How will the world end? Doomsday ideas in Western history have been both persistent and adaptable, peaking at various times, including in modern America. Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event. The views expressed in these polls have been reinforced by the market process. Whether through purchasing paperbacks or watching television programs, millions of Americans have expressed an interest in end-time events. Americans have a tremendous appetite for prophecy, more than nearly any other people in the modern world. Why do Americans love doomsday? In *Apocalyptic Fever*, Richard Kyle attempts to answer this question, showing how dispensational premillennialism has been the driving force behind doomsday ideas. Yet while several chapters are devoted to this topic, this book covers much more. It surveys end-time views in modern America from a wide range of perspectives--dispensationalism, Catholicism, science, fringe religions, the occult, fiction, the year 2000, Islam, politics, the Mayan calendar, and more.

More than 150 years have passed since the apocalypse that nearly destroyed the Earth. Today, the planet is a torn remnant of its former glory, ravaged by nuclear fallout and mutagens. New lifeforms – Mutants and Synthetics – challenge True Humanity for dominance, while warring factions compete for survival and supremacy, and all must carve out their place in this brutal landscape, or else perish as billions before them. *Scrappers* is skirmish miniatures

game set in the wastelands, where players assemble Scrapper Crews and send them out to scavenge scraps of Ancient technology and battle rival factions. Explorers, cultists and raiders clash with mutated creatures, robotic soldiers and embittered True Humans in this wargame of salvage and survival in the ruins of the future.

From the two-time Pulitzer Prize-winning author of *The Underground Railroad* and *The Nickel Boys* A pandemic has devastated the planet, sorting humanity into two types: the uninfected and the infected, the living and the living dead. After the worst of the plague is over, armed forces stationed in Chinatown's Fort Wonton have successfully reclaimed the island south of Canal Street—aka Zone One. Mark Spitz is a member of one of the three-person civilian sweeper units tasked with clearing lower Manhattan of the remaining feral zombies. Zone One unfolds over three surreal days in which Spitz is occupied with the mundane mission of straggler removal, the rigors of Post-Apocalyptic Stress Disorder (PASD), and the impossible task of coming to terms with a fallen world. And then things start to go terribly wrong... At once a chilling horror story and a literary novel by a contemporary master, *Zone One* is a dazzling portrait of modern civilization in all its wretched, shambling glory. **NEW YORK TIMES BESTSELLER** • An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013–2014 Ebola epidemic “Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying.”—Elizabeth Kolbert, Pulitzer Prize–winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end—as the virus mutated into its deadliest form, and spread farther and faster than ever before—30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the pandemic, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict—physical, emotional, and ethical—Crisis in the Red Zone is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. Crisis in the Red Zone makes clear that the outbreak of 2013–2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. Crisis in the Red Zone is an exquisitely timely book, a stark warning of viral outbreaks to come.

South Africa—“reminiscent of *The Stand* and *The Passage*” (Stephen King). Nico Storm and his father, Willem, drive a truck filled with essential supplies through a desolate land. They are among the few in the world, as far as they know, to have survived a devastating virus that has swept over the planet. In this new reality, Nico realizes that his superb marksmanship and cool head mean he is destined to be his father’s protector, even though he is still only a boy. Willem Storm, though not a fighter, is a wise and compassionate man with a vision for a new community that survivors will rebuild from the ruins. And so Amanzi is founded, drawing Storm’s “homeless and tempest-tost”—starting with Melinda Swanevelder, whom they rescue from brutal thugs; Hennie Fly, with his vital Cessna plane; Beryl Fortuin and her ragtag group of orphans; and Domingo, the man with the tattooed hand. Then Sofia Bergman arrives, the most beautiful girl Nico has ever seen, who changes everything. As the community grows, so do the challenges they face—not just from the attacks of biker brigands, but also from within. Looking back later in life, Nico recounts the traumatic events that led to the greatest rupture of all—the murder of the person he loves most. “Compelling, action-packed and fraught with emotion . . . bears favourable comparison with landmarks of the genre such as Stephen King’s *The Stand* and Cormac McCarthy’s *The Road*. Simply stunning.” —John Coates, *Express* (UK) “Great stuff.” —Stephen King

