"Magpie Murders is a double puzzle for puzzle fans, who don't often get the classicism they want from contemporary thrillers." --Janet Maslin, The New York Times

From the New York Times bestselling author of Moriarty and Trigger Mortis, this fiendishly brilliant, riveting thriller weaves a classic whodunit worthy of Agatha Christie into a chilling, ingeniously original modern-day mystery. When editor Susan Ryeland is given the manuscript of Alan Conway's latest novel, she has no reason to think it will be much different from any of his others. After working with the bestselling crime writer for years, she's intimately familiar with his detective, Atticus Pünd, who solves mysteries disturbing sleepy English villages. An homage to queens of classic British crime such as Agatha Christie and Dorothy Sayers, Alan's traditional formula has proved hugely successful. So successful that Susan must continue to put up with his troubling behavior if she wants to keep her job. Conway's latest tale has Atticus Pünd investigating a murder at Pye Hall, a local manor house. Yes, there are dead bodies and a host of intriguing suspects, but the more Susan reads, the more she's convinced that there is another story hidden in the pages of the manuscript: one of real-life jealousy, greed, ruthless ambition, and murder. Masterful, clever, and relentlessly

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant

delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade. In this volume, *Traumatic Narcissism: Relational Systems of Subjugation*, Daniel Shaw presents a way of understanding the traumatic impact of narcissism as it is engendered developmentally, and as it is enacted relationally. Focusing on the dynamics of narcissism in interpersonal relations, Shaw describes the relational system of what he terms the 'traumatizing narcissist' as a system of subjugation – the objectification of one person in a relationship as the means of enforcing the dominance of the subjectivity of the other. Daniel Shaw illustrates the workings of this relational system of subjugation in a variety of contexts: theorizing traumatic narcissism as an intergenerationally transmitted relational/developmental trauma; and exploring the clinician's experience working with the adult children of traumatizing narcissists. He explores the relationship of cult leaders and their followers, and examines how traumatic narcissism has lingered vestigially in some aspects of the psychoanalytic profession. Bringing together theories of trauma and attachment, intersubjectivity and complementarity, and the rich clinical sensibility of the Relational Psychoanalysis tradition, Shaw demonstrates how narcissism can best be understood not merely as character, but as the result of the specific trauma of subjugation, in which one person is required to become

the object for a significant other who demands hegemonic subjectivity. Traumatic Narcissism presents therapeutic clinical opportunities not only for psychoanalysts of different schools, but for all mental health professionals working with a wide variety of modalities. Although primarily intended for the professional psychoanalyst and psychotherapist, this is also a book that therapy patients and lay readers will find highly readable and illuminating.
