DIV God uses manpower. We need God's power. God works when we work. Millions of people all over the world have been introduced to Jesus through the ministry of Reinhard Bonnke. In Taking Action he describes how we too can be an extension of God's love to the world by partnering with the Holy Spirit. With a firsthand account of the mighty manifestations of God at work today, Bonnke takes a careful look at what Scripture teaches about the anointing and gifts of the Holy Spirit in general and then explains each of the specific gifts listed by the apostle Paul. Jesus lived, worked, and prayed in the power of the Holy Spirit. In the Gospel of John He says, "He who believes in Me, the works that I do he will do also." With this same anointing, we can live this way as well. /div

Salvatore, the shadow legacy of Erevis Cale lives on even as his old foe Mephistopheles seeks to stamp it out at any cost. Cale's son Vasen—unmoored in time by the god Mask—has thus far been shielded from the archdevil's dark schemes, alone among the servants of the Lord of Light who have raised him since birth. He knows the day will come when he must assume his role in the divine drama unfolding across Faerûn. But Vasen knows not what that role should be . . . or whether he is ready to take it on. He only knows what his father tells him in dreams—that he must not fail. Enter Drasek Riven, a former compatriot of Erevis Cale, now near divine and haunted by dreams of his own—he too knows the time to act is near. Shar, the great goddess of darkness, looks to cast her shadow on the world forever. Riven has glimpsed the cycle of night she hopes to complete, and he knows she must be stopped. At the crossroads of divine intrigue and mortal destiny, unlikely heroes unite to thwart the powers of shadow and hell, and the *sundering* of worlds is set on its course.

Imagine a sustainable world, run on clean and renewable energies that are less aggressive to the environment. Now imagine humanity under the impact of these changes. This is the premise Brazilian editor Gerson Lodi-Ribeiro proposed, and these authors took the challenge to envision hopeful futures and alternate histories. The stories in this anthology explore terrorism against green corporations, large space ships propelled by the pressure of solar radiation, the advent of photosynthetic humans, and how different society might be if we had switched to renewable energies much earlier in history. Originally published in Brazil and translated for the first time from the Portuguese by Fábio Fernandes, this anthology of optimistic science fiction features nine authors from Brazil and Portugal including Carlos Orsi, Telmo Marçal, Romeu Martins, Antonio Luiz M. Costa, Gabriel Cantareira, Daniel I. Dutra, André S. Silva, Roberta Spindler, and Gerson Lodi-Ribeiro.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

The classic manifesto of the liberated woman, this book explores every facet of a woman's life.

Our competitive, service-oriented societies are taking a toll on the late-modern individual. Rather than improving life, multitasking, "user-friendly" technology, and the culture of convenience are producing disorders that range from depression to attention deficit disorder to borderline personality disorder. Byung-Chul Han interprets the spreading malaise as an inability to manage negative experiences in an age characterized by excessive positivity and the universal availability of people and goods. Stress and exhaustion are not just personal experiences, but social and historical phenomena as well. Denouncing a world in which every against-the-grain response can lead to further disempowerment, he draws on literature, philosophy, and the social and natural sciences to explore the stakes of sacrificing intermittent intellectual reflection for constant neural connection.

In his first book, Talk This Way, he shares his passion for public speaking and offers a master-class in how to do it - not just how to give a great TED talk, but how to stand up and speak persuasively in front of any size of audience, whether that is a school classroom, making a video blog, in a business meeting or at a conference. The book brings together his experience of over two decades as the curator of TED, in which time he has listened to over one thousand stage talks, with advice from 30 of his all-time favourite TED speakers.
