CENELEC EN 50128 and IEC 62279 standards are applicable to the performance of software in the railway sector. The 2011 version of the 50128 standard firms up the techniques and methods to be implemented. This is a guide to its implementation, in order to understand the foundations of the standard and how it impacts on the activities to be undertaken, helping towards better a preparation for the independent evaluation phase, which is mandatory.

The first official book released by the Federal Aviation Administration (FAA) for the sole purpose of glider and sailplane instruction and knowledge, this book answers all the questions related to glider flying and soaring found in the FAA's required knowledge exams for pilots. Included is detailed coverage on decision making, aerodynamics, aircraft performance, soaring weather, flight instruments, medical factors, communications, and regulations, all in relation to the world of glider flying. Through full-colour graphics and detailed descriptions, pilots are better able to comprehend and visualise the manoeuvres within the book.

737NG Training Syllabus is the descriptive title for this beautifully illustrated 383 plus page document. The highly detailed, full color book is virtually crammed with original graphics and thousands of words of descriptive text that will provide a complete training syllabus for persons wishing to learn to operate the 737NG jet airliner. While intended specifically for the Flight Simulation market, professional airline pilots will find the information useful and informative. This is a guide intended to teach "simmers" how to fly the jet the way "the Pros do".

Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. "Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by Air Traffic Control in modern airline operations. An absorbing read for that next long-haul flight."

The PilotsReference Guide© is a comprehensive summarization of many abstract topics for pilots, engineers and aviation enthusiasts. It can be effectively used to prepare for ATPL exams and airline interviews. The PilotsReference Guide© closes the knowledge gap between your airline's operating manual and the airplane's operating manual all in one handy volume. It fits in your flight bag easily and you can refresh your valuable ATPL knowledge while away from home. It explains one main subject area on one spread double page with the text on the left and all relevant graphics on the right side. The table of contents enables a quick start to the desired subject areas or specific topics.

This book presents an overall picture of both B2B and B2C marketing strategies, concepts and tools, in the aeronautics sector. This is a significant update to an earlier book successfully published in the nineties which was released in Europe, China, and the USA. It addresses the most recent trends such as Social Marketing and the internet, Customer Orientation, Project Marketing and Concurrent Engineering, Cooperation, and Extended Enterprise. Aerospace Marketing Management is the first marketing handbook richly illustrated with executive and expert inputs as well as examples from parts suppliers, aircraft builders, airlines, helicopter manufacturers, aeronautics service providers, airports, defence and military companies, and industrial integrators (tier-1, tier-2). This book is designed as a ready reference for professionals and graduates from both Engineering and Business Schools.

This iPad interactive book is an indispensable tool for pilots seeking the Airbus A320 type rating. This study guide offers an in-depth systems knowledge with pictures, videos and schematics not found in other publications. It is packed with detailed and useful information to prepare any candidate for command and responsibility of the A320 equipped with IAE or CFM engines.

This is an important thorough book. Guy Boy has presented a masterful review and synthesis of the many factors that affect how people and technology interact in the performance of a task, an understanding that is essential for those who design technology. I strongly recommend it for both students and professionals. -Donald A. Norman, Hewlett-Packard; author of *The Invisible Computer* If it is, as I have claimed that AI systems of the future will be less about artificial intelligence and more about augmented intelligence, Dr. Boy has produced a veritable handbook on the design of these cognitive prostheses. So sit down, relax, put on your ocular prosthesis and enjoy the read. -Ken Ford, Associate Director, NASA Ames Research Center This book is a significant first step towards making human-centered design a reality. It provides orientation and guidance for everyone who is concerned with developing systems that integrate people and computers in a context that provides functionality, reliability, flexibility, and responsibility. -Terry Winograd, Professor, Stanford University

