This book offers a biopolitical analysis of J. K. Rowling's globally-known Harry Potter series, including Jack Thorne and John Tiffany's stage production of Rowling's story, Harry Potter and the Cursed Child (2016). It indicates that modern children's fantasy school stories both perpetuate power inequalities as an effective dispositif of bioengineering, and simultaneously provide a political dissident perspective to power relations through an impossible fantasy world parallel to the real one. It applies Michel Foucault's biopolitical analytics, referring to his key works to reveal that race and class are used interactively as an agent for the exercise of biopower, in addition to Michael Hardt and Antonio Negri's rereading of Foucauldian biopolitics and biopower, introducing the concepts of "multitude," "the common," and "the Empire" to decipher the relationship between power and resistance besides the types and results of resistance in relation to biopolitics and biopower. As such, the book will appeal to undergraduates, academics, and all readers interested in

modern fantasy works and school stories as well as critical theories, including those of Foucault and Hardt and Negri, particularly biopolitical analytics.

Death and Garden Narratives in Literature, Art and Film: Song of Death in Paradise explores the combination of two motifs, death and gardens, to show how the two subjects are intertwined and used in various media and cultural contexts. Using cultural, literary, film, and art history theories, the contributors analyze various death and garden sceneries in literary works by Arthur Machen, Agatha Christie, J.K. Rowling, as well as in superhero comics, films, and cultural and art contexts such as Ian Hamilton Finley's "Little Sparta," the poetic verses from the Karoo Desert National Botanical Garden in South Africa, and the Australian wilderness.

2018 Harry Potter Planner - Purple6x9 2018 Daily, Weekly and Monthly Planner, Agenda, Organizer and CalendarCreatespace Independent Publishing Platform This practical guide by two experienced translators and translation tutors explores aspects of time, context and culture in a range of translated literary texts, including novels, memoirs, poems and plays. Reflective analytical sections are complemented by a variety of practical tasks that reflect the book's craft-based approach. Providing a dual focus on both analysis and creativity, this volume helps readers to develop two different skill sets required for translation: deconstruction and reconstruction. To learn how to analyse or deconstruct a source text (ST), the tasks include translating and editing, comparison and analysis of source language (SL) texts and translations, and critiquing or improving

target language (TL) texts produced by translators from different times. A range of creative writing challenges reveal the secrets writers use to hook their readers. Whatever language readers translate into, these insights will help them to find their own writer's voice, making them better equipped to recreate another author's voice, whatever the time or cultural context. This is the essential guide to improving target texts for all translators and students of translation.

The practice of offering reasons for the Christian faith, or apologetics, strikes many unbelievers today as offensive, an attempt to proselytize, while Christians themselves often view

apologetics as unsophisticated or even faith-undermining. After all, shouldn't a believer focus on presenting the gospel rather than attempting to argue people to belief? In Telling a Better Story, author Joshua Chatraw presents a new and better way to do apologetics, an inside-out approach that is attuned to our late-modern moment and respectful of unbelievers, all the while remaining focused on Jesus. With chapters on cultural understanding, dealing with the difficult issues, and presenting Jesus in a holistic, contextual manner, Telling a Better Story offers a roadmap to effective apologetics both for experienced apologists and those new to sharing their faith with others.

An essential work of twenty-first-century cinema, Alfonso Cuarón's 2004 film Harry Potter and the Prisoner of Azkaban is an elegant exemplar of contemporary cinematic trends, including serial storytelling, the rise of the fantasy genre, digital filmmaking, and collaborative authorship. With craft, wonder, and wit, the film captures the most engaging elements of the novel while artfully translating its literary point of view into cinematic terms that expand on the world established in the book series and previous films. In this book, Patrick Keating examines how Cuarón and his collaborators employ cinematography, production design, music, performance, costume, dialogue, and more to create

the richly textured world of Harry Potter—a world filtered principally through Harry's perspective, characterized by gaps, uncertainties, and surprises. Rather than upholding the vision of a single auteur, Keating celebrates Cuarón's direction as a collaborative achievement that resulted in a family blockbuster layered with thematic insights.

This student-friendly book provides an accessible overview of the primary debates about the effects of video games. It expands on the original The Video Game Debate to address the new technologies that have emerged within the field of game studies over the last few years. Debates about the negative effects of video game play have been evident since their introduction in the 1970s, but the advent of online and mobile gaming has revived these concerns, reinvigorating old debates and generating brand new ones. The Video Game Debate 2 draws from the latest research findings from the top scholars of digital games research to address these concerns. The book explores key developments such as virtual and augmented reality, the use of micro-transactions, the integration of loot boxes, and the growth of mobile gaming and games for change (serious games). Furthermore, several new chapters explore contemporary debates around e-sports, gamification, sex and gender discrimination in games, and the use of games in therapy. This book offers students and scholars of games studies and digital media, as well as policymakers, the essential information they need to participate in the debate.

An examination of free-to-play and mobile games that traces what is valued and what is marginalized in discussions of games. Free-to-play and mobile video games are an important and growing part of the video game industry, and yet they are often disparaged by journalists, designers, and players and pronounced inferior to to games with more traditional payment models. In this book, Christopher Paul shows that underlying the criticism is a bias against these games that stems more from who is making and playing them than how they are monetized. Free-to-play and mobile games appeal to a different kind of player, many of whom are women and many of whom prefer different genres of games than multi-level action-oriented killing fests. It's not a coincidence that some of the few free-to-play games that have been

praised by games journalists are League of Legends and World of Tanks.

Youth has been represented on screen for decades and has informed many directors' visual, narrative and social perspectives, but there has not been a body of work addressing the richness and complexity of this topic in a French and Francophone context. This volume offers new insights into the works of emerging and well-established directors alike, who all chose to place youth at the heart of their narrative and aesthetic concerns. Showing how the topic of 'youth' has inspired filmmakers to explore and reinvent common tropes associated with young people, the book also addresses how the representation of youth can be used to mirror the tensions - political, social, religious, economic or cultural - that agitate a society at a given time in its history.
