By the acclaimed Dutch author of *Beyond Sleep*: a thriller set in Nazi occupied Holland: “fast-moving, frighteningly real yet verging on the incredible” (Milan Kundera, author of *The Unbearable Lightness of Being*). During the German occupation of Holland, tobacconist Henri Osewoudt is visited by a mysterious man named Dorbeck—a man who bears a strangely striking resemblance to Osewoudt himself. Dorbeck recruits him to perform simple, but top-secret missions on orders from London. But as the assignments keep coming, they get increasingly dangerous. Soon Osewoudt is being asked to commit murder in the name of Gestapo resistance. After the war, Osewoudt is taken for a traitor and captured. To prove his sacrifices for the Resistance, he must find the untraceable doppelgänger in an existential thriller “crackling with tension . . . bringing to mind Camus and the Sartre of *Les Chemins de la Liberté*” (*The Telegraph*). “Striking, suspenseful . . . Brilliant.” —*The Observer*

This study establishes age as a category of literary history, delineating age in its interaction with gender and narrative genre. Based on the historical premise that the view of ageing as a burden emerges as a specific narrative in the late

eighteenth century, the study highlights how the changing experience of ageing is shaped by that of gender. By reading the Bildungsroman as a 'coming of age' novel, the book asks how the telling of a life in time affects individual age narratives. Bringing together the different perspectives of age and disability studies, the book argues that illness is already an important issue in the Bildungsroman's narratives of ageing. This theoretical stance provides new interpretations of canonical novels, visiting authors such as Johann Wolfgang Goethe, Frances Burney, Maria Edgeworth, Jane Austen, Charles Dickens, George Eliot, Samuel Beckett, and Jonathan Franzen. Drawing on the link between age and illness in the Bildungsroman's age narratives, the genre of 'dementia narrative' is presented as one of the directions which the Bildungsroman takes after its classical period. Applying these theoretical perspectives to canonical novels of the nineteenth century and to the new genre of 'dementia narrative', the volume also provides new insights into literary and genre history. This book introduces a new theoretical approach to cultural age studies and offers a comprehensive analysis of the connection between narratology, literary theory, gender and age studies.

As European theatre directors become a familiar presence on international stages and a new generation of theatre makers absorbs their impulses, this study

develops fresh perspectives on Regie, the Continental European tradition of staging playtexts. Leaving behind unhelpful clichés that pit, above all, the director against the playwright, Peter M. Boenisch stages playful encounters between Continental theatre and Continental philosophy. The contemporary Regie work of Thomas Ostermeier, Frank Castorf, Ivo van Hove, Guy Cassiers, tg STAN, and others, here meets the works of Friedrich Schiller and Leopold Jessner, Hegelian speculative dialectics, and the critical philosophy of Jacques Rancière and Slavoj Žižek in order to explore the thinking of Regie – how to think Regie, and how Regie thinks. This partial and ‘sideways look’ invites a wider reconsideration of the potential of ‘playing’ theatre today, of its aesthetic possibilities, and its political stakes in the global neoliberal economy of the twenty-first century.

Dit boek is bestemd voor kwalificatieniveau 4 en 5 en vormt een onderdeel van het leer- en vormingsgebied verpleegkunde. Het is een praktisch boek, dat zich vooral richt op disfuncties, beperkingen en handicaps en minder op de stoornis zelf. Na algemene hoofdstukken over o.a. beroepshouding, wetgeving en diagnostiek & methodiek volgt een geclusterde behandeling van de stoornissen uit de DSM-IV. Deze worden eerst verdeeld in stoornissen met een invaliderend beloop en stoornissen die dat niet of minder hebben, daarna komen groepen als stemmingsstoornissen, persoonlijkheidsstoornissen en psycho-organische stoornissen aan bod. Ten slotte wordt aandacht besteed aan jeugdige zorgvragers en aan ethiek in de psychiatrie. Casuïstiek uit de klinische en transmurale praktijk verlevendigt de stof.