From the acclaimed author of *Enduring Patagonia* comes a dazzling tale of aerial adventure set against the roiling backdrop of war in Asia. The incredible real-life saga of the flying band of brothers who opened the skies over China in the years leading up to World War II—and boldly safeguarded them during that conflict—China's Wings is one of the most exhilarating untold chapters in the annals of flight. At the center of the maelstrom is the book's courtly, laconic protagonist, American aviation executive William Langhorne Bond. In search of adventure, he arrives in Nationalist China in 1931, charged with turning around the turbulent nation's flagging airline business, the China National Aviation Corporation (CNAC). The mission will take him to the wild and lawless frontiers of commercial aviation: into cockpits with daredevil pilots flying—sometimes literally—on a wing and a prayer; into the dangerous maze of Chinese politics, where scheming warlords and volatile military officers jockey for advantage; and into the boardrooms, backrooms, and corridors of power inhabited by such outsized figures as Generalissimo and Madame Chiang Kai-shek; President Franklin Delano Roosevelt; foreign minister T. V. Soong; Generals Arnold, Stilwell, and Marshall; and legendary Pan American Airways founder Juan Trippe. With the outbreak of full-scale war in 1941, Bond and CNAC are transformed from uneasy spectators to active participants in the struggle against Axis imperialism. Drawing on meticulous research, primary sources, and extensive personal interviews with participants, Gregory Crouch offers harrowing accounts of brutal bombing runs and heroic evacuations, as the fight to keep one airline flying becomes part of the larger struggle for China's survival. He plunges us into a world of perilous night flights, emergency water landings, and the constant threat of predatory Japanese warplanes. When Japanese forces capture Burma and blockade China's only overland supply route, Bond and his pilots must battle shortages of airplanes, personnel, and spare parts to airlift supplies over an untried five-hundred-mile-long aerial gauntlet high above the Himalayas—the infamous "Hump"—pioneering one of the most celebrated endeavors in aviation history. A hero's-eye view of history in the grand tradition of Lynne Olson's *Citizens of London*, *China's Wings* takes readers on a mesmerizing journey

to a time and place that reshaped the modern world.

This unique, fully interactive work book will arm you with all the necessary skills to succeed at your all important job interview. This work book from Flightdeck Consulting covers every aspect of the modern airline pilot interview. From a phone interview through to both behavioral and technical questions this book will guide and prepare you for your all important airline interview. The structure and delivery of your answers is essential to portray a confident and competent team member in your interview. This work booklet will guide you on how to structure your answers and deliver them in a clear, concise and professional manner. The authors of this book have a combined 28 years of experience flying the A330, A340, B777, B747-400 and E-Jets. Their company, Flightdeck Consulting has helped hundreds of pilots around the globe achieve their dream of flying for the airlines. They have combined their knowledge and experience of airline recruitment to produce this essential book for all aspiring airline pilots.

B. Ziegler, qui a été le premier administrateur-gérant d'Airbus Industrie en 1970, se souvient des pionniers de cet ambitieux programme auquel il a appartenu. De 1972 à 1997, il restitue les anecdotes des aviateurs sur le terrain de Blagnac, qui ont travaillé avec acharnement pour faire aboutir cette aventure hors du commun.

Qu'est-ce que la confiance ? La confiance est-elle source de vulnérabilités ? Est-elle nécessaire en matière d'éducation ? Peut-on parler de culture(s) de la confiance ? Le droit permet-il d'assurer la confiance ? Telles sont les principales questions abordées au sein de cet ouvrage interdisciplinaire qui offre une réflexion approfondie sur la thématique de la confiance. Cet ouvrage passionnant permet de mieux cerner cette notion polysémique grâce à la qualité des trente-cinq auteurs réunis.

Since its first flight on 15 December 2009, the Boeing 787 'Dreamliner' has been the most sophisticated airliner in the world. It uses many advanced new technologies to offer unprecedented levels of performance with minimal impact on the environment. Flying the Boeing 787 gives a pilot's eye view of what it is like to fly this remarkable machine. It takes the reader on a trip from Tokyo to Los Angeles as the flight crew see it, from pre-flight planning, through all the phases of the flight to shut-down at the parking stand many thousands of miles from the departure point. Lavishly illustrated with specially taken photographs of the B787's controls and instruments, this book will be of interest not just to commercial pilots, but to all aviation enthusiasts: it gives an insight into a world normally hidden for the flying public, at the technical and operational cutting edge of commercial flying. Gives a pilot's eye view of flying this remarkable machine - the Boeing 787 'Dreamliner'. Also an insight into a world normally hidden from the flying public, at the technical and operational cutting edge of commercial flying. Lavishly illustrated with 176 specially-taken colour photographs of the B787's controls and instruments.

This book examines the interrelationship between workplace studies and new technology.

