Focusing on the future challenges companies face in being continuously innovative, this book is based on a combination of world class talks given at the Innovation Exchange (IE) conference in November 2001. Through interviews with various companies, the book identifies the best and worst practices in innovation strategy. Three main topics are discussed in detail: trends, challenges, and paradoxes. Utilizing practical and academic knowledge, with a strong reliance on real-world applicability, the book will help readers build innovation performance into their companies.

The thirteenth century marks a turning point in the history of the western Mediterranean. The armies of Castile and Aragon won significant and decisive victories over Muslims in Iberia and took over a number of important cities including Cordoba, Seville, Jaen, and Murcia. Chased out of their native cities, a large number of Andalusis migrated to Ifr?qiy? in northern Africa. There, a newly founded Hafsids dynasty (1229-1574) welcomed members of the Andalusis elite and showered them with honors and high positions at court. While historians have tended to conceive of Ifr?qiy? as a region ruled by the Hafsids, Ramzi Rouighi argues in *The Making of a Mediterranean Emirate* that the Andalusis who joined the Hafsids court supported economic arrangements and

political relationships that effectively prevented regional integration from taking place during this period. Rouighi examines an array of documentary, literary, and legal sources to argue that Ifr?qiy? was integrated neither politically nor economically and that, consequently, it was not a region in a meaningful sense. Through a close reading of narrative sources, especially historical chronicles, Rouighi further argues that the emergence in the late fourteenth century of the political ideology of Emirism accounts for the representation of the rule of the Hafsids over cities as its rule over the whole of Ifr?qiy?. Setting the activities of Andalus such as the celebrated historian Ibn Khald?n (1332-1406) in relation to specific political, economic, and intellectual developments in Ifr?qiy?, *The Making of a Mediterranean Emirate* proposes a counter to the dynastic-centric view of the period that pervades medieval sources and continues to inform most modern generalizations about the Maghrib and the Mediterranean.

It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we

neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. No Accident examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.

Car Safety Wars is a concise history of the hundred-year struggle for safer cars and highways, involving at least six presidents, reluctant congresses, a fiercely resisting automobile industry, unsung heroes, and GM detectives. "Sue Blauner's you-are-there account . . . offers insight and understanding to anyone who has been touched by suicide."—Joan Anderson, author of *A Year by the Sea* An epidemic of international proportions, suicide has touched the lives of nearly half of all Americans, yet is rarely talked about openly. In this timely and important book, Susan Blauner breaks the silence to offer guidance and hope for those contemplating ending their lives—and for the loved ones who want to help them. A

survivor of multiple suicide attempts, Blauner eloquently describes the feelings and fantasies surrounding suicide. In a direct, nonjudgmental, and loving voice, she offers affirmations and suggestions for those experiencing life-ending thoughts, and for their friends and family. Here is an essential resource destined to be the classic guide on the subject.

The international financial value of Grand Prix racing has grown substantially in recent years. This book will focus upon the massive size, value, importance and impact of the industry. It will also investigate the dominance of UK based Research and Development and design and the development of team strategy and tactics. The authors have based their analysis upon very up-to-date research involving interviews with key individuals at the highest level and visibility within the industry and focus upon the key management themes of teamworking, leadership, strategy and innovation.

Perhaps the most iconic steam locomotive in the world, the legendary Flying Scotsman was the first train to achieve 100mph and in its glory days ran the only non-stop passenger service between London and Edinburgh. When it was withdrawn from regular service in 1963, after nearly 40 years in service, the locomotive had travelled an estimated two million miles. In January 2016, after a complete and expert restoration project lasting a decade, Flying Scotsman returned to the UK's mainline as one of the jewels in the National Railway Museum's collection.

This book covers the process of building 4-stroke engines to a professional standard, from selecting materials and planning work, right through to methods of final assembly and testing. It is written for the DIY engine builder in an easy-to-understand style, supported by approximately 200 photographs and original drawings. Containing five engine inspection and build sheets, and the contact details of approximately 45 specialist manufacturers and motorsport suppliers, it explains build methods common to all 4-stroke engines, rather than specific makes or models. An essential purchase for all engine-building enthusiasts.

