

Handbook Of Rehabilitation Psychology

Devon L. L. Polaschek, Andrew Day, Clive R. Hollin

The Oxford Handbook of Rehabilitation Psychology Paul Kennedy, 2012-06-15 Rehabilitation psychology is one of the fastest growing fields in applied psychology and involves the application of psychological knowledge and skills to the understanding and treatment of individuals with physical disabilities. Rehabilitation psychologists aim to optimize outcomes in terms of health, independence, and daily functioning while also minimizing secondary health problems. The Oxford Handbook of Rehabilitation Psychology provides background and overview of the associated psychological processes and types of interventions that are critical in managing the consequences of disability and chronic disease. Psychological models and research have much to contribute to those working with the physical disabilities; this volume has a broad cognitive behavioral focus within the general banner of the biopsychosocial framework. The editor has successfully brought together contributions from a range of well-established and experienced researchers and practitioners from a wide variety of clinical and academic contexts. They highlight the critical psychological aspects, review applied interventions, and consider the wider conceptual, clinical and professional themes associated with disability and society.

Handbook of Rehabilitation Psychology Robert G. Frank, Mitchell Rosenthal, Bruce Caplan, 2010 The book covers rehabilitation in hospitals, rehab centers and programs, skilled nursing facilities, assisted living facilities, ambulatory care settings, and schools. It includes sections on clinical conditions, assessment, clinical interventions, pediatrics, critical topics, and professional issues. It updates and significantly revises the first edition to account for fast-paced developments in the field

Handbook of Health and Rehabilitation Psychology Anthony J. Goreczny, 2013-11-11 Despite medical technological advances, the major killers with which we must currently contend have remained essentially the same for the past few decades. Stroke, cancer, and heart disease together account for the vast majority of deaths in the United States. In addition, due to improved medical care, many Americans who would previously have died now survive these disorders, necessitating that they receive appropriate rehabilitation efforts. One result of our own medical advances is that we must now accept the high costs associated with providing quality care to individuals who develop one of these problems, and we must avail ourselves to assist afflicted individuals. families Despite the relative stability of causes of death and disability, the health-care field is currently experiencing tremendous pressures, both from professionals with in the field, who desire more and

better technology than is currently available, and from the public and other payers of health care (e.g., insurance companies), who seek an end to increasing health-care costs. These pressures, along with an increased emphasis on providing evidence of cost-effectiveness and quality assurance, are substantially changing the way that health-care professionals perform their jobs.

Handbook of Health and Rehabilitation Psychology Anthony J. Goreczny,2014-01-15

Handbook of Rehabilitation Psychology Lisa A. Brenner,Stephanie A. Reid-Arndt,Timothy R. Elliott,Bruce Caplan,2019 The handbook has been significantly updated to reflect new developments in rehabilitation. Chapters address core and emerging topics, including competency-based practice, traumatic brain injury, public health, artificial intelligence, and virtual reality. Both experienced clinicians and early-career practitioners will find this book an invaluable resource for providing behavioral health care to people with chronic health conditions.

Handbook of Applied Disability and Rehabilitation Research Kristofer J. Hagglund, PhD, ABPP,Allen W. Heinemann, PhD, ABPP,2006-07-05 Now, more than ever, the field of rehabilitation psychology is growing. This book--one of the few that focuses solely on rehabilitation psychology research--provides the reader with the most up-to-date look at research and practice within the field of rehabilitation psychology. It offers recommendations for future research programs, policy changes, and clinical interventions from the various perspectives within rehabilitation psychology research and practice, and seeks to demonstrate how much the field can evolve with the implementation of these changes. Topics covered include: Assistive technology Health policy Cultural diversity Employment Future of rehabilitation research Community integration Health disparities

The Oxford Handbook of Rehabilitation Psychology 2nd Edition Meade,2023-11

Handbook of Psychosocial Rehabilitation Robert King,Chris Lloyd,Tom Meehan,2013-05-20 The Handbook of Psychosocial Rehabilitation is designed as a clinical handbook for practitioners in the field of mental health. It recognises the wide-ranging impact of mental illness and its ramifications on daily life. The book promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The authors distil relevant evidence from the literature, but the focus is on the clinical setting. Coverage includes the service environment, assessment, maintaining recovery-focussed therapeutic relationships, the role of pharmacotherapy, intensive case management and vocational rehabilitation.

