The "Apollo" of Aeronautics NASA's Aircraft Energy Efficiency Program, 1973-1987 U. S. National Aeronautics & Space Administration

The book covers the Aircraft Energy Efficiency (ACEE), consisting of six aeronautical projects born out of the energy crisis of the 1970s and divided between the Lewis and Langley Research Centers in Ohio and Virginia.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

A Dictionary of Hawaiian Legal Land-Terms is the first reference book of its kind to compile, organize, and explain critical information needed for the accurate translation and interpretation of nineteenth-century Hawaiian land-conveyance documents. Neither life-long residents nor recent newcomers should minimize the influence of Hawaii's unique history on the developments taking place in the state today. Yet for decades the study and translation of century-old documents - Royal Patents, Land Commission Awards, and deeds, to name a few - have been hampered by the lack of a comprehensive research tool. Now, in a single volume, readers have an overview of commonly used words and

phrases, survey practices, and documents that were recorded in Hawaiian before the turn of the century. The book also includes Hawaii's appellate cases that have defined such terms. With the publication of *A Dictionary of Hawaiian Legal Land-Terms*, both professionals and non-professionals, Hawaiians and non-Hawaiians, have gained a valuable key to unlocking and understanding the past.

Apply Different Architectures to Your Codebase!

Advanced iOS App Architecture guides you through building one real-world app written in different architectures to give you hands-on and practical experience working in different architectures. This book will also guide you through the theory you need to gain a solid foundation of architecture concepts so that you can make your own informed decisions on how to use them in your codebase. *Who This Book Is For* This book is for intermediate iOS developers who already know the basics of iOS and are looking to build apps using defined architectures, making apps cleaner and easier to maintain. *Topics Covered in Advanced iOS App Architecture* **Navigating Architecture Topics:** Learn the theory behind various architectures to help inform which works best for you in different situations you may face. **Managing Dependencies:** Learn how to manage dependencies both internally and externally within your app. **MVVM Architecture:** Explore the history of the MVVM architecture and begin building KOOBER - the book's project app - using MVVM principles. **Redux Architecture:** Explore the history of the Redux architecture and continue building KOOBER using

Redux principles. Elements Architecture: Explore the history of the Elements architecture and continue building KOOBER using Elements principles. After reading this book, you'll have the knowledge to decide which types of architecture components suit your apps and you'll have a deep understanding of the covered architectures. About the iOS Architecture Team The architecture team is a group of seasoned developers who work for large multi-national companies who deal with large and diverse code bases on a daily basis. The knowledge procured over years of development is now being transferred to you through book. We hope you enjoy the book and, hopefully, you'll apply some of the architectures you've learned to your own apps!

This volume book contains a collection of philosophical essays written by Herbert Spencer. The essays contained within this book were originally published in the 'Westminster Review', the 'North British Review', and the 'British Quarterly Review'. They include: "Educational: Intellectual, Moral, and Physical", "What Knowledge is of Most Worthy", "Intellectual Education", "Moral Education", "Physical Education", "Progress: It's Law and Cause", "On Manners and Fashion", and more. This fantastic collection is highly recommended for those with a keen interest in nineteenth century philosophy, and is not to be missed by fans and collectors of Spencer's work. Herbert Spencer (1820 - 1903) was an esteemed English philosopher, anthropologist, biologist, and sociologist. Many

vintage texts such as this are increasingly scarce and expensive, and it is with this in mind that we are republishing this book now, in an affordable, high-quality, modern edition. It comes complete with a specially commissioned biography of the author.

S. 220-236: Glossary

The inspiring life-story of from the bestselling author of *Mindfulness in Plain English*—updated and expanded in honor of his 90th birthday. Bhante Gunaratana—Bhante G., as he is affectionately called—has long been among the most beloved Buddhist teachers in the West. Ordained at twelve, he would eventually become the first Buddhist chaplain at an American university, the founder of a retreat center and monastery, and a bestselling author. Here, Bhante G. lays bare the often-surprising ups and downs of his more than ninety years, from his boyhood in Sri Lanka to his decades of sharing the insights of the Buddha, telling his story with the "plain-English" good-humored approach for which he is so renowned. This expanded anniversary edition includes four new chapters in which Bhante reflects on the impact of the tsunami that struck his homeland in 2004 and his subsequent appearance on *Larry King Live*, his brief experiment in ordaining nuns at his monastery, as well intimate reflections on the loss of family members, and his own aging and infirmity—providing a model an inspiring model to us all of gracious equanimity.

