It is becoming more and more important to address the decline in our native bee populations, not only on a national level but also in our own back gardens and other outdoor spaces. Amateur bee keeping is one way to help bees recover their numbers, but a simpler way is to create an environment in which they can thrive. Honey bees, bumblebees or wild bees all love a garden full of flowers. Some wild bees may even take up residence in your garden if they find nesting opportunities as well as their favourite flowers. Bee Garden offers everything you need to plant and nurture a garden that will invite these vital pollinators in, creating spaces bursting with vibrant colour and giving off heady, bee-friendly scents from the right kinds of plants. In doing so you will cultivate an environment in which beneficial insects thrive, and pests are controlled, meaning that your gardens, balconies and containers create a delightful environment for people as well as bees. Containing a wealth of information about different bees and vibrant planting plans, Bee Garden will help you support and grow a happy garden that is buzzing with life and fruitfulness.

On 20 July 1969, US astronauts Neil Armstrong and Buzz Aldrin became the first men to walk on the moon. NASA Mission AS-506 Apollo 11 Owners' Workshop Manual is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. This manual looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. It describes the space suits

worn by the crew and their special life support and communications systems. We learn about how the Apollo 11 mission was flown - from launch procedures to 'flying' the Saturn V and the 'LEM', and from moon walking to the earth re-entry procedure. This new edition of the book celebrates the 50th Anniversary of the Apollo 11 moon landing.
