Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Un mondo dentro il mondo rappresenta uno dei concetti più antichi della mitologia, che fa parte dell'immagine archetipica di Gaia, la Madre Terra. Molti dei nostri remoti antenati narravano o ascoltavano storie sui loro progenitori, germinati nel ventre oscuro delle caverne della Madre Terra per poi nascere al luminoso e freddo mondo della superficie. Essi sapevano che, al momento della morte, sarebbero tornati tra le braccia della Madre Terra. I mondi sotterranei che Kafton-Minkel esplora nel suo saggio sono a volte rivelatori, talora divertenti, altre volte assolutamente assurdi, ma possono mostrare ai lettori che amano essere portati lontano dalla propria immaginazione, come il desiderio di modellare l'universo e la nostra stessa natura in una forma compatta e comprensibile possa farci credere strane cose e accennare a tutto ciò che l'umanità ancora non conosce della natura e di se stessa.

The riveting New York Times bestselling tale of romance and suspense with an "edge-of-your-seat conclusion" (Booklist). Julie Barenson's young husband left her two unexpected gifts before he died - a Great Dane puppy named Singer and the promise that he would always be watching over her. Now four years have passed. Still living in the small town of Swansboro, North Carolina, twenty-nine-year-old Julie is emotionally ready to make a commitment to someone again. But who? Should it be Richard Franklin, the handsome, sophisticated engineer who treats her like a queen? Or Mike Harris, the down-to-earth nice guy who was her husband's best friend? Choosing one of them should bring her more happiness than she's had in years. Instead, Julie is soon fighting for her life in a nightmare spawned by a chilling deception and jealousy so poisonous that it has become a murderous desire...

John Blake, professore di educazione fisica e padre di famiglia, si trova a dover fronteggiare un'apocalisse zombie insieme alla moglie Brenda ed alla figlia Lily. La piccola realtà del paesino di provincia dove vivono viene ben presto sconvolta dai morti che tornano

inspiegabilmente in vita. John dovrà fare una scelta: restare in quarantena come gli è stato violentemente intimato, oppure uscire per capire che cosa sta succedendo. Giorni di Sangue è un romanzo horror/zombie per tutti i fan del genere. Cupo, adrenalinico e dai toni decisamente forti.

'Rewriting' is one of the most crucial but at the same time one of the most elusive concepts of literary scholarship. In order to contribute to a further reassessment of such a notion, this volume investigates a wide range of medieval and early modern literary transformations, especially focusing on texts (and contexts) of Italian and French Renaissance literature. The first section of the book, "Rewriting", gathers essays which examine medieval and early modern rewritings while also pointing out the theoretical implications raised by such texts. The second part, "Rewritings in Early Modern Literature", collects contributions which account for different practices of rewriting in the Italian and French Renaissance, for instance by analysing dynamics of repetition and duplication, verbatim reproduction and free reworking, textual production and authorial self-fashioning, alterity and identity, replication and multiplication. The volume strives at shedding light on the complexity of the relationship between early modern and ancient literature, perfectly summed up in the motto written by Pietro Aretino in a letter to his friend the painter Giulio Romano in 1542: "Essere modernamente antichi e anticamente moderni".

Nel Manuale dell'uomo normale ritroverete l'Uomo Domestico, che cerca di fare dieci cose insieme ma non ha abbastanza mani, e l'Imperfetto Sportivo, che combatte contro palloni e palline, il mare, le salite, l'età e perde sempre. Ai due storici manuali di Beppe Severgnini s'aggiunge il nuovo Manuale dell'uomo sociale, che completa e aggiorna il ritratto dell'Uomo Normale (ammesso che esista). L'Italia vi sfilerà davanti come un paesaggio visto da un treno. Conosciuto, ma commovente. Lo vediamo, ed è già passato.

"Wine is art. Wine is ritual. Wine is culture. Wine is romance. But in the hands of Tattersall and DeSalle . . . we learn that wine is also science."—Neil deGrasse Tyson A Wall Street Journal Best Book for Wine Lovers An excellent bottle of wine can be the spark that inspires a brainstorming session. Such was the case for Ian Tattersall and Rob DeSalle, scientists who frequently collaborate on book and museum exhibition projects. When the conversation turned to wine one evening, it almost inevitably led the two—one a palaeoanthropologist, the other a molecular biologist—to begin exploring the many intersections between science and wine. This book presents their fascinating, freewheeling answers to the question "What can science tell us about wine?" And vice versa. Conversational and accessible to everyone, this colorfully illustrated book embraces almost every imaginable area of the sciences, from microbiology and ecology (for an understanding of what creates this complex beverage) to physiology and neurobiology (for insight into the effects of wine on the mind and body). The authors draw on physics, chemistry, biochemistry, evolution, and climatology, and they expand the discussion to include insights from anthropology, primatology, entomology, Neolithic archaeology, and even classical history. The resulting volume is indispensable for anyone who wishes to appreciate wine to its fullest.

