Since 1954, Twenty-Four Hours a Day has become a stable force in the recovery of many alcoholics throughout the world. With over six and a half million copies in print it offers daily thoughts, meditations, and prayers for living a clean and sober life. A spiritual resource with practical applications to fit our daily lives. It is a simple, yet effective way to help us relate the Twelve Steps to everyday life and helps us find the power not to take that first drink each day.

Al?Anon's basic book is ideal for sharing widely with newcomers as a way of "paying our gratitude forward."

The project that captured a nation's imagination. The instructions were simple, but the results were extraordinary. "You are invited to anonymously contribute a secret to a group art project. Your secret can be a regret, fear, betrayal, desire, confession, or childhood humiliation. Reveal anything -- as long as it is true and you have never shared it with anyone before. Be brief. Be legible. Be creative." It all began with an idea Frank Warren had for a community art project. He began handing out postcards to strangers and leaving them in public places -- asking people to write down a secret they had never told anyone and mail it to him, anonymously. The response was overwhelming. The secrets were both provocative and profound, and the cards themselves were works of art -- carefully and creatively constructed by hand. Addictively compelling, the cards reveal our deepest fears, desires, regrets, and obsessions. Frank calls them "graphic haiku," beautiful, elegant, and small in structure but powerfully emotional. As Frank began posting the cards on his website, PostSecret took on a life of its own, becoming much more than a simple art project. It has grown into a global phenomenon, exposing our individual aspirations, fantasies, and frailties -- our common humanity. Every day dozens of postcards still make their way to Frank, with postmarks from around the world, touching on every aspect of human experience. This extraordinary collection brings together the most powerful, personal, and beautifully intimate secrets Frank Warren has received -- and brilliantly illuminates that human emotions can be unique and universal at the same time.

This book is an introduction into the workings of Al-Anon, Alcoholics Anonymous. As people come together to find help and support in dealing with the effects of alcoholism, they often find help and solace in the experiences shared by other member. They come together for many different reasons, and return looking for one reason: hope of a better life.

Kathy was an overachiever-an economist, technical writer, and classical singer married 27 years to her college sweetheart. It looked like Kathy was fine. But deep within her hid a pain from infancy so severe that a cascade of adult life crises finally triggered it. And once it exploded, the pain was unbearable. Kathy was suffering attachment disorder, a psychological condition potentially affecting almost half the US population. Caused by traumatic stress in the first three years of life, attachment disorder correlates with the nation's 50 percent divorce rate and widespread mental health issues. Yet no one talks about its prevalence, so many sufferers go untreated, forced to live with their pain in silence-without a hint of its cause. This was certainly true for Kathy. But when her initial forays into psychiatric help failed, Kathy decided to treat herself. It was a mistake that almost cost her life. Told with candor and quirky, ironic humor, Don't Try This Alone will resonate with anyone suffering attachment damage. It knows no boundaries; it strikes those who believe they had wonderful childhoods as well as the obviously abused. Yet there's hope! Kathy's story also shows: help and healing are out there.

If only you could control the outcome... No parent imagines their tiny infant growing up to have an addiction. Your once precious child now makes frightening choices and takes terrifying risks. You are worried your son or daughter's use of drugs or alcohol has reached a sufficient level of concern that you are exploring or have already admitted your adult child to treatment. You are hard-wired as a parent to love, provide, protect, nurture, and rescue your young, just like every other mammal. You've ranted and punished, cried and pleaded, and it may have felt like nothing seemed to matter. Yet here you are, trying to learn what you can do to support your loved one without revealing the resentments, doubts, fears, and expectations you harbor. Must it get even worse before it gets better?

A NEW YORK TIMES BESTSELLER More people than ever before see themselves as addicted to, or recovering from, addiction, whether it be alcohol or drugs, prescription meds, sex, gambling, porn, or the internet. But despite the unprecedented attention, our understanding of addiction is trapped in unfounded 20th century ideas, addiction as a crime or as brain disease, and in equally outdated treatment.