Le bien-être au travail ne se décrète pas. Il se développe à l'aide de pratiques concrètes destinées à renforcer l'estime de soi. Fruit de la collaboration d'un médecin et d'un manager, ce guide pratique vous permettra de redevenir acteur de votre vie et de trouver par vous-même la meilleure solution aux difficultés que vous rencontrez. Inspirés par les neurosciences, les outils et techniques proposés sont adaptés à chaque problème et à chaque pathologie. Ils sont étoffés d'exercices pratiques qui vous aideront à mieux comprendre votre mode de fonctionnement, à corriger vos pensées négatives ou interprétations erronées et à retrouver rapidement votre autonomie. Un programme complet pour : Reconnaître ses émotions et les utiliser comme des alliées Se libérer du stress et le rendre motivant Remplacer ses pensées automatiques par des pensées positives Développer les bons réflexes pour bien communiquer S'entraîner au lâcher prise et retrouver la sérénité

Get in and fasten your seatbelt. Ready for take-off! Have you ever asked yourself why airplane windows have a small hole? Why your digestive system makes itself known with particular vigor high up in the air? If turbulence is actually as dangerous as it feels? Wouldn't it be great to have these questions answered by someone who actually sits up front in the cockpit? Impossible? Not anymore! Experienced Pilot Hans-Georg Rabacher takes you on board with him and provides exciting insights into the world of flying. The various topics explained in an easy-to-understand manner are ideal for all those interested in aviation. No matter whether you have never set foot in an airplane or fly regularly - many interesting details are waiting to be discovered!

An examination of why paper continues to fill our offices and a proposal for better coordination of the paper and digital worlds. Over the past thirty years, many people have proclaimed the imminent arrival of the paperless office. Yet even the World Wide Web, which allows almost any computer to read and display another computer's documents, has increased the amount of printing done. The use of e-mail in an organization causes an average 40 percent increase in paper consumption. In *The Myth of the Paperless Office*, Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and the reasons they do it the way they do. Using the tools of ethnography and cognitive psychology, they look at paper use from the level of the individual up to that of organizational culture. Central to Sellen and Harper's investigation is the concept of "affordances"—the activities that an object allows, or affords. The physical properties of paper (its being thin, light, porous, opaque, and flexible) afford the human actions of grasping, carrying, folding, writing, and so on. The concept of affordance allows them to compare the affordances of paper with those of existing digital devices. They can then ask what kinds of devices or systems would make new kinds of activities possible or better support current activities. The authors argue that paper will continue to play an important role in office life. Rather than pursue the ideal of the paperless office, we should work toward a future in which paper and electronic document tools work in concert and organizational processes make optimal use of both.

Since its first flight on 27 April 2005, the Airbus A380 has been the largest passenger airliner in the world. Instantly recognizable with its full-length upper deck, it represents the pinnacle of modern airliner design. Flying the A380 gives a pilot's eye view of what it is like to fly this mighty machine. It takes the reader on a trip from London to Dubai as the flight crew see it, from pre-flight planning, through all the phases of the flight to shut-down at the parking stand many thousands of miles from the departure point.

Guide du pilote A320 Le guide du bien-être au travail Retrouver l'estime de soi - Ne plus culpabiliser - Se libérer du stress - Dire non aux pensées négatives Editions Eyrolles

Nicolas Tenoux, born in 1983 in Paris, has a triple training. He is airline pilot, holds an MSc in Aviation and Certificates in Management. Philanthropist through his community life activities, awarded with the Civic Star (Étoile Civique), he shares with us his daily life as a pilot and his advice on how to enjoy the crew life and how to best combine it with your personal life. This book follows the author from his Airline pilot training at the CAE Sabena Flight Academy to his position as First Officer on Airbus A320. He gives us his analysis on the aviation trainings and reveals little-known aspects of the air crew profession. Some secrets are also divulged... From Dubai to Bucharest, via Brussels, London, Paris and other major cities, this book is both a practical guide of the pilot job and a sharing of the beauty of mankind's oldest dream: flying. It is aimed at future pilots who will find a guide for their studies, for pilots currently in training in order to have further knowledge and for all of those who are passionate about the magic of flying. The preface is written by Fabrice Bardèche, IONIS Education Group VP (biggest private higher education group in France), IPSA (Aeronautical and Space engineering College) VP.

