

Hospitality Facilities Management And Design

"Accessibly written and thoughtfully edited, making it essential reading for those studying hospitality and embarking on a career in the industry." - Peter Lugosi, Oxford School of Hospitality Management "This text is a fascinating read... Roy Wood has spent 25 years teaching, researching and writing on the hospitality industry - much of that learning is here in this book." - Erwin Losekoot, Auckland University of Technology "All different aspects of the hospitality industry are elaborated on... All in all a wonderful course book for for our students!" - Claudia Rothwangl, ITM College This book covers the major concepts students are likely to encounter throughout their study within the hospitality management, giving a comprehensive and up-to-date overview as well as providing engaging everyday examples from around the world. A leading figure in the field, Roy Wood has successfully gathered international contributors with direct experience of hospitality management and the hospitality industry as a whole, ensuring the academic, geographical and practical integrity of the book. Key Concepts in Hospitality Management is written for undergraduate students and those studying short postgraduate or executive education courses in hospitality management, events management, tourism management and leisure management.

From restaurants to resorts, the hospitality industry demands strong operations management to delight guests, develop employees, and deliver financial returns. This introductory textbook provides students with fundamental techniques and tools to analyse and improve operational capabilities of any hospitality organization.

The book addresses topics such as tourism education and its development in the latter part of the twentieth century, taking "tourism" to be a broader field than "hospitality." Updated to include the current models, theories, and hospitality practices, Hospitality Strategic Management: Concept and Cases, Second Edition is a comprehensive guide to strategic management in the international hospitality industry. Author Cathy A. Enz uses the case study approach to cover current topics such as innovation, entrepreneurship, leadership, ethics, and franchising. Eight full case studies with exhibits and documents address the areas of lodging, food service, tourism e-commerce, gaming, cruise lines, and airlines, making this book ideal for executive level training courses or hospitality industry executives interested in developing their strategic management skills.

Course Description: Provides hospitality managers and students with information they need to know to manage the physical plant of a hotel or restaurant and work effectively with the engineering and maintenance department. This detailed textbook shows students how to keep every area of a hotel property running smoothly. The book takes a systems approach to hospitality facilities issues, while also providing a summary based on functional spaces within a property. The fourth edition of Hospitality Facilities Management and Design has been thoroughly revised and updated. There are new exhibits and new industry examples throughout the book. Case studies were added as needed.

Using a combination of theoretical discussion and real-world case studies, this book focuses on current and future use of RAISA technologies in the tourism economy, including examples from the hotel, restaurant, travel agency, museum, and events industries.

Following a successful debut edition, this new Second Edition of Managerial Accounting for the Hospitality Industry builds on its strengths of clear organization and the ease with which students work through it. This new edition includes more basic math support for students and a more developed inclusion of ethical considerations and global changes both in accounting systems and in the hospitality industry.

A Practical, Strategic Approach to Managerial Communication Managerial Communication: Strategies and Applications focuses on communication skills and strategies that managers need to be successful in today's workplace. Known for its holistic overview of communication, solid research base, and focus on managerial competencies, this text continues to be the market leader in the field. In the Seventh Edition, author Geraldine E. Hynes and new co-author Jennifer R. Veltsos preserve the book's strategic perspective and include new updates to reflect the modern workplace. The new edition adds a chapter on visual communication that explains how to design documents, memorable presentations, and impactful graphics. New coverage of virtual teams, virtual presentations, and online communication help students avoid common pitfalls when using technology.

Developing Hospitality Properties and Facilities sets out some of the key issues in developing hospitality properties from the hospitality manager's perspective. From the original concept, through each part of the process, it provides an essential guide for students and professionals on how to manage hospitality facilities to their best effect, using a model-based insight into the process in an informed, but non-technical way. Now in its second edition, this successful text has been updated with new international case studies from companies such as MyTravel, Disneyland Paris Hotel, Elysium Beach Resort Cyprus and many others. It also includes new chapters from well-known authors. With contributions from both academics and practitioners, this book looks at design, building issues, operational relationships, and therefore provides the hospitality manager with insight into how these areas work and what they need to know in order to get the best out of them.

Facilities planning for tourism, hospitality and events (THE) is an important subject from both theoretical and applied perspectives, as land, property and resources represent major components of the foundation of the industry. As future managers, it is imperative that students have a sound basic knowledge of property and the various resources, systems and services associated with it. Covering important contemporary subjects such as sustainable planning and environmental management, this book considers the planning, development and management of facilities operations from several key perspectives, drawing upon the expertise of complementary experts in the design, management and development of THE facilities.

