

Hackish C Pranks And Tricks

Covering new technologies used to search for vulnerabilities on websites from a hacker's point of view, this book on Web security and optimization provides illustrated, practical examples such as attacks on click counters, flooding, forged parameters passed to the server, password attacks, and DoS and DDoS attacks. Including an investigation of the most secure and reliable solutions to Web security and optimization, this book considers the many utilities used by hackers, explains how to write secure applications, and offers numerous interesting algorithms for developers. The CD included contains programs intended for testing sites for vulnerabilities as well as useful utilities for Web security.

Concentrating on PHP script programming, this book considers Web security and optimization from the hacker's point of view. The many utilities used by hackers and written with PHP, examples of secure applications and algorithms for scripts, new ways of writing real hacking programs for the Web and nonstandard PHP programming techniques and possibilities. Programmers will also learn what tricks to expect from a hacker and how to create the most effective protection system possible are all discussed in detail.

Hackish C++ Pranks & Tricks???-???????????

Demonstrating how to write hacking programs, this collection of hacking tricks teaches programmers how to create software pranks and network programs. Nonstandard C++

programming techniques as well as undocumented functions that will make others smile and allow users to demonstrate practical skills in programming and computer support are covered. Special attention is paid to the creation of compact programs that are useful for those interested in optimizing programs. Network programming and how to program for the Internet or an intranet, how to create a fast port scanner, and how to write pranks are discussed. In addition to pranks and network programs, hacking algorithms are described so that programmers can learn what to expect from hackers and how to create a protection system with maximum efficiency.