Challenging both the idea of the addict's "broken brain" and the notion of a simple "addictive personality," The New York Times Bestseller, Unbroken Brain, offers a radical and groundbreaking new perspective, arguing that addictions are learning disorders and shows how seeing the condition this way can untangle our current debates over treatment, prevention and policy. Like autistic traits, addictive behaviors fall on a spectrum -- and they can be a normal response to an extreme situation. By illustrating what addiction is, and is not, the book illustrates how timing, history, family, peers, culture and chemicals come together to create both illness and recovery- and why there is no "addictive personality" or single treatment that works for all. Combining Maia Szalavitz's personal story with a distillation of more than 25 years of science and research, Unbroken Brain provides a paradigm-shifting approach to thinking about addiction. Her writings on radical addiction therapies have been featured in The Washington Post, Vice Magazine, The Wall Street Journal, and The New York Times, in addition to multiple other publications. She has been interviewed about her book on many radio shows including Fresh Air with Terry Gross and The Brian Lehrer show.

This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

"When an investigation into a series of mysterious deaths leads agents to an elite prep school for rebellious kids, MI6 assigns Alex Rider to the case. Before he knows it, Alex is hanging out with the sons of the rich and powerful, and something feels wrong. These former juvenile delinquents have turned well-behaved, studious--and identical--overnight. It's up to Alex to find out who is masterminding this nefarious plot, before they find him." --Provided by publisher.

This is a book of reflections by A.A. members for A.A. members. It was first published in 1990 to fulfill a long-felt need within the Fellowship for a collection of reflections that moves through the calendar year--one day at a time. Each page contains a reflection on a quotation from A.A. Conference-approved literature, such as Alcoholics Anonymous, Twelve Steps and Twelve Traditions, As Bill Sees It and other books. These reflections were submitted by members of the A.A. Fellowship who were not professional writers, nor did they speak for A.A. but only for themselves, from their own experiences in sobriety. Thus the book offers sharing, day by day, from a broad cross section of members, which focuses on the Three Legacies of Alcoholics Anonymous: Recovery, Unity and Service. Daily Reflections has proved to be a popular book that aids individuals in their practice of daily meditation and provides inspiration to group discussions even as it presents an introduction for some to A.A. literature as a whole.

There is a real security gap in the world today. Millions of people in regions like the Middle East or East and Central Africa or Central Asia where new wars are taking place live in daily fear of

violence. Moreover new wars are increasingly intertwined with other global risks the spread of disease, vulnerability to natural disasters, poverty and homelessness. Yet our security conceptions, drawn from the dominant experience of World War II and based on the use of conventional military force, do not reduce that insecurity; rather they make it worse. This book is an exploration of this security gap. It makes the case for a new approach to security based on a global conversation- a public debate among civil society groups and individuals as well as states and international institutions. The chapters follow on from Kaldors path breaking analysis of the character of new wars in places like the Balkans or Africa during the 1990s. The first four chapters provide a context; they cover the experience of humanitarian intervention, the nature of American power, the new nationalist and religious movements that are associated with globalization, and how these various aspects of current security dilemmas have played out in the Balkans. The last three chapters are more normative, dealing with the evolution of the idea of global civil society, the relevance of just war theory in a global era, and the concept of human security and what it might mean to implement such a concept. This book will appeal to all those interested in issues of peace and conflict, in particular to students of politics and international relations.

This work provides a survey of the jewellery of Roman Britain. Fully illustrated and accessible to both the specialist and amateur enthusiast, it surveys the full range of personal ornament worn in Britain during the Roman period, the 1st to 4th centuries AD. It emphasizes the presence of two distinct cultural and artistic traditions, the classical element introduced by the Romans and the indigeneous Celtic background. The interaction of these traditions affected all aspects of Romano-British life and is illustrated in the jewellery.; The meaning and significance of personal ornament in a wide range of cultures is discussed, including such matters as symbolism and the display of wealth and status. The principal types of Romano-British jewellery are classified in detail, drawing attention to those which can be relatively closely dated. The coverage is not restricted to precious-metal objects, but includes jewellery made of base metals and materials such as bone, jet and glass. The final chapter is devoted to the techniques of manufacture, a subject which has become better understood in recent years as a result of scientific advances. The book should appeal to anyone who practices, teaches or studies Roman archaeology, together with all those with a professional or amateur interest in the history of jewellery and design.

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract’s legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: “Life is negotiation!” No one ever stated it better. As a mother with young children and as a company leader, the executive realized

that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator.