Although workplace design and management are gaining more and more attention from modern organizations, workplace research is still very fragmented and spread across multiple disciplines in academia. There are several books on the market related to workplaces, facility management (FM), and corporate real estate management (CREM) disciplines, but few open up a theoretical and practical discussion across multiple theories from different disciplines. Therefore, workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied. A lot of knowledge is lost between disciplines, and sadly, many insights do not reach workplace managers in practice. Therefore, this new book series is started by associate professor Rianne Appel-Meulenbroek (Eindhoven University of Technology, the Netherlands) and postdoc researcher Vitalija Danivska (Aalto University, Finland) as editors, published by Routledge. It is titled 'Transdisciplinary Workplace Research and Management' because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice. The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace-related issues in practice, such as knowledge worker productivity, office use, and more strategic management. In addition, the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice. This book series is relevant for workplace

experts both in academia and industry. This second book in the series focuses on the role of workplace management in the organization and the tasks that workplace management needs to consider. The 18 theories that are presented in this book and applied to workplace research discuss management aspects from the organization's perspective or dive deeper into issues related to people and/or building management. They all emphasize that workplace management is a complex matter that requires more strategic attention in order to add value for various stakeholders. The final chapter of the book describes a first step towards integrating the presented theories into an interdisciplinary framework for developing a grand workplace management theory. This text provides an overview of the interdisciplinary nature of facilities management. It discusses the framework within which facilitates managers should operate and the key requirements of their task.

This book begins by outlining the common design mistakes with the modern open plan office and the industry focus on cost that has resulted in the ill-fated Workplace Zoo. The requirements of office-based workers according to psychological theory and research are then explained. Dr Oseland references historical studies in psychophysics to describe how to design environmental conditions (acoustics, lighting, temperature, indoor air quality) that enhance performance by supporting basic physiological needs. More contemporary research in environmental psychology investigates how cognition affects our interpretation and response to physical stimuli depending on personality, context, attitude and other personal factors. This in turn informs individual requirements for the environmental conditions as well as group needs. Studies in evolutionary psychology and biophilia are also referenced. The latter part of the book turns to workplace solutions and focuses on how to plan, design and manage offices to accommodate our innate human needs now and in the future. The importance of designing for inclusivity is also recognised, including accommodating cultural, gender and generational differences along with designing spaces for neurodiversity. Dr Oseland's proposed workplace solution the Landscaped Office is a revived and revised version of Bürolandschaft with a contemporary twist. The impact of workplace trends, such as agile working and hot-desking, is also explored and found to complement the workplace solution, resulting in the Agile Landscaped Office. This book is key reading for professionals, and post-graduate students, in business, interior design, architecture, surveying, facilities management, building services engineering, HR and organisational or environmental psychology.

Strategic Management for Hospitality and Tourism is a vital text for all those studying cutting edge theories and views on strategic management. Unlike others textbooks in this area, it goes further than merely contextualizing strategic management for hospitality and tourism, and avoids using a prescriptive, or descriptive approach. Modern organisations are subject to continual change – technologies evolve, organisational structures are modified, people and underlying cultures are transformed. Yet the facilities that organisations occupy are static and can impede the changes that are essential to organisational survival. The response to change in terms of property and support services is often too little too late – leading to facilities that do not support organisational reality. The facilities management team is thus constantly challenged to bridge the gap between what an organisation has and what it needs. Facilities Change Management is a practical evaluation of the management of change for facilities managers and related professions. It considers: the forces of change affecting facilities decisions the obstacles to change at a resource level and human level the effective implementation of change the human aspect of change Each of these is considered in relation to modern facilities management issues. The discussion will enable practising facilities managers, project managers, surveyors, service providers and architects to understand, engage with and manage facilities change effectively at a strategic level. Through real-life case studies it demonstrates the complexities of change and hidden elements of change that may undermine carefully planned projects.

This book series is relevant for workplace experts both in academia and industry. This first book in the series focuses on the employee as a user of the work environment. The 21 theories discussed and applied to workplace design in this book address people's ability to do their job and thrive in relation to the office workplace. Some focus more on explaining why people behave the way they do (the psychosocial environment), while others take the physical and/or digital workplace quality as a starting point to explain employee outcomes such as health, satisfaction, and performance. They all explain different aspects for achieving employee-workplace alignment (EWA) and thereby ensuring employee thriving. The final chapter describes a first step towards integrating these theories into an overall interdisciplinary framework for eventually developing a grand EWA theory. 'Hospitality Retail Management' provides students and managers with a practical guide to managing units in hospitality retail organizations. Customers rely on a particular chain of hotels, restaurants or pubs to provide the same level of service and environment across the board. This standardised service provides the customer with the security of knowing what to expect from that particular organisation. However, this standardisation allows little room for creativity for individual managers to respond to the particular needs of their local market. There is a growing realisation that there is greater profitability if the chain can offer both standardised services across all its retail operations while at the same time allowing local managers the freedom to interpret the needs of its local market as they see fit. 'Hospitality Retail Management' shows managers and students how competitive advantage can be gained by adopting management techniques which are both 'tight and loose', and demonstrates how you can manage businesses with well-defined objectives while also allowing local managers to interpret their local market as they see fit. Conrad Lashley has done extensive consultancy with companies such as McDonalds and uses case studies from these companies to reiterate key issues throughout the text.
