Reservations to Change ,2003

Software Quality and Software Testing in Internet Times Ståle Amland,2002-04-11 This publication deals with two major software quality management challenges. The first one involves how to deliver a software product within a competitive time frame and with a satisfying quality to the customer. The second one concerns how to best deal with the growing complexity of software applications using Internet technology. Due to faster development cycles the quality of an application has to be monitored during operation, since the usage of the application and the technology around it might change from day-to-day. The book compiles experiences from different industries and perspectives. Its goal is to give practical insights into high-tech software development projects of today.

**Daring Choices** James B. Kelly III,2023-12-19 Praise for Daring Choices: Stories From An International Life in Politics, Business, and Technology Jim Kelly's life can best be described as remarkable. Remarkable for its variety, importance, and success. — Jim Roddey, former President, Turner Communications, Inc., former Chief Executive, Allegheny County, Pennsylvania “BDM’s purchase of the German government-owned technology company, IABG, was a unique venture. Can you imagine? A major military industrial country enabling a foreign-owned company to oversee the development and testing of its major defense and aerospace systems? With the help of Jim, and others, it was an unqualified success. — Phil Odeen, former CEO, BDM and Chairman, TRW, Inc. “A remarkable journey and enjoyable read. Jim’s insights into the importance of the CEO and CFO working relationship are invaluable guidance for any CEO building a team.” — Kevin Cheetham, former CFO, SynXis and Custom Inc., Northern Virginia Technology Council Greater Washington 2020 CFO of the Year “Daring Choices is a great read. Jim Kelly personifies what a true entrepreneur with vision, determination, and a plan can accomplish. His SynXis platform was a revolutionary “game changer” in the hotel reservation space. A fragmented reservation network became connected effectively and efficiently resulting in maximum revenue management and control. Today over 50,000 hotels use SynXis. Kudos!” — John Russell, former CEO, Red Lions and Cendant (Wyndham) Hotels, Past Chairman American

Hotel and Lodging Association “In Daring Choices, Jim Kelly provides insights on how he propelled himself from such diverse professional accomplishments as working with Alice Cooper, to participating in negotiations in the Middle East for the Reagan Administration, to becoming a serial software CEO in the hospitality and aviation worlds. Jim's approaches to proactively creating an adventuresome career are instructive indeed.” — Alexander H. Good, former Assistant Secretary of Commerce and head of the U.S. and Foreign Commercial Service in the International Trade Administration, former Executive Vice President, Verizon About the Author James Jim B. Kelly III has had an exciting and adventurous life. An experienced international executive and entrepreneur, he lived in Europe, the Middle East, North Africa, and Asia while directing the global growth of a variety of companies. He founded two software companies, SynXis in the hotel reservation space and Flight Explorer serving aviation. He also served in the political sphere: on Senator Richard S. Schweiker's Washington staff; as a member of the Pennsylvania House of Representatives; and subsequently as a trade official in the Reagan Administration, responsible for economic policy in Africa, the Near East, and South Asia. His stories and the people he met along the way stir the imagination and provide a how-to of what can be done in a lifetime. Jim's eclectic career, diverse life experiences, and unusual encounters with the likes of Charles de Gaulle, the King of Spain, and the President of Algeria, inspire us to live our lives the way we want, journey beyond expectations, and make daring choices. It's your life - make the most of it!

**Software Project Management** S. Ramanathan, 2016-05-03 Software development has turned truly global - with requirement gathering and design at one location and program development at another. Cost advantage has moved more and more of the software life cycle activities to the developing nations like India and the Philippines. While outsourcing, many companies in the US and other Western countries find project management an area that needs improvement in the emerging service provider nations. Processes and teams across different geographical locations make the management all the more challenging. It is precisely this need that this book intends to address. The author has extensive management experience in IT projects in the manufacturing, banking and telecom domains and distills that experience to narrate the project management knowledge areas with real life examples and case studies. Many books and articles have described the challenges faced by the US project manager in dealing with a contractor in another country, but the remedial measures for this skill gap needs to emerge within the cultural context of the service provider nations. This book addresses this challenge primarily from an Indian perspective, which can be extended to many other developing nations. Billions of dollars of US and European projects are now being handled in India and other developing countries and thousands of project managers have to emerge from the talent pools of these countries to efficiently manage this investment. It is with an intent to develop these skills this book has been written.

**Hotel Reservation System** Rashmi Holla,2015 This system will enable customers to book the rooms in the hotel either online or by an automated phone system. When reserving the rooms online, users would be able to select the desired room from the layout of the hotel. After selecting the room, users enter the necessary information to make the reservation. The users can also book rooms for any given dates by calling the number specified in the website. If they have an already existing account with the hotel, then the room can be booked all by themselves else the call would be forwarded to the hotel staff to carry on with the booking process. The system is implemented in J2EE with MySQL database system. For reserving the rooms through automated phone system, I am using Tropo--a third party web service API that connects the code run on my server to the phone network using JSON over HTTP.
