SIR GAWAIN AND THE GREEN KNIGHT, PEARL, AND SIR ORFEO THREE MEDIEVAL ENGLISH POEMS, WITH TRANSLATION AND COMMENTARY BY J.R.R. TOLKIEN It's Christmas at Camelot and King Arthur won't begin to feast until he has witnessed a marvel of chivalry. A mysterious knight, green from head to toe, rides in and brings the court's wait to an end with an implausible challenge to the Round Table: he will allow any of the knights to strike him once, with a battle-axe no less, on the condition that he is allowed to return the blow a year hence. Arthur's brave favorite for the challenge is Sir Gawain... Accompanying Sir Gawain and the Green Knight in this book are Sir Orfeo, a medieval version of the story of Orpheus and Euridice, a love so strong that it overcame death, and Pearl, the moving tale of a man in a graveyard mourning his baby daughter, lost like a pearl that slipped through his fingers. Worn out by grief, he falls asleep and dreams of meeting her in a bejewelled fantasy world. Interpreted in a form designed to appeal to the general reader, J.R.R. Tolkien's vivid translations of these classic poems represent the complete rhyme and alliterative schemes of the originals. This beautifully decorated text includes as a bonus the complete text of Tolkien's acclaimed lecture on Sir Gawain.

Now in a fourth edition, this standard student reference has been totally revised and updated. It remains the definitive introduction to the history, philosophy, and methodology of human geography; now including a detailed explanation of key ideas in human geography's post-modernist and post-structuralist 'turns'. The book is organized into six sections: What is Geography?: an introduction to the discipline, and a discussion of its organization and basic research approaches, informed by the question 'what difference does it make to think geographically?' Foundations of Geography: an examination of geography from Antiquity to the 1950s, with a special focus on human/environment relation. Geography 1950-1980: a critical review of the development of geography as a spatial science. Paradigms and Revolutions: an analysis of paradigm shifts in geography, introducing students to key debates in the philosophy of science. Positivism and its Critics: a detailed discussion of positivism, critical theory, humanistic geography, behavioural geography, and structuralism. New Trends and Ideas developing critical responses: structuration theory, realism, post-structuralism, post-modernism, feminism and actor-network theory. This text explores complex ideas in an intelligible and accessible style. Illustrated throughout with research examples and explanations in text boxes, questions for discussion at the end of each chapter and a concept glossary, this is the essential student companion to the discipline.
