Port Management and Operations Taylor & Francis

Port Management and Operations is a comprehensive and concise work detailing the essential aspects of international ports. The impact on ports of developments in ship technology is fully explained, as are the problems that environmental matters have created for port management. Changes in design, operation and location are discussed in detail as the ability to manage change is a crucial one. This book illustrates how management has coped with these changes over the last century. Port Management and Operations your essential guide to port management in the twenty-first century.

- Provides the reader with a complete understanding of total port activity
- Enables managers working in specific areas of ports to see where they fit into the port's operation and commercial practice as a whole
- Offers an analysis of the many types of ports along with the common essential elements that enable them to function, including administration, management, economics and operations

In today's globalised economic development, international transactions form an integral part of economic activities.

Logistics Management encompasses planning and management of all activities, involving sourcing and procurement of cargo by effective and economically feasible coordination and collaboration with channel partners, and provision of product and service packages from point-of-origin to point-of-consumption at the right time and at the right place. This book gives, with theoretical and practical expertise, a comprehensive coverage of the logistic concepts, techniques, and their applications in the world cargo industry. Besides, it provides an in-depth understanding of the strategic framework of Logistics Management, the technologies, and the components used in logistic operations. It also covers export-import trade and documentations, shipping formalities, warehouse and inventory management, ERP concepts, logistics operation of major ports—and more. Key Feature : Case Studies are provided at the end of most chapters, which tend a practical orientation to the subject. This book is primarily intended as a text for postgraduate students of Management (MBA/MIB) and Commerce (M.Com.IB). It will also prove useful for the students of those engineering disciplines where the subject is prescribed as an elective course. In addition, practising managers in international business will find the book valuable as a reference
