"This volume encompasses the range of issues encountered by language scholars who

teach and research in departments of languages and cultures within the higher education system, predominantly in Australia, but touching other universities worldwide. Related studies on language planning, methodology or pedagogy have focused on one or more of these same issues, but rarely on their totality. Intersections as a metaphor running discreetly through the essays in this volume, connects them all to a lived reality. The field of languages and cultures, as it is practised and reflected upon in Australian universities, is essentially an interdisciplinary and interconnecting space - one in which linguistic and disciplinary diversities meet and join forces, rather than collide or disperse along different pathways. The international and local studies featured here focus on language planning, new pedagogies and language reclamation and link to meeting points and commonalities. They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field, whether within their institutions, within the tertiary system, or within the framework of government policy." -- prové de l'editor.

This book contributes to building the research knowledge that language teaching professionals need in developing curriculum for the large population of East Asian heritage students (including Chinese, Japanese, and Korean) in countries like the United States, Canada, and Australia, where speakers of East Asian languages are among the fastest growing populations. Heritage learners are defined as those who initially acquired certain levels of linguistic and cultural competence in a non-dominant language mainly through interaction with foreign-born parents and other family members at home. Heritage language instruction is currently a "hot topic" and is becoming a sub-discipline within the fields of foreign language education and applied linguistics. Special instruction for heritage language learners is on the rise, particularly in the U.S. and Canada. Providing theoretical and practical information about heritage-language instruction in terms of curriculum design, learner needs, materials development,

and assessment procedures, the goal of this book is not only to promote research about heritage students in East Asian languages but also to improve the teaching of these students in various educational settings and all over the world, especially in English speaking countries. The volume is organized in four sections: *Overview—addressing the timeliness, necessity, and applications of the work and issues and future agendas for teaching Chinese, Japanese, and Korean heritage students; *Language Needs Analysis; *Attitude, Motivation, Identity, and Instructional Preference; and *Curriculum Design, Materials Development, and Assessment Procedures Teaching Chinese, Japanese, and Korean Heritage Language Students is intended as a primary text or reference for researchers, educators, and students in the areas of curriculum, pedagogy, and assessment studies related to teaching bilingual and heritage students in general and East Asian heritage students in particular.