The result is a highly readable and accessible account of Hawaiian history from a language-centered point of view that will prove indispensable for Hawaiian language scholars and students and appeal to the growing number of Hawaiians who are reclaiming their language.

The Glossary for Transport Statistics was published for the first time in 1994 with the purpose of assisting member countries during the collection of data on transport using the Common Questionnaire developed by the United Nations Economic ...

New Threats to Freedom In the twentieth century, free people faced a number of mortal threats, ranging from despotism, fascism, and communism to the looming menace of global terrorism. While the struggle against some of these overt dangers continues, some insidious new threats seem to have slipped past our intellectual defenses. These often unchallenged threats are quietly eroding our hard-won freedoms and, in some cases, are widely accepted as beneficial. In *New Threats to Freedom*, editor and author Adam Bellow has assembled an all-star lineup of innovative thinkers to challenge these insidious new threats. Some leap into already raging debates on issues such as Sharia law in the West, the rise of transnationalism, and the regulatory state. Others turn their attention to less obvious threats, such as the dogma of fairness, the failed promises of the blogosphere, and the triumph of behavioral psychology. These threats are very real and very urgent, yet this collection avoids projecting an air of doom and gloom. Rather, it provides a blueprint for intellectual resistance so that modern defenders of liberty may better understand their enemies, more effectively fight to preserve the meaning of freedom,

and more surely carry its light to a new generation. What are the new threats to freedom? when has authority not claimed, when imposing trammels and curbs on liberty, that it does so for a wider good and a greater happiness?” —Christopher Hitchens “The regulatory state amounts to a regressive tax that penalizes small independent producers and protects the status quo.” —Max Borders “Europe tends to favor stability over democracy, America democracy over stability.” —Daniel Hannan “The value of free expression is perceived to be at odds with goals that were considered ‘more important,’ like inclusiveness, diversity, nondiscrimination, and tolerance.” —Greg Lukianoff “The masses cannot ultimately be free: only the individual can be.” —Robert D. Kaplan “That old bugbear of postwar sociology—the mob-self—is now a reality. In a participatory/popularity culture, the freedom to think and act for ourselves becomes harder and harder to achieve.” —Lee Siegel “As traditional marriage declines, the ranks of single women are growing, and increasingly these women are substituting the security of a husband with the security of the state.” —Jessica Gavora “Ending the freedom to fail is a mean-spirited attack on the freedom to succeed.” —Michael Goodwin “The only solution to the new threats to American press freedom lies in organized resistance.” —Katherine Mangu-Ward “The new behaviorism isn’t interested in protecting people’s freedom to choose; on the contrary, its core principle is the idea that only by allowing an expert elite to limit choice can individuals learn to break their bad habits.” —Christine Rosen “There’s a world of Travis Bickles out there, and they’re not driving cabs. They’re reading blogs.” —Ron Rosenbaum “The first amendment ensures not that speech will be fair, but that it will be free. It cannot be both.” —David Mamet Join the conversation about these issues at www.newthreatstofreedom.com

Since the first volume of this work came out in Germany in

1924, this book, together with its second volume, has remained standard in the field. Courant and Hilbert's treatment restores the historically deep connections between physical intuition and mathematical development, providing the reader with a unified approach to mathematical physics. The present volume represents Richard Courant's second and final revision of 1953.

The original 'Black Caesar' was a legendary African pirate who made his fortune by repeatedly raiding cargo ships in the area around the Florida Keys. In this imaginative novel from popular American author Albert Payson Terhune, the fearsome pirate's descendents are determined to find his buried loot -- and to run off any interlopers who might be after the same prize.

This book is the story of Sam McPherson's rise in the world of business and search for emotional enlightenment in later life. The author is strongly coherent in the fact that a man needs to find success that will satisfy his ego regardless of the effect that it can have on his child. Windy goes about his business but the inferiority that accompanies his life gives his son the illusion that life offers little hope. Sherwood Anderson (1876 – 1941) was an American novelist and short story writer, known for subjective and self-revealing works. Anderson published several short story collections, novels, memoirs, books of essays, and a book of poetry. He may be most influential for his effect on the next generation of young writers, as he inspired William Faulkner, Ernest Hemingway, John Steinbeck, and Thomas Wolfe.