Handbook of Rehabilitation in Older Adults Robert J. Gatchel,Izabela Z. Schultz,Christopher T. Ray,2019-02-27 This book discusses the state of the research and cutting-edge practice with regard to chronic illnesses and rehabilitation in older adults. It emphasizes biopsychosocial and culturally appropriate rehabilitation approaches to reduce the degree of disability and maximize independence in the activities of daily living among the burgeoning aging population. Organized in four

sections—Introduction and Overview, Major Illnesses and Problems in Aging Populations, Evaluation of Functional Rehabilitation Approaches for Aging Populations, and Future Clinical Research Needs—the book includes chapters on the “graying” of the West with implications for increased chronic illnesses and disabilities; a review of biopsychosocial rehabilitation approaches; important “aging” issues such as slips-and-falls, musculoskeletal pain, chronic disabling conditions such as cancer and cardiovascular disease, and work-related factors to maintain work engagement in older workers. The US Census Bureau projects that by the year 2030, about 20% of the U.S. population will be 65 or older, contributing to the increased concern about healthcare and rehabilitation issues among older adults. /div This work will be of interest to healthcare, rehabilitation, vocational, human resource and disability management professionals, policy makers as well as researchers in areas of aging, gerontology, chronic illness, disability, rehabilitation, social work, medicine and psychology.

Manual of Psychosocial Rehabilitation Robert King,Chris Lloyd,Tom Meehan,Frank Deane,David Kavanagh,2012-08-06 Psychosocial Rehabilitation is a comprehensive ready- reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for interventions effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

Neuropsychological Rehabilitation Barbara A. Wilson,Jill Winegardner,Caroline van Heugten,Tamara Ownsworth,2017-06-20 E) Rehabilitation in mainland China -- f) Rehabilitation in Hong Kong -- g) Rehabilitation in Brazil -- h) Rehabilitation in Argentina -- i) Rehabilitation in South Africa -- j) Rehabilitation in Botswana -- SECTION SEVEN Evaluation and general conclusions -- 42 Outcome measures -- 43 Avoiding bias in evaluating rehabilitation -- 44 Challenges in the evaluation of neuropsychological rehabilitation effects -- 45 Summary and guidelines for neuropsychological rehabilitation -- Index

Specialty Competencies in Rehabilitation Psychology David R. Cox,Richard H. Cox,Bruce Caplan,2013-10-03 Written

by recognized experts in their respective fields, the books of the Series in Specialty Competencies in Professional Psychology are comprehensive, up-to-date, and accessible. These volumes offer invaluable guidance to not only practicing mental health professionals, but those training for specialty practice as well.

The Handbook of Developmental Disabilities and Rehabilitation Dr. Neerja Pandey, 2021-08-24 The present book titled 'The Handbook of Developmental Disabilities and Rehabilitation' attempts to clarify specific doubts and misconceptions related to the field of disability and rehabilitation. The path from disability to rehabilitation encompasses a special intervention technique called Behaviour Modification that works best with children. The book is presented as a ready reckoner and preparatory instrument for aspiring Psychologists. The take away from the book are: • Understanding of and learning the art of case intake using the proforma provided. • Learning to prepare genogram i.e., pictorial depiction of a family using diagrams. • How to write a professional case report after the detailed case study. • To understand, to prepare and use Individualized Education Plan for the purpose of educating children with exceptionality. • Understanding the depth and method of Behaviour Modification Techniques with help of two sample case studies. • Understanding of the general concept of rehabilitation with the emphasis on different models.

Handbook of Rehabilitation Counseling T.F. Riggart, EdD, Dennis R. Maki, PhD, CRC, NCC, 2003-11-06 This state-of-the-art textbook illustrates paradigms for professional practice, provides an overview of current knowledge and future trends in rehabilitation counseling, and aims to stimulate thinking that will lead to new research initiatives. Both settings (private and public) as well as services are addressed, including placement, advocacy, and case management. The text also contains elements of practice, including cutting edge uses of technology and supervision, both clinical and managerial. The appendices include useful source materials such as Rehabilitation Acronyms and the Code of Professional Ethics for Certified Rehabilitation Counselors.

Oxford Handbook of Clinical Rehabilitation Anthony Ward, Michael Barnes, Sandra Stark, Sarah Ryan, 2009-04-30 Rehabilitation medicine is a new and growing specialty. Rehabilitation services are now available in most UK hospitals and rehabilitation has an increasing presence in the community. There is a strong evidence base for the efficacy of rehabilitation and there is no doubt that an active interdisciplinary rehabilitation programme produces real functional benefits for the person with disabilities and their family. The Oxford Handbook of Clinical Rehabilitation second edition, outlines the basic principles of rehabilitation and the key factors that are required for a high quality rehabilitation service. The increasingly important area of technical aids and assistive technology is covered, as well as physical problems. The book outlines the management of cognitive, behavioural and emotional problems and the rehabilitation needs of people with specific disorders. A new chapter on musculoskeletal pain in common rheumatological conditions has also been included. The Oxford Handbook of Clinical Rehabilitation second edition is a comprehensive text that not only summarises the management of common

symptoms and disorders but also outlines the increasing evidence base for the efficacy of these techniques. This new edition has been fully revised to appeal to the whole rehabilitation team, including junior doctors training in rehabilitation and associated specialties, senior therapists, psychologists, nurses, physiotherapists, GPs, primary care teams, and intermediate care teams.