What makes us who we are? Arno Geiger's father was never an easy man to know and when he developed Alzheimer's, Arno realised he was not going to ask for help. "As my father can no longer cross the bridge into my world, I have to go over to his." So Arno sets out on a journey to get to know him at last. Born in 1926 in the Austrian Alps, into a farming family who had an orchard, kept three cows, and made schnapps in the cellar, his father was conscripted into World War II as a "schoolboy soldier" - an experience he rarely spoke about, though it marked him. Striking up a new friendship, Arno walks with him in the village and the landscape they both grew up in and listens to his words, which are often full of unexpected poetry. Through his intelligent, moving and often funny account, we begin to see that whatever happens in old age, a human being retains their past and their character. Translated into nearly 30 languages, *The Old King in His Exile* will offer solace and insight to anyone coping with a loved one's aging.

In this third edition of *Globalization in World History*, Peter Stearns explores the roots of contemporary globalization, examining shifts in the global flow of people, goods, and ideas as early as 1000 CE. Exploring how four moments in history have accelerated the process of globalization, Stearns's narrative details how factors such as economics, migration, disease transmission, culture, the environment, and politics have influenced the nature of globalization as we understand it today. This revised edition includes: Updates to the whole study with appropriate recent references; New brief transition sections that focus attention on the Mongol period, debates over the role of the eighteenth century, and the partial retreat from globalization after World War I; A new final chapter that deals with the rise in attacks on globalization during the most recent decade, from populist objections to the implications of growing authoritarianism, raising the question of whether a new transition is taking shape around us today. Through an interdisciplinary approach that links political, sociological, and historical perspectives, Stearns provides a comprehensive overview of globalization and the historical factors that have shaped it. This book will be of interest to undergraduate and postgraduate students of world history, economic history, and political economy.

The global reception of Samuel Beckett raises numerous questions: in which areas of the world was Beckett first translated? Why were Beckett texts sometimes slow to penetrate certain cultures? How were national literatures impacted by Beckett's oeuvre? *Translating Samuel Beckett around the World* brings together leading

researchers in Beckett studies to discuss these questions and explore the fate of Beckett in their own societies and national languages. The current text provides ample coverage of the presence of Beckett in geographical contexts normally ignored by literary criticism, and reveals unknown aspects of the 1969 Nobel Prize winner interacting with translators of his work in a number of different countries.

Whether it's our choice of a new car or what we think about our neighbours, our opinions and attitudes are a way of negotiating the world around us. The Psychology of Influence explores how these preferences and behaviours are influenced and affected by the messages we receive in daily life. From consumer choices to political, lifestyle and financial decisions, the book examines how and why we may be influenced by a range of sources, from written text and television to social media and interpersonal communication. In a field that has fascinated scholars since Plato, the book addresses the key questions across cognitive, social and emotional domains: When do arguments become persuasive? What influence do role models have? What role do simple rules of thumb, social norms or emotions play? Which behaviours are difficult to influence, and why? Covering topics from attraction, prejudice and discrimination to reward, punishment and unconscious bias, The Psychology of Influence will be invaluable reading for students and researchers across a range of areas within applied and social psychology, as well as those in political science, communications, marketing and business and management.

It is the winter of 1945, the last dark days of World War II in occupied Holland. A Nazi collaborator, infamous for his cruelty, is assassinated as he rides home on his bicycle. The Germans retaliate by burning down the home of an innocent family; only twelve-year-old Anton survives. Based on actual events, *The Assault* traces the complex repercussions of this horrific incident on Anton's life. Determined to forget, he opts for a carefully normal existence: a prudent marriage, a successful career, and colorless passivity. But the past keeps breaking through, in relentless memories and in chance encounters with others who were involved in the assassination and its aftermath, until Anton finally learns what really happened that night in 1945—and why.

New York Times Bestseller! A School Library Journal Best Book A never-before-published, previously unfinished Mark Twain children's story is brought to life by Philip and Erin Stead, creators of the Caldecott Medal-winning *A Sick Day for Amos McGee*. In a hotel in Paris one evening in 1879, Mark Twain sat with his young daughters, who begged their father for a story. Twain began telling them the tale of Johnny, a poor boy in possession of some magical seeds. Later, Twain would jot down some rough notes about the story, but the tale was left unfinished . . . until now. Plucked from the Mark Twain archive at the University of California at Berkeley, Twain's notes now form the foundation of a fairy tale picked up over a century later. With only Twain's fragmentary script and a story that stops partway as his guide, author Philip Stead has written a tale that imagines what might have been if Twain had fully realized this work. Johnny, forlorn and alone except for his pet chicken, meets a kind woman who gives him seeds that change his fortune, allowing him to speak with animals and sending him on a quest to rescue a stolen prince. In the face of a bullying tyrant king, Johnny and his animal

