An excellent resource for social studies teachers, this book will help them learn about and reflect on their responsibilities in our society. It focuses on classroom-based experiences and real-world contexts. The teaching methods discussed are also closely associated to social studies subject matter so they can be integrated into the actual classroom. Each chapter also examines how social studies is situated within the larger elementary curriculum to demonstrate the interdisciplinary nature of the instruction.

Aligned with NCTM standards and focal points, this resource offers ready-to-use lessons that include brain-compatible math activities, step-by-step instructions for the teacher, and all the necessary reproducibles.

For twenty years, Teaching for Diversity and Social Justice has been the definitive sourcebook of theoretical foundations, pedagogical and design frameworks, and curricular models for social justice teaching practice.

Thoroughly revised and updated, this third edition continues in the tradition of its predecessors to cover the most relevant issues and controversies in social justice education in a practical, hands-on format. Filled with ready-to-apply activities and discussion questions, this book provides teachers and facilitators with an accessible pedagogical approach to issues of oppression in classrooms. The revised edition also focuses on providing students the tools needed to apply their learning about these issues. Features new to this edition include: A new bridging chapter focusing on the core concepts that need to be included in all SJE practice and illustrating ways of "getting started" teaching foundational core concepts and processes. A new chapter addressing the possibilities for adapting social justice education to online and blended courses. Expanded overview sections that highlight the historical contexts and legacies of oppression, opportunities for action and change, and the intersections among forms of oppression. Added coverage of key topics for teaching social justice issues, such as establishing a positive classroom climate, institutional and social manifestations of oppression, the global implications of contemporary SJE work, and action steps for addressing injustice. New and revised material for each of the core chapters in the book complemented by fully-developed online teaching designs, including over 150 downloadables, activities, and handouts on the book's Companion Website

Business process modelling is referred to as a complex, time consuming, and error prone task. The correction and improvement of badly designed process models becomes increasingly expensive in the later phases of the process management life cycle. This thesis develops the principles of guided process modelling and provides a contribution towards simplifying process modelling activities. The general research question this thesis answers is what are the difficulties in the usage of process modelling tools and which methods, techniques, and tools can guide users in modelling processes to target the existing problems. The question is addressed by following a research methodology of design sciences. Amongst others, it includes a detailed analysis of the research problem, a definition of the objective, the design and development of solutions, and an evaluation of the developed concepts. In summary, the thesis presents innovative concepts to support modellers and provides a step towards end-user enablement in process modelling.
