Paul Hawken

Growing a Business Paul Hawken, 1988-10-15 The companion volume to the public television series explains what it takes to be a successful entrepreneur.

The Ecology of Commerce Paul Hawken, 1995 Paul Hawken believes that the impending ecological catastrophe cannot be prevented by individuals - only big business is powerful and influential enough to reverse the present trend. In this book he sets out to show the need for a new relationship between governments and businesses, believing that their present collusion against the public is undemocratic.

Natural Capitalism Paul Hawken, Amory B. Lovins, L. Hunter Lovins, 1999 The first Industrial Revolution inaugurated 200 years of unparalleled material development for humankind. But the costs and the consequences are now everywhere evermore apparent: the living systems on which we depend are in retreat. Forests, topsoil, grasslands, wetlands, oceans, coral reefs, the atmosphere, aquifers, tundra and biodiversity are limiting factors - the natural capital on which all economic activity depends. And they are all in decline. Add to that a doubling of the world's population and a halving of available per capita resources in the first 50 years of the 21st century and the inevitability of change is clear. This work offers forms of industry and commerce that can not only enhance enormously the wellbeing of the world's growing population, but will reverse the destruction and pollution of nature and restore the natural processes so vital to the future. The book introduces four central and interrelated strategies necessary to perpetuate abundance, avert scarcity and deliver a solid basis for social development. The first of these is: Radical Resource Productivity - getting two, four, or even ten times as much from the same quantities of materials and energy. A revolution in efficiency that provides the most immediate opportunities for businesses to grow and prosper. The second strategy is: Ecological Redesign - eliminating the very idea of waste by designing industrial systems on the model of ecological ones. Instead, for example, of digging minerals out of the ground only to return them to landfill at the end of the product cycle, industrial processes will be designed to reuse materials constantly, in closed circles. The third strategy involves creating: A Service and Flow Economy - shifting from an economy of goods and purchases to one of service and flow, and redefining the relationship between producer and consumer. Affluence will no longer be measured by acquisition and quantity, but by the continuous receipt of quality, utility and performance. The final strategy is: Investing in Natural capital - reversing the worldwide ecosystem destruction to restore and expand the stocks of natural

capital. If industrial systems are to supply an increasing flow of services in the future, the vital flow of services from living systems will have to be maintained or increased as well.

Blessed Unrest Paul Hawken, 2007-05-10 The New York Times bestselling examination of the worldwide movement for social and environmental change Paul Hawken has spent more than a decade researching organizations dedicated to restoring the environment and fostering social justice. From billion-dollar nonprofits to single-person dot.causes, these groups collectively comprise the largest movement on earth, a movement that has no name, leader, or location and that has gone largely ignored by politicians and the media. Blessed Unrest explores the diversity of the movement, its brilliant ideas, innovative strategies, and centuries of hidden history. A culmination of Hawken's many years of leadership in the environmental and social justice fields, it will inspire all who despair of the world's fate, and its conclusions will surprise even those within the movement itself.

Drawdown Paul Hawken, 2018-02-22 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Getting to Scale (EasyRead Large Bold Edition) Jill Bamburg, 2006 Ben & Jerry's. Stonyfield Farm. The Body Shop. Tom's of Maine. All leaders in the socially responsible business movement-and all eventually sold to mega-corporations. Do values-driven businesses have to choose between staying small, selling off, or selling out? Jill Bamburg says no. Based on intensive interviews with more than 30 growth-oriented, mission-driven entrepreneurs, including American Apparel, Give Something Back, Wild Planet Toys, Organic Valley Family of Farms, and Village Real Estate. Her book explodes the myths of scale from both ends of the spectrum. She debunks both the limiting small is beautiful approach as well as the you have to sell out to grow mandate.

(Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics.