friends come to understand that generosity, empathy, and quiet courage are gifts more precious in this world than power and gold. Illuminated by Erin Stead's graceful, humorous, and achingly poignant artwork, this is a story that reaches through time and brings us a new book from America's most legendary writer, envisioned by two of today's most important names in children's literature. An editor and writer's vivaciously entertaining, and often moving, chronicle of his year-long adventure with fifty great books (and two not-so-great ones)—a true story about reading that reminds us why we should all make time in our lives for books. Nearing his fortieth birthday, author and critic Andy Miller realized he's not nearly as well read as he'd like to be. A devout book lover who somehow fell out of the habit of reading, he began to ponder the power of books to change an individual life—including his own—and to define the sort of person he would like to be. Beginning with a copy of Bulgakov's *Master and Margarita* that he happens to find one day in a bookstore, he embarks on a literary odyssey of mindful reading and wry introspection. From *Middlemarch* to *Anna Karenina* to *A Confederacy of Dunces*, these are books Miller felt he should read; books he'd always wanted to read; books he'd previously started but hadn't finished; and books he'd lied about having read to impress people. Combining memoir and literary criticism, *The Year of Reading Dangerously* is Miller's heartfelt, humorous, and honest examination of what it means to be a reader. Passionately believing that books deserve to be read, enjoyed, and debated in the real world, Miller documents his reading experiences and how they resonated in his daily life and ultimately his very sense of self. The result is a witty and insightful journey of discovery and soul-searching that celebrates the abiding miracle of the book and the power of reading.

A rediscovered masterpiece: an unblinking view of the Holocaust through a child's eyes Told from the perspective of a child slowly awakening to the atrocities surrounding him, *Childhood* is a searing story of the Holocaust that no reader will soon forget. As five-year-old Jona waits with his mother and father to emigrate from Nazi-occupied Amsterdam to Palestine, they are awakened at night, put on a train, and eventually interred in the camps at Bergen-Belsen. There, what at first seems to be a merely dreary existence soon reveals itself to be one of the worst horrors humanity has ever created. A triumph of heartrending clarity and dispassionate amazement, *Childhood* stands tall alongside such monuments of Holocaust literature as *The Diary of Anne Frank*, Elie Wiesel's *Night*, and Primo Levi's *Survival in Auschwitz*. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. A vivid account of what makes us human. Based groundbreaking new research, *We Are Our Brains* is a sweeping biography of the human brain, from infancy to adulthood to old age. Renowned neuroscientist D. F. Swaab takes us on a guided tour of the intricate inner workings that determine our potential, our limitations, and our desires,

with each chapter serving as an eye-opening window on a different stage of brain development: the gender differences that develop in the embryonic brain, what goes on in the heads of adolescents, how parenthood permanently changes the brain. Moving beyond pure biological understanding, Swaab presents a controversial and multilayered ethical argument surrounding the brain. Far from possessing true free will, Swaab argues, we have very little control over our everyday decisions, or who we will become, because our brains predetermine everything about us, long before we are born, from our moral character to our religious leanings to whom we fall in love with. And he challenges many of our prevailing assumptions about what makes us human, decoding the intricate “moral networks” that allow us to experience emotion, revealing maternal instinct to be the result of hormonal changes in the pregnant brain, and exploring the way that religious “imprinting” shapes the brain during childhood. Rife with memorable case studies, *We Are Our Brains* is already a bestselling international phenomenon. It aims to demystify the chemical and genetic workings of our most mysterious organ, in the process helping us to see who we are through an entirely new lens. Did you know?

- The father’s brain is affected in pregnancy as well as the mother’s.
- The withdrawal symptoms we experience at the end of a love affair mirror chemical addiction.
- Growing up bilingual reduces the likelihood of Alzheimer’s.
- Parental religion is imprinted on our brains during early development, much as our native language is.
