BEST RATED BOOK OF 2018 AND 2019 on Mofibo, Denmark's biggest e-book and audiobook platform. When one summer evening, on a blind date that is almost cancelled, Pelle Hvenegaard meets Caroline, he knows right away: This woman will be the mother to his children. Their first meeting grows into a blazing romance, and it is quickly clear that the two of them want to have a family together - but biology toys with them. Dear Zoe Ukhona is Pelle Hvenegaard's honest, comic, tragic and heartwarming tale of the six-year fertility and adoption hell he and his partner had to go through before they could open the door to their apartment in Copenhagen with little Zoe Ukhona in their arms. We follow Caroline and Pelle's arduous inner journey, but we are also with them when - to keep themselves going - they travel to five continents before climbing to the top of Kilimanjaro to call out to their coming child, unaware that she had in fact been born just twenty days earlier in South Africa. This is a story of love and of dealing with life when it doesn't go the way you planned. A story about searching for

happiness and meaning - and the joy of finding them both. From the foreword by Zindzi Mandela: "... on top of being a book about battling childlessness, it's a story of hope, a story of love, a story of fighting for happiness ... it's a story about the meaning of life." PELLE HVENEGAARD became world famous as a twelve-year-old when he played the lead role in Bille August's Oscar-winning film Pelle the Conqueror. He has a degree in journalism and has worked in the TV industry for many years. This is his first of three books.

novel is a gift both to her millions of loyal fans and to the lucky readers who have yet to discover her. Four women – intimate with the psychology of evil – work together for a small nonprofit that disseminates information on genocide. When two of them receive death threats, they immediately believe the messages come from one of their recently profiled war criminals. As the tensions mount among the women, each discovers that none of the others is exactly the person they seem to be. Their obsession with tracking down the killer turns into a witch hunt: one by one, the women dismiss the idea that the threats were sent from the outside and begin to suspect each other, disclosing the jealousies and contempt that have been simmering just beneath the surface. A tautly woven philosophical drama with all the trimmings of an electrifying murder mystery, *The Exception* heralds Christian Jungersen as a gifted storyteller and keen observer of the human psyche.

In the spirit of the Outsider art of Henry Darger and Howard Finster, Blackstock makes art that is stirring in its profusion and detail and inspiring in its simple beauty. He has never received formal artistic training, yet his renderings clearly and beguilingly show subtle differences and similarities enabling the viewer to see, for example, the distinctive features of a dolly varden, a Pacific Coast steelhead cutthroat, and fourteen other types of trout. Each collection is lovingly captioned in Blackstock's unique hand with texts that reflect facts from his research as well as his passions and preferences. gripping and accomplished first novel. A decade in the writing, this is an anthropological adventure story that combines the visceral allure of a thriller with a profound and tragic vision of what happens when cultures collide. It is a book that instantly catapults Hanya Yanagihara into the company of young novelists who really, really matter. In 1950, a young doctor called Norton Perina signs on with the anthropologist Paul Tallent for an expedition to the remote Micronesian island of Ivu'ivu in search of a rumored lost tribe. They succeed, finding not only that tribe but also a group of forest dwellers they dub "The Dreamers," who turn out to be fantastically long-lived but progressively more senile. Perina suspects the source of their longevity is a hard-to-find turtle; unable to resist the possibility of eternal life, he kills one and smuggles some meat back to the States. He scientifically proves his thesis, earning worldwide fame and the Nobel Prize, but he soon discovers that its miraculous property comes at a terrible price. As things quickly spiral out of his control, his own demons take hold, with devastating personal consequences.