The Wiley International Handbook of Correctional Psychology Devon L. L. Polaschek, Andrew Day, Clive R. Hollin, 2019-04-29 A two-volume handbook that explores the theories and practice of correctional psychology With contributions from an international panel of experts in the field, The Wiley International Handbook of Correctional Psychology offers a comprehensive and up-to-date review of the most relevant topics concerning the practice of psychology in correctional systems. The contributors explore the theoretical, professional and practical issues that are pertinent to correctional psychologists and other professionals in relevant fields. The Handbook explores the foundations of correctional psychology and contains information on the history of the profession, the roles of psychology in a correctional setting and examines the implementation and evaluation of various interventions. It also covers a range of topics including psychological assessment in prisons, specific treatments and modalities as well as community interventions. This important handbook: Offers the most comprehensive coverage on the topic of correctional psychology Contains contributions from leading experts from New Zealand, Australia, Europe, and North America Includes information on interventions and assessments in both community and imprisonment settings Presents chapters that explore contemporary issues and recent developments in the field Written for correctional psychologists, academics and students in correctional psychology and members of allied professional disciplines, The Wiley International Handbook of Correctional Psychology provides in-depth coverage of the most important elements of the field.

Practical Psychology in Medical Rehabilitation Maggi A. Budd, Sigmund Hough, Stephen T. Wegener, William Stiers, 2016-11-04 This easy-access guide summarizes the dynamic specialty of rehabilitation psychology, focusing on real-world practice in the medical setting. It begins by placing readers at the frontlines of practice with a solid foundation for gathering information and communicating effectively with patients, families, and staff. The book's topics run a wide gamut of patient conditions (neurological, musculoskeletal, cardiovascular), related problems (sleep and fatigue issues, depression) and practitioner responses (encouraging coping and compliance, pediatric and geriatric considerations). Models of disability and adaptation, review of competency concerns, and guidelines for group and individual therapy offer evidence-based insights for helping patients manage their health conditions, benefit from rehabilitation interventions, and prepare for their post-rehabilitation lives and activities. Coverage spotlights these core areas: ·Basics and biopsychosocial practicalities, from behavioral medicine and psychopharmacology to ethical and forensic issues. ·Populations, problems, and procedures, including stroke, TBI, substance abuse, transplants, and severe mental illness. ·Assessment and practical interventions such

as pain, anxiety, cognitive functioning, and more. ·Consultation, advocacy, and interdisciplinary teams. ·Practice management, administration, and professional self-care. ·Research, technology, and program evaluation. Practical Psychology in Medical Rehabilitation is an essential professional development tool for novice (and a refresher for veteran) psychologists and neuropsychologists, as well as rehabilitation physicians, nurses, therapists, psychiatrists, and social workers. It presents in depth both the hallmarks of the specialty and the nuts and bolts of being a valuable team player in a medical setting.

Understanding Psychosocial Adjustment to Chronic Illness and Disability Fong Chan, PhD, CRC, Elizabeth Da Silva Cardoso, PhD, Julie Chronister, PhD, CRC, 2009-06-16 Rehabilitation practitioners face the difficult task of helping clients adjust to chronic illness or disability. This can be a long and trying process for both practitioner and client. With this handbook, however, practitioners and students can gain a wealth of insight into the critical issues clients face daily. This book presents the dominant theories, models, and evidence-based techniques necessary to help the psychosocial adjustment of chronically ill or disabled persons. Each chapter is written from an evidence-based practice (EBP) perspective, and explores how important issues (i.e., social stigma, social support, sexuality, family, depression, and substance abuse) affect persons adjusting to chronic illness and disability. Key features include: A review of psychopharmacological treatment options for depression, anxiety, and other disorders coinciding with rehabilitation The effect of rehabilitation on the family, including key family intervention strategies Strategies for using positive psychology and motivational interviewing in rehabilitation Multiculturalism and the effect of culture on the adjustment process Ancillary materials including an instructor's manual with a syllabus, examination items, PowerPoint presentation, and answers to class exercises By incorporating research-based knowledge into clinical rehabilitation practice, health care professionals can ensure that people with chronic illness and disability receive only the best treatment.

Handbook of Psychiatric Rehabilitation Robert Paul Liberman, 1992

Essentials of Neuropsychological Rehabilitation Barbara A. Wilson, Shai Betteridge, 2019-09-02 For people with disabilities caused by nonprogressive brain injury, challenges in everyday living can be multifaceted and overwhelming. This book presents key principles of holistic neuropsychological rehabilitation, helping practitioners stay on track through complex terrain. Leading authorities Barbara A. Wilson and Shai Betteridge provide a framework for effective intervention based on a collaborative understanding of clients' strengths and needs. They describe essential strategies for assessing and remediating the impact of cognitive and psychosocial problems in everyday life. Detailed case examples illustrate the process of building partnerships with families, setting meaningful goals, developing skills and supports, and addressing emotional and mental health concerns. Innovative uses of technology are highlighted. Several reproducible clinical tools can be downloaded and printed in a convenient 8 1/2 x 11 size.
