

# How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

Trading for a Living Successful trading is based on three M's: Mind, Method, and Money. Trading for a Living helps you master all of those three areas: \* How to become a cool, calm, and collected trader \* How to profit from reading the behavior of the market crowd \* How to use a computer to find good trades \* How to develop a powerful trading system \* How to find the trades with the best odds of success \* How to find entry and exit points, set stops, and take profits Trading for a Living helps you discipline your Mind, shows you the Methods for trading the markets, and shows you how to manage Money in your trading accounts so that no string of losses can kick you out of the game. To help you profit even more from the ideas in Trading for a Living, look for the companion volume--Study Guide for Trading for a Living. It asks over 200 multiple-choice questions, with answers and 11 rating scales for sharpening your trading skills. For example: Question Markets rise when \* there are more buyers than sellers \* buyers are more aggressive than sellers \* sellers are afraid and demand a premium \* more shares or contracts are bought than sold \* I and II \* II and III \* II and IV \* III and IV Answer B. II and III. Every change in price reflects what happens in the battle between bulls and bears. Markets rise when bulls feel more strongly than bears. They rally when buyers are confident and sellers demand a premium for participating in the game that is going against them. There is a buyer and a seller behind every transaction. The number of stocks or futures bought and sold is equal by definition.

A streamlined and highly effective approach to trading without indicators Most forex traders rely on technical analysis books written for stock, futures, and option traders. However, long before computers and calculators, traders were trading naked. Naked trading is the simplest (and oldest) trading method. It's simply trading without technical indicators, and that is exactly what this book is about. Traders who use standard technical indicators focus on the indicators. Traders using naked trading techniques focus on the price chart. Naked trading is a simple and superior way to trade and is suited to those traders looking to quickly achieve expertise with a trading method. Offers a simpler way for traders to make effective decisions using the price chart Based on coauthor Walter Peters method of trading and managing money almost exclusively without indicators Coauthor Alexander Nekritin is the CEO and President of TradersChoiceFX, one of the largest Forex introducing brokers in the world Naked Forex teaches traders how to profit the simple naked way!

Patterns can be any number of items that occur repeatedly, whether in the behaviour of animals, humans, traffic, or even in the appearance of a design. As technologies continue to advance, recognizing, mimicking, and responding to all types of patterns becomes more precise. Pattern Recognition and Classification in Time Series Data focuses on intelligent methods and techniques for recognizing and storing dynamic patterns. Emphasizing topics related to artificial intelligence, pattern management, and algorithm development, in addition to practical examples and applications, this publication is an essential reference source for graduate students, researchers, and professionals in a variety of computer-related disciplines. Made famous by the Italian mathematician Leonardo De Pisa, the Fibonacci number series holds a Golden Ratio that is universally found in nature and used by architects, plastic surgeons, and many others to achieve "perfect" aesthetic proportions. Now, in this groundbreaking guide, noted technical trading advisor Carolyn Boroden shows you how Fibonacci pattern studies can be used as an extremely effective method for achieving greater profitability in stocks, futures, and Forex markets. Fibonacci Trading provides a one-stop

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

resource of reliable tools and clear explanations for both identifying and taking advantage of the trade setups naturally occurring in the markets that will enable you to reach the highest rate of profitable trades. Inside, you'll find a unique trading methodology based on Fibonacci ratios, and the author's personal experience analyzing and setting up the markets in real time, which makes this practical volume invaluable to the self-directed investor. Complete with detailed charts and insightful graphics in each chapter, Fibonacci Trading features: Dependable guidance for determining important support and resistance levels, along with expert advice for using them to maximize profits and limit losses Step-by-step processes for using Fibonacci analysis to predict turning points in the market far enough in advance to generate substantial profit Valuable tips for using Fibonacci analysis to establish optimal stop-loss placement Revealing coverage on how Fibonacci relationships can create a roadmap for the trader based on high percentage patterns Fibonacci Trading also provides a four-step formula for applying the covered techniques in a highly effective approach. Flexible enough for all markets and trading styles, the formula helps you focus your newly developed knowledge and skill sets into a solid trading methodology, defined trading plan, successful trading mindset, and disciplined trading approach that stacks the odds for profit in your favor. This hands-on guide is packed with a wealth of actual trading situations, setups, and scenarios that bring the four-step formula to life so you can immediately use it in the real world.

