Introduction to Finance, 17th Edition offers students a balanced introduction to the three major areas of finance: institutions and markets, investments, and financial management. Updated to incorporate recent economic and financial events, this new edition is an ideal textbook for first courses in finance—reviewing the discipline’s essential concepts, principles, and practices in a clear, reader-friendly manner. Students gain an integrated perspective of finance by learning how markets and institutions influence, and are influenced by, individuals, businesses, and governments. Designed to impart financial literacy to readers with no previous background in the subject, the text provides a solid foundation for students to build upon in later courses in financial management, investments, or financial markets. Equations and mathematical concepts are kept to a minimum, and include understandable, step-by-step solutions. Divided into three parts, the book explains financial markets, discusses the functions of financial systems, reviews savings and investments in different sectors, describes accounting concepts and organizational structures, and more. Real-world examples featured throughout the text help students understand important concepts and appreciate the role of finance in various local, national, and global settings.

Global Health Governance and Policy outlines the fundamentals of global health, a key element of sustainable development. Taking an interdisciplinary approach, it explores the relationship between the globalization process and global health’s social, political, economic and environmental determinants. important than ever to an organization's economic well-being. Leaders throughout the enterprise not just financial managers but clinical and operational managers, too must have a solid grounding in finance to be able to improve care and deliver value.

Gapenski's *Fundamentals of Healthcare Finance* provides a comprehensive introduction to the basic principles and applications of healthcare finance that managers use daily. In clear and succinct language, the book provides readers from students and entry-level managers to more experienced practitioners with newly added management or financial responsibilities with a detailed overview of finance topics ranging from planning and budgeting to financial operations, capital investment, and risk analysis. Practice scenarios, examples, self-test questions, sidebars on financial practices in healthcare, and running glossary definitions help bring these topics to life. This book's original author, Louis C. Gapenski, PhD, was recognized both nationally and internationally as an expert in healthcare finance. In this new edition, authors Kristin L. Reiter and Paula H. Song further refine Dr. Gapenski's concepts and teachings. In addition to updated examples and statistics, this edition includes new or expanded information on: current community benefit reporting requirement, service line costing, applications of capital investment decision analysis, international financial reporting standards, Not-for-profit accounting standards, financial accounting, and Healthcare legislation. *Gapenski's Fundamentals of healthcare Finance* equips readers with the knowledge, vocabulary, and understanding they need to interpret financial data and to communicate and work effectively with finance leaders in their organizations."--Description from publisher.

The health of human populations around the world is constantly changing and the health profiles of most nations in the early twenty-first century global health landscape are unrecognizable compared with those of just a century ago. This book examines and explains these health changes and considers likely future patterns and changes. While the overall picture charted is one of progress and improvement, certain unfortunate regressions and stubbornly persistent health inequalities are equally shown to be part of the evolving patterns of global health. The chapters of the book are organized in three major parts: The first part introduces readers to the principal concepts of global health, and to the idea of populations having distinctive health profiles. In particular, it explores how those profiles can be measured, and how they change, using the umbrella concepts and theories of epidemiological and health transition. Building on the first section, the second part focuses on the evolution of health states, as well as paying particular attention to the reasons for the many subnational inequalities in global health. It also examines health challenges such as the continuing infectious disease burden and current emerging 'epidemics'. The final part transports readers from the current health scene to future possible and probable health scenarios, acknowledging the challenges presented by global environmental change, as well as issues centred around geopolitics and human security. Using clear and original explanations of complex issues, this text makes extensive use of boxed case studies and international examples, with thought-provoking discussion questions posed for readers at the end of each chapter. *Global Health* is essential reading for students of global health, public health and development studies.

The latest edition of this widely adopted text updates the description and discussion of key sectors of America's health care system in light of the Affordable Care Act.

*Health Care Finance: Basic Tools for Nonfinancial Managers* is the most practical financial management text for those who need basic financial management knowledge and a better understanding of healthcare finance in particular. Using actual examples from hospitals, long-term care facilities, and home health agencies, this user-friendly text includes practical information for the nonfinancial manager charged with budgeting. The Fourth Edition offers:

- An expanded chapter on Electronic Records Adoption: Financial Management Tools & Decisions
- New chapter: ICD-10 Adoption and Healthcare Computer Systems
- New chapter: Other Technology Adoption and Management Decisions
- New chapter: Strategic Planning and the Healthcare Financial Manager
- New case study: "Strategic Planning in Long-Term Care" that connects with the chapter on strategic planning
- New appendix: "Appendix C: Employment Opportunities in Healthcare Finance"

As a contribution to the search for suitable and sustainable solutions to finance rising medical care expenditures, the book proposes a typology of healthcare financing and insurance schemes, based on the dimensions of basic vs. supplementary services and mandatory vs. voluntary coverage, to analyse the design and the complex interactions between various financing and insurance arrangements in several OECD countries. This study provides a better understanding of the strengths and weaknesses of the financial and organisational structures of different countries' healthcare financing and insurance schemes. Its main contributions are the development of a novel and rigorous theoretical framework analysing the economic rationales for the optimal design of healthcare financing and insurance schemes, and an empirical and institutional analysis investigating the consequences for efficiency and affordability of the complex interactions between basic and supplementary sources of financing.
