Many hospitality companies have begun to recognise the benefits of having a diverse group of decision-makers. When it comes to drafting strategies to increase revenue and better penetrate and service target markets in different communities, it helps to have fresh sets of eyes. This enables companies to tap into target markets more effectively, which benefits all parties. A successful strategy needs to make diversity part of the common vision, get buy-in from stakeholders, provide a sense of purpose, and encourage commitment across the organization. Companies should define the key diversity areas that apply to their particular market and employee composition. In addition to gender, ethnicity, LGBTQ status and disability, other dimensions of diversity might be relevant. These include age, marital status, religious beliefs and education. Expand the ideal candidate profile and companies into the organisation in order to expand into that market.

It's been said a thousand times: Indonesia is an unlikely country. Of all the countries of Asia, it is the hardest to corral. There is no point in looking for a shared history prior to the colonial period, or a shared culture, or even a certain uniformity of environment. Divided between over 13,000 islands, hundreds of languages and cultures, several time zones, and spread over an expanse of sea linking Asia with Australasia, it is truly a kaleidoscopic place.

In a rapidly advancing era, a fresh look at the concept of hospitality from socio-cultural perspectives is needed. This book proposes that a new paradigm in hospitality has been developed in Asia due to its unique culture, social values and traditions. Based on Kaye Chon's extensive field research and experience teaching in hospitality over three decades, this book provides a historical review of the hospitality industry. In order to continue the sustained growth of the hospitality industry and improve quality, it is vital for the industry to create new business models. A flexible approach should be adopted, using new, and different, ways to enhance business instead of traditional methods which may now be outdated. It is vital that new business models embrace innovation and, at the present time, this means finding ways to implement new technology. The eight chapters in the book are richly detailed with case studies and insights from the author's own experiences, providing cutting-edge perspectives on understanding a new paradigm of hospitality embraced in Asia. Written in an accessible style, this book will be valuable reading to students and practitioners who wish to further understand the rapidly developing hospitality and tourism industries in Asia. It will be a useful resource for those studying hospitality, tourism development, leisure studies, business studies management and the service industries.