\*This is a COLOR PRINT book\*Institutions move and manipulate the markets. Order Flow allows you to track the institutions and trade along with them!In this book you will learn: - Choosing the right trading platform for Order Flow trading- NinjaTrader 8 platform - introduction- Choosing the right Order Flow software- Where to get data for Order Flow- The best instruments to trade with Order Flow- Order Flow - what it tells us- Order Flow - special features- How to set up Order Flow workspace- Order Flow - trading setups- Order Flow - confirmation setups- How to use Order Flow to determine your Take Profit and Stop Loss- How to use Order Flow for trade management- How to find strong institutional Supports and Resistances using Volume Profile- How to combine Order Flow with Volume Profile The "Voice of Foreign Exchange" is a series of expert advisor books reinventing the "Elliott Wave Theory" using modern data communications formula. The formulas, I discovered in 2009-2010, led a Russian telecommunications specialist to victory in the 2011 MQL4 competition. I will explain, in layman's terms, how Electronic Data Communication Networks (ECN) operate, the protocols used, and how those networks impact all Forex Trading Methods, Investment for MT4 or MT5 Trading System, Forex Technical Trading Strategies, and MQL4 or MQL5 Expert Advisors (EA) programming. I'll show you how to troubleshoot and discover your MT4/5 connections to your ForEx Investment Broker. I have read thousands of articles and books on Foreign Exchange (ForEx), and no one takes into consideration what I reveal in this book series. "What an arrogantly bold statement ...", you must be thinking? Here's my challenge; begin reading as many (FREE) articles, forum posts and books (the free samples?) as you are able before I complete this book SERIES in the next several weeks (target publication date is February 2017). Establish, in your own mind, what's available today in all the current Expert Advisors for ForEx, then read this book and supporting programming supplements and use my Expert Advisors from my tutorials in Chapter 5 and 6 -- or build your own from the instructions I provide. This book and supporting pamphlet series demonstrates the "A-patchy ForEx" MQL programming shell and how to insert any of the eight (8) Expert Advisors provided in this series of instruction.

With the exponential growth of program trading in the global financial industry, quantum finance and its underlying technologies have become one of the hottest topics in the fintech community. Numerous financial institutions and fund houses around the world require computer professionals with a basic understanding of quantum finance to develop intelligent financial systems. This book presents a selection of the author's past 15 years' R&D work

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

and practical implementation of the Quantum Finance Forecast System – which integrates quantum field theory and related AI technologies to design and develop intelligent global financial forecast and quantum trading systems. The book consists of two parts: Part I discusses the basic concepts and theories of quantum finance and related AI technologies, including quantum field theory, quantum price fields, quantum price level modelling and quantum entanglement to predict major financial events. Part II then examines the current, ongoing R&D projects on the application of quantum finance technologies in intelligent real-time financial prediction and quantum trading systems. This book is both a textbook for undergraduate & masters level quantum finance, AI and fintech courses and a valuable resource for researchers and data scientists working in the field of quantum finance and intelligent financial systems. It is also of interest to professional traders/ quants & independent investors who would like to grasp the basic concepts and theory of quantum finance, and more importantly how to adopt this fascinating technology to implement intelligent financial forecast and quantum trading systems. For system implementation, the interactive quantum finance programming labs listed on the Quantum Finance Forecast Centre official site (QFFC.org) enable readers to learn how to use quantum finance technologies presented in the book. Your plain-English guide to currency trading *Currency Trading For Dummies* is a hands-on, user-friendly guide that explains how the foreign exchange (Forex) market works and how you can become a part of it. The awareness of this world that lies behind the markets will guarantee you an immense advantage, you will begin to make statistically motivated decisions, and this will undoubtedly lead you to an increase in your earnings.

