, they immediately become not only a great deal more interesting, but also acquire a new and vivid relevance for the present day."

This is the third volume in a new, definitive, six-volume edition of the works of Joseph Stiglitz, one of today's most distinguished and controversial economists. Stiglitz was awarded the Nobel Prize in Economics in 2001 for his work on asymmetric information and is widely acknowledged as one of the pioneers in the field of modern information economics and more generally for his contributions to microeconomics. Volume III contains a selection of Joseph E. Stiglitz's work on microeconomics. It questions well-established tenets, including many that are so fundamental they are almost taken for granted, covering basic concepts of risk and markets; the management of risk; the theory of the firm; the economics of organization; and theory of human behaviour. Stiglitz reflects on his work and the field more generally throughout the volume by including substantial original introductions to the Selected Works, the volume as a whole, and each part within the volume.

This book is dedicated to the man whose life inspired me to tell his story. His name is D. Anthony Venditti, widely known as the Godfather of Stock Car Racing in New England. It is also dedicated to my mother, with her eternal love and devoted support of her beloved Anthony, her family, and racing. She and the Godfather enabled and empowered our family to persevere in the sport. This is to all those with unending convictions in the Godfather and to the Seekonk Fraternity of racing. This book is a pictorial and a closer look at the life of the Godfather. He was the youngest promoter in motor sports in the United States in the 1940s. And as a twenty-five-year-old, he planned, engineered, and built his speedway. He was young and full of ambition. It was his dream, an American dream, to build, open, and operate his speedway at the end of World War II, in 1946. Yet when in his advanced years, he then became known as the oldest living promoter in stock car racing. He consecutively ran his race plant each year, faithfully opening his facility, without fail. He never missed a season under his reign—an unheard-of feat of forty-five years as a stock car racing promoter. Seekonk Speedway continues to run without any ambiguity by the same family. The speedway is proudly still in business all these seventy-three consecutive years of racing in the books. Anthony is celebrated and acclaimed for his pioneering in the American sport of auto racing, awarded RPM's "1978 Promoter of the Year." It was with great adoration of the sports community that he is acknowledged for his forethought and far-reaching ideas of innovation pertaining to mechanical engineering, safety features in facility construction, and administrative procedures. Mr. Venditti is attributed to numerous awards for his devotion for the betterment of the sport of auto racing.