Translation of: Neutestamentliche Apokryphen.

Kinney explores the intersections of culture, literature, and history surrounding the Vietnam "conflict," about which hundreds of plays, novels, short stories, and memoirs have been written. The

cultural and social implications from these evocative films and popular fictions shaped the American landscape with thoughts on what the war really meant to American culture.

Encourages one to create an ideal life through hard work, drawing on the author's own story and the experiences of others to prove that this life plan can really work.

A unique book providing a tour through the fascinating connections between mathematics and games.

This book identifies eight key mechanisms that can transform a set of ideas into a psychological flytrap. The author suggests that, like the black holes of outer space, from which nothing, not even light, can escape, our contemporary cultural landscape contains numerous intellectual black-holes—belief systems constructed in such a way that unwary passers-by can similarly find themselves drawn in. While such self-sealing bubbles of belief will most easily trap the gullible or poorly educated, even the most intelligent and educated of us are potentially vulnerable. Some of the world's greatest thinkers have fallen in, never to escape. This witty, insightful critique will help immunize readers against the wiles of cultists, religious and political zealots, conspiracy theorists, promoters of flaky alternative medicines, and others by clearly setting out the tricks of the trade by which such insidious belief systems are

created and maintained.

"The Terrible Twins" by Edgar Jepson. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The ultimate guide to Project Blue Book by one of the lead astronomers for the US Air Force program to investigate UFO sightings. Originally released in 1977, this new edition by the world's foremost authority on UFOs distills 12,000 sightings and 140,000 pages of Project Blue Book evidence into a coherent explanation. A US Air Force - sponsored UFO-basher for years, Hynek had completely changed his tune by the late 1960s. Whether you believe in little green men or an official government cover-up policy, The Hynek UFO Report is required reading. Have UFOs really been reported by every nation across the globe? Can all the eyewitness reports simply be fantasy? Are we victims of mass hallucination or just plain lies? Have close encounters actually occurred? Is the government concealing deep secrets at a hidden location? The Hynek UFO Report is rational, logical, and realistic. It is for anyone interested in UFOs, the possibility of

extraterrestrial life, and the role of the US government in hiding the truth from the public.

Written by outstanding authorities in the field, this Northwest guide tells in interesting and readable fashion how to find and identify the various salamanders, frogs, turtles, lizards, and snakes that inhabit Washington, Oregon, Idaho, and British Columbia.

Immediately after its founding by H? Chí Minh in September 1945, the Democratic Republic of Vietnam (DRV) faced challenges from rival Vietnamese political organizations and from a France determined to rebuild her empire after the humiliations of WWII. H?, with strategic genius, courageous maneuver, and good fortune, was able to delay full-scale war with France for sixteen months in the northern half of the country. This was enough time for his Communist Party, under the cover of its Vietminh front organization, to neutralize domestic rivals and install the rough framework of an independent state. That fledgling state became a weapon of war when the DRV and France finally came to blows in Hanoi during December of 1946, marking the official beginning of the First Indochina War. With few economic resources at their disposal, H? and his comrades needed to mobilize an enormous and free contribution in manpower and rice from DRV-controlled regions. Extracting that contribution during the war's early days was primarily a matter of patriotic exhortation. By the early 1950s, however, the infusion of weapons from the United States, the Soviet Union, and China had turned the Indochina conflict into a "total war." Hunger, exhaustion, and violence, along with the conflict's

growing political complexity, challenged the DRV leaders' mobilization efforts, forcing patriotic appeals to be supplemented with coercion and terror. This trend reached its revolutionary climax in late 1952 when H?, under strong pressure from Stalin and Mao, agreed to carry out radical land reform in DRV-controlled areas of northern Vietnam. The regime's 1954 victory over the French at ?i?n Biên Ph?, the return of peace, and the division of the country into North and South did not slow this process of socialist transformation. Over the next six years (1954–1960), the DRV's Communist leaders raced through land reform and agricultural collectivization with a relentless sense of urgency. *Mass Mobilization in the Democratic Republic of Vietnam, 1945–1960* explores the way the exigencies of war, the dreams of Marxist-Leninist ideology, and the pressures of the Cold War environment combined with pride and patriotism to drive totalitarian state formation in northern Vietnam.

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.