"Trading Systems" offers an insight into what a trader should know and do in order to achieve success on the markets.

NEW EDITION! (October 2018). The proven system of trade--based on Structural Target Patterns (ST Patterns)--presented in this book is able to bring a monthly profit equal to 100% or more (on average) of the deposit amount. To be successful in today's

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

Forex, Futures, Indices, Commodities and other liquid markets, most of the knowledge and trading techniques accumulated over the last two centuries are not needed at all. The technical portion of a profitable trading system only needs to include the ST Patterns strategy. This method of assessing market movements by using target models gives traders clear and unambiguous signals regarding their actions in the present moment. The graphic figures presented here build upon each other iteratively to create a clear picture of market conditions. Unlike the claims of the most popular technical and fundamental analysis methods, the trading system in this book does not predict market behavior. I no longer need any predictions about prices because their movements have become obvious to me. Following the ST Patterns method, managing trading positions becomes simple. It took me many years to establish and improve this trading system, and now it is ready to be used by you. I believe that, at the very least, this book can save traders' time and money. You can spend a whole lifetime in search of the Holy Grail, but it is possible to solve the problems associated with trading in just a few days. The present determines the future! Opportunities to use ST patterns are included in the free preview of the first pages of this book. Note: This book (ISBN: 1719837384). is with a color interior. You can also buy a book (ISBN: 1719859833) with black & white interior. The month following the book's «Trading Code is Open» publication perfectly demonstrated the possibilities of using the trading system and showed how almost half of the ST Patterns published in this book operate in practice. The technical analysis presented in «Forex Strategy: ST Patterns Trading Manual, EUR/USD Chart Analysis Step by Step, 300% for One Month» book, based on accurate calculations, will help traders consolidate the acquired knowledge, and to increase their own skills with Structural Target Patterns. The study of the GBP/USD pair will help readers understand the importance of determining periods of market uncertainty in a timely fashion. To demonstrate the flexibility of the strategy settings and the formation of short-term uncertainty periods, the EUR/USD pair is shown on five-minute charts in one working day on May 31. For nine hours of work, the result was approximately + 82% of the initial deposit.

Evidence-Based Technical Analysis examines how you can apply the scientific method, and recently developed statistical tests, to determine the true effectiveness of technical trading signals. Throughout the book, expert David Aronson provides you with comprehensive coverage of this new methodology, which is specifically designed for evaluating the performance of rules/signals that are discovered by data mining. How to trade the markets by integrating Chaos Theory with market sentiment In the first edition of Trading Chaos, seasoned trader and psychologist Bill Williams detailed the potential of Chaos Theory-which seeks to make the unpredictable understandable-in trading and it revolutionized financial decision-making. The Second Edition of Trading Chaos is a cutting edge book that combines trading psychology and Chaos Theory and its particular effect on the markets. By examining both of these facets in relation to the current market, readers will have the best of all possible worlds when trading. Bill Williams, PhD, CTA (Solana Beach, CA), is President of Profitunity.com, a leader in the field of education for traders and investors. Justine Gregory-Williams (Solana Beach, CA) is President of the Profitunity Trading Group and a full-time trader.

Cutting-edge insight from the leader in trading technology In Cybernetic Analysis for Stocks and Futures, noted technical analyst John Ehlers continues to enlighten readers

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

on the art of predicting the market based on tested systems. With application of his engineering expertise, Ehlers explains the latest, most advanced techniques that help traders predict stock and futures markets with surgical precision. Unique new indicators and automatic trading systems are described in text as well as Easy Language and EFS code. The approaches are universal and robust enough to be applied to a full range of market conditions. John F. Ehlers (Santa Barbara, CA) is President of MESA Software ([www.mesasoftware.com](http://www.mesasoftware.com)) and has also written Rocket Science for Traders (0-471-40567-1) as well as numerous articles for Futures and Technical Analysis of Stocks & Commodities magazines.