Welcome to the most complete manual about the MCDU operations based on the FMS system of the great A320. This manual describes all functions of the MCDU (Multi-Function Control and Display Unit) for Airbus A320 including definitions, normal operations and abnormal operations in real flights. Learn all about each part of the MCDU, each key, each function and every detail you need as a pilot. After learning the all theory concepts, you will learn to operate the MCDU in different flights, including domestic flights, international flight and abnormal flights with emergencies. At the end of this book, you will be ready for operating the MCDU like a professional pilot.

In this manual, you as a pilot, will learn about main flight concepts and how the A320 works during normal and abnormal operations. This is not a technical manual about systems, it's a manual about of flight philosophy. This manual is based on the original Airbus manual called "The Flight Crew Training Manual" which is published as a supplement to the Flight Crew Operating Manual (FCOM) and is designed to provide pilots with practical information on how to operate the Airbus aircraft. It should be read just like a supplement and not for real flight. In this case refer to the original FCOM from Airbus. Let's start to fly the amazing A320 with our collection of books and remember, it's not a technical manual so enjoy it!

Nicolas Tenoux, né en 1983 à Paris, possède une triple formation. Il est Pilote de ligne, Ingénieur en aéronautique (diplômé de l'IPSA et de l'ÉNAC) et titulaire de certificats en management. Philanthrope à travers ses activités associatives, décoré de l'Étoile Civique, il nous fait partager son quotidien de Pilote et ses conseils pour mieux vivre le métier de Navigant et le concilier avec sa vie personnelle. Cet ouvrage permet de suivre l'auteur depuis sa formation de Pilote de ligne à la CAE Sabena Flight Academy à son poste de Copilote sur Airbus A320. Il nous livre son analyse sur les formations des métiers de l'aérien et dévoile des facettes méconnues du métier de Personnel Navigant Technique (PNT). Quelques secrets sont également révélés... De Dubai à Bucarest, en passant par Bruxelles, Londres, Paris, etc ce livre est à la fois un guide pratique sur le métier de Navigant et un partage sur la beauté du plus vieux rêve de l'Homme : voler. Il s'adresse aux futurs Pilotes qui trouveront un guide pour leurs études, aux aspirants Pilotes pour un complément de formation et à tous ceux qui sont passionnés par la magie du vol. La préface est rédigée par Fabrice Bardèche, Vice-Président du Groupe IONIS (1er groupe de l'enseignement supérieur privé en France), Vice-Président de l'IPSA, école d'ingénieurs de l'air et de l'espace. Le livre broché est disponible en format A4, faisant référence à un « livre de bord » d'Aviateur.

If you are either an Airbus-driver or a serious flight simmer, this collection of information is something that should pique your interest. Learning to understand and operate one of the world's most complex machines is a tall request from a simple book like this ... and Captain Mike Ray is up to the task. His treatment of the airplane systems and operational techniques is written in an interesting and entertaining way ... and makes learning the difficult and complex ... well, almost easy. This over 400 page document is lavishly illustrated in full color to take advantage of the increased learning potential in the use of color. There can be no doubt that the Airbus A320 is a color driven systems airplane and this book attempts to take full advantage of the use of color in describing and illustrating the operations of the airplane systems and controls. Whatever price penalty is incurred in the purchasing of this color volume is well worth the investment in increased learning potential.

À Noël dernier, j'ai feuilleté le catalogue Jouets d'un grand magasin. Sur fond bleu : des autos, des motos et des bateaux. Sur fond rose : des poupées qui marchent et parlent, dix Barbie princesse et une Barbie fait le ménage. Materner c'est très bien, faire le ménage c'est nécessaire, et s'habiller comme une princesse peut être agréable, mais ce ne sont pas les seules façons, pour une fille, de gagner sa vie. Il y a beaucoup d'autres métiers, bien mieux payés. Ce « Guide des métiers » vous fera découvrir plus de cinquante professions, depuis Aventurière jusqu'à Physicienne en passant par Agent secret, Chef d'orchestre, Femme d'affaires, Informaticienne ou Surfeuse. Chaque fiche-métier offre deux portraits : celui d'une pionnière et celui d'une femme d'aujourd'hui. Des indications pratiques comme « études conseillées », « salaire en début de carrière » ou « espérance de vie » accompagnent le texte. Décalé et enthousiasmant. À mettre entre toutes les mains.