Nicholas Platt walks into an international sales conference unaware that he's just set foot on ground zero of the impending apocalypse. Forced into a high-octane battle for survival, Nick and three strangers fight to endure the clutches of a multi-layered nightmare, an apocalyptic nightmare too diabolical for even the machines to fathom. From the famed San Diego Conference Center to the waters of the Pacific Ocean to a charming little island in Newport Beach, this edge-of-your-seat, post-apocalyptic thriller pits Indigo's father, Nick, against not only the machines, but against the twisted eccentricities of man. The fall of civilization to the machines has never been more real... The President of the United States realizes he's caught in the middle of a coup d'état when members of his cabinet and his security detail turn on him. This book offers analyses of the roles of race, gender, and sexuality in the post-apocalyptic visions of early twenty-first century film and television shows. Contributors examine the production, reproduction, and re-imagination of some of our most deeply held human ideals through sociological, anthropological, historical, and feminist approaches.

The Cobra Event is set in motion one spring morning in New York City, when a seventeen-year-old student wakes up feeling vaguely ill. Hours later she is having violent seizures, blood is pouring out of her nose, and she has begun a hideous process of self-cannibalization. Soon, other gruesome deaths of a similar nature have been discovered, and the Centers for Disease Control sends a forensic pathologist to investigate. What she finds precipitates a federal crisis. The details of this story are fictional, but they are based on a scrupulously thorough inquiry into the history of biological weapons and their use by civilian and military terrorists. Richard Preston's sources include members of the FBI and the United States military, public health officials, intelligence officers in foreign governments, and scientists who have been involved in the testing of strategic bioweapons. The accounts of what they have seen and what they expect to happen are chilling. The Cobra Event is a dramatic, heart-stopping account of a very real threat, told with the skill and authority that made Preston's *The Hot Zone* an internationally

"For readers of *Station Eleven* and *The Passage* comes a dazzling and unsettling novel of psychological suspense. In Alexandra Oliva's thrilling fiction debut, survival is the name of the game, as the line blurs between reality TV and reality itself--and one woman's mind and body are pushed to the limit. She wanted an adventure. She never imagined it would go this far. It begins with a reality TV show. Twelve contestants are sent into the woods to face challenges that will test the limits of their endurance. While they are out there, something terrible happens--but how widespread is the destruction, and has it occurred naturally or is it man-made? Cut off from society, the contestants know nothing of it. When one of them--a young woman the show's producers call Zoo--stumbles across the devastation, she can imagine only that it is part of the game. Alone and disoriented, Zoo is heavy with doubt regarding the life--and husband--she left behind, but she refuses to quit. Staggering countless miles across unfamiliar territory, Zoo must summon all her survival skills--and learn new ones as she goes. But as her emotional and physical reserves dwindle, she grasps that the real world might have been altered in terrifying ways--and her ability to parse the charade will be either her triumph or her undoing. Sophisticated and provocative, *The Last One* is a novel that forces us to confront the role that media plays in our perception of what is real: how readily we cast our judgments, how easily we are manipulated. Advance praise for *The Last One*: "The Last One seamlessly melds two of our contemporary obsessions--the threat of global catastrophe and the staged drama of reality TV--into a fiercely imagined tale of the human psyche under stress. This is an uncompromising, thought-provoking debut."--Justin Cronin. "Haunting, moving, and remarkable, Alexandra Oliva's debut novel is clever in its concept and gripping in its delivery.

While no one looks forward to what comes after Doomsday, author K. Scott Bradbury prompts readers to consider what will happen and how to mentally and physically prepare. In his debut work of nonfiction, *The Post-Apocalyptic Primer*, he examines what life might look like after the end of the world and it's not as abysmal as some might fear. In ten chapters including: *Assessing Your Existing Survival Skills*, *Civilization After the Fall of Civilization*, and *Eat, Drink, and Be Wary*, Bradbury offers commonsense strategies that exponentially boost one's chances of a bright future. Among other Apocalyptic scenarios, he describes what one might expect after a seismic catastrophe, an ice age event, nuclear war, and alien invasion as well as the stages of disorder, which he breaks down into Instant, Coming Soon, and Slow-Burn events. Where someone lives makes a big difference, but besides new threats, there are also new careers, new hobbies, and a whole new adventure, the only trick is to be ready for it.
