

Help Our Heroes A Military Charity Anthology

The Military Covenant states that in exchange for their military service and their willingness to make the ultimate sacrifice, soldiers should receive the nation's support. Exploring the concept's invention by the Army in the late 1990s, its migration to the civilian sphere from 2006 and its subsequent entrenchment in public policy, Ingham seeks to understand the Covenant's progress from the esoteric confines of Army doctrine to national recognition. Drawing on interviews with senior commanders, policy-makers and representatives of Forces' charities, this study highlights how the Army deployed the Military Covenant to convey the pressure on the institution caused by the concurrent combat operations in Iraq and Afghanistan. While achieving a better deal for soldiers whose sacrifice became all too apparent, the Military Covenant licensed unprecedented incursion into politics by senior commanders, enabling them to out-manoeuvre the Blair-Brown governments and to challenge the existing norms within Britain's civil-military relationship. As British Forces prepare to leave Afghanistan, this study considers the value Britain accords to military service and whether civilian society will continue to uphold its Covenant with those who have served the nation.

Alice Baratone brings you into the realm of our military heroes and their families through her poetry, along with our heroes accompanying pictures. The poems were written from either her thoughts and feelings as a Marine Mom, or from the thoughts and feelings of others in our military family. Whether you are currently serving, deployed, a family member of a fallen hero, a military family member, or a patriotic citizen of the United States, there is a poem that will touch your inner soul. In this glorious nation, our heroes lay their lives on the line everyday, and there are those who give the ultimate sacrifice for our country. Family members keep the fire burning at home waiting for loved ones to return. For the family members of our fallen heroes, they possess a courage and inner strength that is felt by all who come across their path. The military life is filled with fears, tears, laughter, joy, and the utmost pride to be an American. This is not just a book of poetry and pictures, but a book that will bring understanding and pride towards our country's heroes and their families. Many of the pictures were submitted with honor and pride from those who know Alice Baratone, (many simply call her, Mom B.). Alice Baratone's mission through her poetry is to honor and ensure that our military and their family members will never be forgotten. From the serious to the light-hearted, Alice Baratone proudly shares a few poems that adorn the book. Take a moment to read and delve into the pride of being an American. Take a moment to read and delve into the lives of our military and their families. Take a moment and share this book with others so that our military and their family members will forever be remembered. Military caregivers are an essential part of our nation's ability to care for returning wounded warriors. Far too often, their own needs are neglected. The RAND Corporation and the Elizabeth Dole Foundation lay the groundwork to inform policy and program development relative to the needs of military caregivers that often differ from the needs of the general caregiving population.

In Chemical Heroes Andrew Bickford analyzes the US military's attempts to design performance enhancement technologies and create pharmacological "supersoldiers" capable of withstanding extreme trauma. Bickford traces the deep history of efforts to biologically fortify and extend the health and lethal power of soldiers from the Cold War era into the twenty-first century, from early adoptions of mandatory immunizations to bio-protective gear, to the development and spread of new performance enhancing drugs during the global War on Terrorism. In his examination of government efforts to alter soldiers' bodies through new technologies, Bickford invites us to contemplate what constitutes heroism when armor becomes built in, wired in, and even edited into the molecular being of an American soldier. Lurking in the background and dark recesses of all US military enhancement research, Bickford demonstrates, is the desire to preserve US military and imperial power.

Military Working Dogs have played a vital role in the United States armed forces throughout history. This book is a celebration of their contributions to our nation. In *Dogs Who Serve*, New York Times bestselling author Lisa Rogak profiles these heroic dogs and their handlers in the Army, Navy, Air Force, and even the Coast Guard. She chronicles their path to service, from puppyhood to training, then through their career in the field and on to retirement and adoption. And she showcases them in vivid, full-color photographs that capture the devotion and respect that these amazing canines, their devoted handlers, and fellow soldiers share for one another. A tribute to America's Military Working Dogs, as well as others serving around the globe, *Dogs Who Serve* is a heartwarming collection for dog lovers everywhere.

"While much has been written about the role of caregiving for the elderly and chronically ill and for children with special needs, little is known about "military caregivers" -- the population of those who care for wounded, ill, and injured military personnel and veterans. These caregivers play an essential role in caring for injured or wounded service members and veterans. This enables those for whom they are caring to live better quality lives, and can result in faster and improved rehabilitation and recovery. Yet playing this role can impose a substantial physical, emotional, and financial toll on caregivers. This report summarizes the results of a study designed to describe the magnitude of military caregiving in the United States today, as well as to identify gaps in the array of programs, policies, and initiatives designed to support military caregivers. Improving military caregivers' well-being and ensuring their continued ability to provide care will require multifaceted approaches to reducing the current burdens caregiving may impose, and bolstering their ability to serve as caregivers more effectively. Given the systematic differences among military caregiver groups, it is also important that tailored approaches meet the unique needs and characteristics of post-9/11 caregivers."--Abstract

Come along to see how this loving military family deals with an all too common situation! How a son and father creates a bond so strong to ever break. How a wife and mom's love says it all! What would you do? What would you say? Members of our armed forces know all too well how hard it is on family members when they are called to serve. Explaining to a young son or daughter how important and necessary it is to serve can be a difficult task. Reassuring them that it is okay to carry on the everyday routines of being a kid. Though it may be challenging, we all have a part to play in encouraging service members and their families. We must stay positive, show love and be supportive of all armed forces members. They are truly our heroes!

They say you are what you eat--but apparently, with whom you eat is pretty important too. Current medical research bears this out. But wellness was not what motivated mil-blogger/Navy wife and mom Sarah Smiley to invite one guest every week for 52 weeks to have dinner with herself and her three young sons. Sarah's motivation was to fill a void in her family life: that empty chair at the dining room table while her Navy pilot husband, Dustin, was deployed overseas for a year. But what started as a gesture meant to distract the boys from missing their Dad became a joyous journey as the unlikely people accepted the invitations... and brought dessert. The Smiley family discovered that a surprising number of people really are available for dinner. You just have to ask. Each dinner guest taught them about life, and the importance of sharing something simple and intimate--like a meal--to cement these valuable lessons in place. From a state senator (she baked brownies) to sports superstars (ice cream), from the boys' teachers (cookies) to their 94-year old neighbor--with R2-D2 making a very

special visit--each Smiley dinner guest leaves an indelible impression. Throughout the book, Sarah Smiley's unvarnished detailing of the emotional ebb and flow of being a "single mom" to three irrepressible boys while trying to balance career, car pool and dinner prep is Bombeck-esque at times, deeply moving at others. DINNER WITH THE SMILEYS transformed the family, so much so that even upon Dad's return home, the dinners have continued... one new guest every week. DINNER WITH THE SMILEYS shows how one family made a difference not only in their own lives, but the life of each guest as well. Full of humor and heart, this memoir will remind readers how nice it is to sit down, break bread, and connect, as well as surely inspire many invitations to the dinner table.

Based on interviews of military veterans by the authors, this book explains why so many of our American military heroes—those willing to put their lives on the line to protect the United States—now question if our nation is still the country they fought for. What is happening to our country? This question is heard more and more frequently these days as Americans worry about the unrelenting attacks by so-called progressives on the foundation, core values, and history of our nation. Nobody is more concerned than those Americans who volunteered to serve in uniform and willingly put their lives on the line to protect the United States and all it represents. Based on interviews by the authors, this book explains why many of our American heroes believed in and loved our nation enough to go into harm's way to defend it, and why so many of them now question if America is still the country they fought for. More importantly, it asks—is America still worth fighting for? What is happening to our country?
