The International Bestseller "This book blew my mind. More importantly, it made financial independence seem achievable. I read Financial Freedom three times, cover-to-cover."

possible. In 2010, 24-year old Grant Sabatier woke up to find he had \$2.26 in his bank account. Five years later, he had a net worth of over \$1.25 million, and CNBC began calling him "the Millennial Millionaire." By age 30, he had reached financial independence. Along the way he uncovered that most of the accepted wisdom about money, work, and retirement is either incorrect, incomplete, or so old-school it's obsolete. Financial Freedom is a step-by-step path to make more money in less time, so you have more time for the things you love. It challenges the accepted narrative of spending decades working a traditional 9 to 5 job, pinching pennies, and finally earning the right to retirement at age 65, and instead offers readers an alternative: forget everything you've ever learned about money so that you can actually live the life you want. Sabatier offers surprising, counter-intuitive advice on topics such as how to: * Create profitable side hustles that you can turn into passive income streams or full-time businesses * Save money without giving up what makes you happy * Negotiate more out of your employer than you thought possible * Travel the world for less * Live for free--or better yet, make money on your living situation * Create a simple, money-making portfolio that only needs minor adjustments * Think creatively--there are so many ways to make money, but we don't see them. But most importantly, Sabatier highlights that, while one's ability to make money is limitless, one's time is not. There's also a limit to how much you can save, but not to how much money you can make. No one should spend precious years working at a job they dislike or worrying about how to make ends meet. Perhaps the biggest surprise: You need less money to "retire" at age 30 than you do at age 65. Financial Freedom is not merely a laundry list of advice to follow to get rich quick--it's a practical roadmap to living life on one's own terms, as soon as possible.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017.

Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations

"Consumer-directed health plans (CDHP) combine a high-deductible health plan with a tax-advantaged account, such as a health reimbursement arrangement (HRA), that enrollees can use to pay for health care expenses. In an effort to restrain cost growth, several employers, including the federal government through its Office of Personnel Management (OPM), have offered HRAs for several years. For enrollees in HRAs compared with those in traditional plans such as preferred provider organization (PPO) plans, GAO assessed (1) differences in health status, and (2) changes in spending and utilization of health care services. GAO analyzed data from two large employers—one public and one private—that introduced an HRA option in 2003. GAO compared changes in health spending and utilization before and after 2003 for enrollees who switched from a PPO into an HRA (the HRA group) with those who stayed in a PPO (the PPO group). At the time GAO made its data requests to each employer, 2007 data from the public employer and 2005 data from the private employer were the most current and complete data available. GAO also reviewed published studies that included an assessment of the health status, spending, or utilization of HRA and other CDHP enrollees compared..."

It follows him from the time his B-17 was shot down over the German-French border, he was rescued and hidden by villagers in the tiny village of Baslieuse, then escaped through a Europe occupied by Nazi forces desperate to escape pursuing Allied armies. book chronicles, in fascinating detail, the life and training of those young men who made up the heroic 8th Air Force, and describes the affectionate relationship often maintained by their crews with that most famed heavy bomber of all time, the fabled B-17. It includes some of the most tragic stories as well as some of the wryest humor ever written about combat groups. A heavy bomb group consists of 36 heavy bombers. The 91st lost 207 planes during its WWII combat time 32 during the author's flight tenure. Dr. Anderson uses the words of the extraordinary crews of those planes to describe the training they absorbed, the missions they flew, the results they achieved, the tragedy of watching their planes explode and their friends die, and the heroism that brought so many near fatally damaged planes home with their dead and wounded crews. This is also a story of growing up in pre-war America, and of the growth and

After Colorado voters approved the sale and use of medicinal and recreational cannabis, the state's landscape was changed. Suddenly, dispensaries and grow houses were everywhere, and customers numbered in the tens, if not hundreds, of thousands. But federal laws make it difficult for cannabis businesses to open checking or savings accounts in federally insured financial institutions. It's nearly impossible for these businesses to wire funds, access lines of credit, or maintain payroll accounts. The result is an industry that has been forced to pay its bills, employees, suppliers, and taxes in cash. Briefcases and backpacks full of cash. Enter Safe Harbor Private Banking. “sharing one another’s burdens” has also found expression in more formal structures. Seventy-five years ago, Mennonite Mutual Aid emerged to organize the principle of sharing within a growing Mennonite denomination. A dynamic organization from the beginning, MMA moved quickly from a burial and survivor’s aid plan to include health, property, and automobile insurance. In coming decades, the organization shifted its focus from mutual aid to stewardship and generosity, symbolized by a growing emphasis on socially responsible investment programs, wholistic health, financial planning, and services associated with its member-owned credit union. Always an agency of the Mennonite church, MMA, now known as Everence, has balanced its spiritual commitments with an increasingly complex regulatory environment, the national strains associated with the health-care debate, the shifting sensibilities of its customers, and the organizational complexities of a major corporation. This story of Everence captures the stresses and idealism of a church-related institution committed to mutual aid, stewardship, and generosity during its seventy-five-year history.
