Organophosphorus Chemistry provides a comprehensive annual review of the literature. Coverage includes phosphines and their chalcogenides, phosphonium salts, low coordination number phosphorus compounds, penta- and hexa-coordinated compounds, tervalent phosphorus acids, nucleotides and nucleic acids, ylides and related compounds, and phosphazenes. The series will be of value to research workers in universities, government and industrial research organisations, whose work involves the use of organophosphorus compounds. It provides a concise but comprehensive survey of a vast field of study with a wide variety of applications, enabling the reader to rapidly keep abreast of the latest developments in their specialist areas. Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

This Congressional hearing report covers testimony given to the Subcommittee on Postsecondary Education, Training and Life-Long Learning relating to the issue of crime on college campuses. Specifically the testimony addressed a proposed bill before the House of Representatives, the Open Campus Police Logs Act, which would amend the Higher Education Act of 1965. Testimony also addressed the effectiveness of the existing Crime Awareness and Campus Security Act of 1990, which was included as part of the Student Right to Know Campus Security Act, enacted to provide reliable information to parents and students about criminal activity on college campuses. Transcripts are provided of the testimony of witnesses concerning: the effectiveness of the existing law, how the law is being administered by the Department of Education, whether schools and the Department have been abiding by both the spirit and requirements of the law, what suggestions witnesses have for further changes to the law, and views of proposed Open Campus Police Logs Act. Transcripts are included of statements offered by five concerned private individuals, two school administrators, and David Longanecker, Assistant Secretary for Postsecondary Education. In addition to the oral testimony, prepared statements, letters, and supplementary materials are included in the report. (CH)