World Champion trainer and rider Sandy Collier provides this indispensable guide of progressive training exercises for the reining horse. Whether green broke, or "push-button," every horse will perform more willingly, cleanly, and quickly with work on what she calls the "Seven Essentials"—the foundational basics every riding horse needs. Like no other book out there, Collier breaks down the maneuvers required in a reining pattern and the tricks and techniques for introducing them, perfecting them, and showing them off in competition. You'll learn about:

- Collection and steering—condensing your horse's frame and getting his feet to follow his nose
- Lead departures, circles, and

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

This pocket-sized, illustrated guide covers every significant make and model of car sold in Europe and North America during the 2006-2007 model year, from giants like Ford and VW to small-scale manufacturers such as Morgan and Noble. Each model is pictured in color, with a data table providing vital statistics to enable comparisons between models. Providing full details for over 700 cars and stretching to 400 pages, this is a must-have reference source and a useful "spotter's guide" for all car enthusiasts.

?This volume presents the most current theoretical advances in the fields of social marketing and public health communications. The volume is divided in two parts. Part 1 contains chapters pertaining to research and theory reflecting improvements and contributions to theories that help improving quality of life. It includes literature reviews, conceptual research and empirical studies on social marketing communications, models to understand individual's risky behaviors, and how to improve social interventions. The second part emphasizes applied research, consisting of best practices, applied experiments, and case studies on social marketing innovative practices with implications for quality of life.

An exciting new series that covers the five Paper 2 topics of the IB 20th Century World History syllabus. This coursebook covers Paper 2, Topic 1, Causes, practices and effects of wars, in the 20th Century World History syllabus for the IB History programme. It is divided into thematic sections,

following the IB syllabus structure and is written in clear, accessible English. It covers the following areas for detailed study: First World War (1914-18); Second World War (1939-45); Asia and Oceania: Chinese Civil War (1927-37 and 1946-9); and Europe and Middle East: Spanish Civil War (1936-9). Tailored to the requirements and assessment objectives of the IB syllabus, it allows students to make comparisons between different regions and time periods. This book includes 9 projects on building smart and practical AI-based systems. These projects cover solutions to different domain-specific problems in healthcare, e-commerce and more. With this book, you will apply different machine learning and deep learning techniques and learn how to build your own intelligent applications for smart ...

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Techniques for optimizing large-scale IP routing operation and managing network growth Understand the goals of scalable network design, including tradeoffs between network scaling, convergence speed, and resiliency Learn basic techniques applicable to any network design, including hierarchy, addressing, summarization, and information hiding Examine the deployment and

operation of EIGRP, OSPF, and IS-IS protocols on large-scale networks Understand when and how to use a BGP core in a large-scale network and how to use BGP to connect to external networks Apply high availability and fast convergence to achieve 99.999 percent, or “five 9s” network uptime Secure routing systems with the latest routing protocol security best practices Understand the various techniques used for carrying routing information through a VPN Optimal Routing Design provides the tools and techniques, learned through years of experience with network design and deployment, to build a large-scale or scalable IP-routed network. The book takes an easy-to-read approach that is accessible to novice network designers while presenting invaluable, hard-to-find insight that appeals to more advanced-level professionals as well. Written by experts in the design and deployment of routing protocols, Optimal Routing Design leverages the authors’ extensive experience with thousands of customer cases and network designs. Boiling down years of experience into best practices for building scalable networks, this book presents valuable information on the most common problems network operators face when seeking to turn best effort IP networks into networks that can support Public Switched Telephone Network (PSTN)-type availability and reliability. Beginning with an overview of design fundamentals, the authors discuss the

tradeoffs between various competing points of network design, the concepts of hierarchical network design, redistribution, and addressing and summarization. This first part provides specific techniques, usable in all routing protocols, to work around real-world problems. The next part of the book details specific information on deploying each interior gateway protocol (IGP)—including EIGRP, OSPF, and IS-IS—in real-world network environments. Part III covers advanced topics in network design, including border gateway protocol (BGP), high-availability, routing protocol security, and virtual private networks (VPN). Appendixes cover the fundamentals of each routing protocol discussed in the book; include a checklist of questions and design goals that provides network engineers with a useful tool when evaluating a network design; and compare routing protocols strengths and weaknesses to help you decide when to choose one protocol over another or when to switch between protocols. “The complexity associated with overlaying voice and video onto an IP network involves thinking through latency, jitter, availability, and recovery issues. This text offers keen insights into the fundamentals of network architecture for these converged environments.”
