Containing 2,729 entries, Kevin L. Seligman's bibliography concentrates on books, manuals, journals, and catalogs covering a wide range of sartorial approaches over nearly five hundred years. After a historical overview, Seligman approaches his subject chronologically, listing items by century through 1799, then by decade. In this section, he deals with works on flat patterning, draping, grading, and tailoring techniques as well as on such related topics as accessories, armor, civil costumes, clerical costumes, dressmakers' systems, fur, gloves, leather, military uniforms, and undergarments. Seligman then devotes a section to those American and English journals published for the professional tailor and dressmaker. Here, too, he includes the related areas of fur and undergarments. A section devoted to journal articles features selected articles from costume- and noncostumerelated professional journals and periodicals. The author breaks these articles down into three categories: American, English, and other. Seligman then devotes separate sections to other related areas, providing alphabetical listings of books and professional journals for costume and dance, dolls, folk and national dress, footwear, millinery, and wigmaking and hair. A section devoted to commercial pattern companies, periodicals, and catalogs is followed by an appendix covering pattern companies, publishers, and publications. In addition to full bibliographic notation, Seligman provides a library call number and library location if that information is available. The majority of the listings are annotated. Each listing is coded for identification and cross-referencing. An author index, a title index, a subject index, and a chronological index will guide readers to the material they want. Seligman's historical review of the development of publications on the sartorial arts, professional journals, and the commercial paper pattern industry puts the bibliographical material into context. An appendix provides a cross-reference guide for research on American and English pattern companies, publishers, and publications. Given the size and scope of the bibliography, there is no other reference work even remotely like it.

Excerpt from A Scientific Guide to Practical Cutting, Vol. 1: Every Style of Garment to Fit the Human Form Our advice is never to measure over a sack coat if it can be avoided; the sack coat requiring greater length of back from the bottom of sye up, would be very likely to show that extra length in the measure, and when applied to another coat cut through the waist, would produce too much length of back; and if applied to a sack coat, the extra allowance should not be given in the draft. "A remarkable tale."—Chicago Tribune In George Appo's world, child pickpockets swarmed the crowded streets, addicts drifted in furtive opium dens, and expert swindlers worked the lucrative green-goods game. On a good night Appo made as much as a skilled laborer made in a year. Bad nights left him with more than a dozen scars and over a decade in prisons from the Tombs and Sing Sing to the Matteawan State Hospital for the Criminally Insane, where he reunited with another inmate, his father. The child of Irish and Chinese immigrants, Appo grew up in the notorious Five Points and Chinatown neighborhoods. He rose as an exemplar of the "good fellow," a criminal who relied on wile, who followed a code of loyalty even in his world of deception. Here is the underworld of the New York that gave us Edith Wharton, Boss Tweed, Central Park, and the Brooklyn Bridge.

Excerpt from Manual, or True Guide to Practical Cutting: Every Style of Garment to Fit the Human Form In cmrelusion, I beg leave to say that the present work has cost me a great deal of care and study in the transfer of my ideas to its columns. The principles herein contained are not of doubtful import, but are the production of a thorough, practical tailor, and are used by thousands through out this country and Canada, and I feel it to be a of gratification to me to be enabled to point to hundreds of individuals scattered throughout the country, that are in possession of wealth and comfort, who will most frankly acknowledge they are indebted to the aforesaid principles and their author for all the wealth they possess and hoping they will be the means of enhancing wealth and comfort to thousands yet in the future, is the desire of the author. Excerpt from Cutting and Draping: A Practical Handbook for Upholsterers and Decorators The nature of this treatment is to disguise the piano and give it the effect and usefulness of another piece of furniture. Figure 28 illustrates a popular treatment, the back covered with a curtain of soft fabric Shirred on a rod, and attached to the back of the instrument so that the heading or shirring projects slightly above the top. In making the curtain allow about as much again for fullness (or twice the length of the space to be covered), letting the bottom edge of the curtain hang free or shirr it on a rod similar to the top. To this is added an upholstered seat or bench and a few pillows. If desired a festoon drapery can be added at the top of the curtain with good effect. A decorative panel may be used instead of a curtain, as illustrated in Figure 29, either with or without a seat, and the drapery made to conform to the style of the panel. The drapery may be made as a part of the panel, as Figure 29 A, or attached separately after the panel is in place. A square or grand piano is prettily treated with a flat cover, the size and shape of the top trimmed with an overhanging fringe or appliqued edge Of a depth to suit the individual taste. The cover may be made of any medium-weight material of self or composite colorings, but preference should be given to a fabric not easily marked by the ornaments or bric-a-brac. In many cases the designs suitable for an upright piano can be used with good effect on a mantel, Figures 23, 24, 25 and 27 of our

illustrations possessing this feature to a certain degree. The decoration of a mantel, however, does not present the same difficulties as the decoration of a piano, because there are fewer restrictions to bear in mind, and there is perhaps more danger of overdoing mantel decoration on this account. From the appearance of some of the old-fashioned fireplaces still in existence we would infer that in those days utility and capacity were the first, last and only considerations.