"Chemistry. Evolutionary biology. Genetics. This book is an excellent layman's refresher on these diverse topics, and

many more, and how they fit into the grand scheme of wine . . . A fact-packed and accessible read that goes a long way toward explaining why and how wine became such an important component in our enjoyment of the natural world.”—Wine Spectator

A re-release of a golden-age classic follows the episodic adventures of a great space ship that explores the far reaches of the galaxy and chronicles their encounters with myriad alien beings, including the Ix, who lay their eggs in human bodies. Reprint. 12,500 first printing.

The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

"The Science of Wine does an outstanding job of integrating 'hard' science about wine with the emotional aspects that make wine appealing."--Patrick J. Mahaney, former senior Vice President for wine quality at Robert Mondavi Winery "Jamie Goode is a rarity in the wine world: a trained scientist who can explain complicated subjects without dumbing them down or coming over like a pointy head. It also helps that he's a terrific writer with a real passion for his subject."--Tim Atkin MW, The Observer

In 1999, at the tender age of ten, Charlene Lunnon and Lisa Hoodless were snatched as they walked to school. Over the next week, they were held captive, tortured, raped and almost killed. News of the girls' disappearance dominated the headlines, and the entire country held its breath, praying for their safe return as a massive police hunt failed to turn up any clues. But then a miracle happened. The girls were found alive, their abductor was arrested and the case was closed. But there was to be no such closure for Charlene and Lisa. Over the coming years, their friendship was strained to breaking point, as they struggled to reconcile themselves to their painful memories and to each other. Abducted is their astonishing first-hand, insider account of how it feels to be kidnapped, how they survived their horrific ordeal and how they have found the strength to move on and rebuild their lives.

In the basement of a Boston bookstore, Firmin is born in a shredded copy Finnegans Wake, nurtured on a diet of Zane Grey, Lady Chatterley's Lover, and Jane Eyre (which tastes a lot like lettuce). While his twelve siblings gnaw these books obliviously, for Firmin the words, thoughts, deeds, and hopes—all the literature he consumes—soon consume him. Emboldened by reading, intoxicated by curiosity, foraging for food, Firmin ventures out of his bookstore sanctuary, carrying with him all the yearnings and failings of humanity itself. It's a lot to ask of a rat—especially when his home is on the verge of annihilation. A novel that is by turns hilarious, tragic, and hopeful, Firmin is a masterpiece of literary

imagination. For here, a tender soul, a vagabond and philosopher, struggles with mortality and meaning—in a tale for anyone who has ever feasted on a book...and then had to turn the final page. NOTE: This edition does not include illustrations.

Dagon H. P. Lovecraft - "Dagon" is a short story by American author H. P. Lovecraft. It was written in July 1917 and is one of the first stories that Lovecraft wrote as an adult. It was first published in the November 1919 edition of *The Vagrant*. Dagon was later published in *Weird Tales*. It is considered by many to be one of Lovecraft's most forward-looking stories. The story is the testament of a tortured, morphine-addicted man who relates an incident that occurred during his service as an officer during World War I. In the unnamed narrator's account, his cargo ship is captured by an Imperial German sea-raider in "one of the most open and least frequented parts of the broad Pacific". He escapes on a lifeboat and drifts aimlessly, south of the equator, until he eventually finds himself stranded on "a slimy expanse of hellish black mire which extended about [him] in monotonous undulations as far as [he] could see.... The region was putrid with the carcasses of decaying fish and less describable things which [he] saw protruding from the nasty mud of the unending plain." He theorizes that this area was formerly a portion of the ocean floor thrown to the surface by volcanic activity, "exposing regions which for innumerable millions of years had lain hidden under unfathomable watery depths. Famous works of the author Howard Phillips Lovecraft: *At the Mountains of Madness*, *The Dreams in the Witch House*, *The Horror at Red Hook*, *The Shadow Out of Time*, *The Shadows over Innsmouth*, *The Alchemist*, *Reanimator*, *Ex Oblivione*, *Azathoth*, *The Call of Cthulhu*, *The Cats of Ulthar*, *The Outsider*, *The Picture in the House*, *The Shunned House*, *The Terrible Old Man*, *The Tomb*, *Dagon*, *What the Moon Brings*.

I regni dell'uomo - l'alchimia spirituale - alchimia della nuova era l'aspirante spirituale. Un manuale d'insegnamento del Sapere e della Sapienza della tradizione iniziatica, letti in chiave moderna. L'autrice accompagna il lettore, verso la scoperta che l'alchimia spirituale, con il suo insieme di Misteri, oggi è qualcosa di realmente attuale, realizzabile e accessibile. Attraverso semplici e suggestive spiegazioni, ma soprattutto tramite efficaci esercizi e momenti dedicati a sé, il lettore si aprirà a una profonda comprensione del proprio cammino interiore. Ciò gli permetterà di riconoscere e sviluppare la propria natura superiore che, normalmente, nell'uomo comune è ancora allo stato embrionale. Una guida per aderire ai principi della Gente della Nuova Era. Di particolare interesse i capitoli dedicati alla simbologia del Natale e dei suoi protagonisti: Maria, I Magi, La Stella, Gesù raccontati in una chiave di lettura nuova, curiosa e appassionante.
