The Third Edition of this well-received geography text maintains the approach of previous editions, describing how and why geographic factors create broad global contrasts. There are more maps, vignettes, and case studies plus increased coverage of Africa, Latin America and Asia. Each chapter contains an overview covering all new concepts. Key terms are defined as they appear and all statistics have been updated into the mid-1980s.

Now in a fourth edition, this standard student reference has been totally revised and updated. It remains the definitive introduction to the history, philosophy, and methodology of human geography; now including a detailed explanation of key ideas in human geography's post-modernist and post-structuralist 'turns'. The book is organized into six sections: What is Geography?: an introduction to the discipline, and a discussion of its organization and basic research approaches, informed by the question 'what difference does it make to think geographically?' Foundations of Geography: an examination of geography from Antiquity to the 1950s, with a special focus on

human/environment relation. *Geography 1950-1980*: a critical review of the development of geography as a spatial science. *Paradigms and Revolutions*: an analysis of paradigm shifts in geography, introducing students to key debates in the philosophy of science. *Positivism and its Critics*: a detailed discussion of positivism, critical theory, humanistic geography, behavioural geography, and structuralism. *New Trends and Ideas* developing critical responses: structuration theory, realism, post-structuralism, post-modernism, feminism and actor-network theory. This text explores complex ideas in an intelligible and accessible style. Illustrated throughout with research examples and explanations in text boxes, questions for discussion at the end of each chapter and a concept glossary, this is the essential student companion to the discipline.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

'For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map.' University, UK 'A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake.' Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools, from a subject which encourages students to explore spatial concepts, ideas and skills, to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In this book the new approach is critically examined, within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject, and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike, *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself.
