In this autobiography, also titled The Story of My Experiments with Truth, Mohandas K. Gandhi recounts his life from childhood up until 1921, noting that "my life from this point onward has been so public that there is hardly anything about it that people do not know." HarperCollins chose this work as one of the "100 Most Important Spiritual Books of the 20th Century." The pursuit of truth was a guiding principle for Gandhi. He states that it "is not my purpose to attempt a real autobiography. I simply want to tell the story of my numerous experiments with truth, and as my life consists of nothing but those experiments, it is true that the story will take the shape of an autobiography." He also notes that this "will of course include experiments with non-violence, celibacy and other principles of conduct believed to be distinct from truth." In 1996 the Federal Accounting Standards Advisory Board (FASAB) 1 enacted Standard Number 6, Accounting for Property, Plant, and Equipment (PP&E), the first government-wide initiative requiring federal agencies to report dollar amounts of deferred maintenance annually. The FASAB has identified four overall objectives in federal financial reporting: budgetary integrity, operating performance, stewardship, and systems and control. FASAB Standard Number 6, as amended, focuses on operating performance and stewardship. The FFC Standing Committee on Operations and Maintenance has prepared this report to identify potential issues that should be considered in any future amendments to the standard and to suggest approaches for resolving them. The committee's intent is to assist the CFO Council, federal agencies, the FASAB, and others as they consider how best to meet the objectives of federal financial reporting for facilities.

All of us love to spend. But before we can do that, we have to have earned or saved some money. Only sovereigns don't have to: they can print money, or borrow; in our country, where they own banks, they can use our deposits to lend and splurge for goals

that may not always be economic in nature. Many rulers have succumbed to the temptation, with dire results - inflation, debased currency, payments crises, bankrupt banks, economic stagnation, loss of public confidence. After centuries of ruinous experiences, some governments learnt, others haven't, to control themselves, create self-governing Central banks and let them manage money and regulate banks. Sometime in 2015, news of unsustainable bad debts (non-performing assets or NPAs) in the Indian banking sector started to first trickle out, and then became a flood. In the forefront were some of India's largest government banks, and a series of tycoons who were running their empires on unpaid debts. The banks' problems landed on the table of Ujjit Patel when he became Governor of Reserve Bank of India in September 2016. Based on thirty years of macroeconomic experience, he worked out the '9R' strategy which would save our savings, rescue our banks and protect them from unscrupulous racketeers. In this book, he explains the problem and how it blew up; and how he would have resolved it if he had not been prevented.