Expert Advisor Programming Creating Automated Trading Systems in MQL for MetaTrader 4 Using the insights that stem from value charts and price action profiles, Dynamic Trading Indicators shows traders how to develop systems and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, Dynamic Trading Indicators provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research new trading system technology. David C. Stendahl is cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of Profit Strategies: Unlocking Trading Performance with Money Management.

Development of indicators and advisors using the MQL5 programming language for the platform MetaTrader 5

50 Pips A Day Forex Strategy Start making consistent profits in the forex market. This is a very clear and simple to follow forex trading strategy to get you started achieving consistent profits day after day trading the forex market. It will make you 50 pips per day or more every day. It is ideal for beginner traders but it will give a great deal of help to more experienced traders that have not found a clear strategy to make profits consistently. Components Support and Resistance Candlesticks Moving Average Time frame - 4 hours chart It is easy to understand and to put in practice. It has very well defined entry, stop loss and exit levels. Apart from the strategy, this book also contains a very useful guide that teaches you how to construct a profitable forex trading system for yourself and how to avoid trading and money management mistakes. How to Build a Solid Trading System Are you new to forex trading or just started to trade on a live account but with not much success ? You need a solid forex trading system based on sound principles of the forex market, that has clear trading and money management rules. Do you have a forex trading system and you have been trading with it for a period of time but still you don't have the success you hoped for ? This can only mean that your trading system does not take into account the basic trading rules and principles that any powerful forex trading system incorporates. This book teaches you how to construct your own powerful forex trading system, what are the most important forex trading tools that you must include in it, what not to include in your forex trading system, how to apply solid money management rules and equally important, how to avoid making trading mistakes that will cost you when you start to

trade with your newly developed forex system.

A fully revised second edition of the best guide to high-frequency trading High-frequency trading is a difficult, but profitable, endeavor that can generate stable profits in various market conditions. But solid footing in both the theory and practice of this discipline are essential to success. Whether you're an institutional investor seeking a better understanding of high-frequency operations or an individual investor looking for a new way to trade, this book has what you need to make the most of your time in today's dynamic markets. Building on the success of the original edition, the Second Edition of High-Frequency Trading incorporates the latest research and questions that have come to light since the publication of the first edition. It skillfully covers everything from new portfolio management techniques for high-frequency trading and the latest technological developments enabling HFT to updated risk management strategies and how to safeguard information and order flow in both dark and light markets. Includes numerous quantitative trading strategies and tools for building a high-frequency trading system Address the most essential aspects of high-frequency trading, from formulation of ideas to performance evaluation The book also includes a companion Website where selected sample trading strategies can be downloaded and tested Written by respected industry expert Irene Aldridge While interest in high-frequency trading continues to grow, little has been published to help investors understand and implement this approach—until now. This book has everything you need to gain a firm grip on how high-frequency trading works and what it takes to apply it to your everyday trading endeavors.

DJANGO 3 FOR BEGINNERS Fascinated by the chronicles of modern computer language Python 3.9 and exploring developing web apps using the Python framework Django, the renowned writer, Dr. Andrey Bulezyuk has just launched his second book "Django 3 for Beginners". The first book, named "Algorithmisches Trading: Meta Trader4", is based on the MQL4 language and deals with the automation of stock trading systems. The book was well received among the IT & Investment sector and comprises of vast knowledge on the programming language presented in a simple easy-to-understand way. The Django 3 for Beginners focuses on the De Facto programming language, Python, the Django 3 Framework and ultimately deploying the Django 3 Application to the Cloud. The book defines and explains the programming language in baby steps, so that the beginners can comprehend and use Python as their launchpad. The book further discusses the Django 3 development and teaches the basics of the app development using Django 3. The book has deep insights on the application and use of the Django 3 development kit. It is a complete guide to the lifecycle of Django 3 App deployment in the Cloud. The book will make it simple to understand Python and Django 3 App development, an otherwise complicated and convoluted jargon. The writer Dr. Andrey Bulezyuk believes that web development has reached unimaginable heights in a very short time and it is continuing to do so at an incomprehensible rate. In order to keep up with the web development we need to stay updated and should learn only the most important topics, in order to iterate and launch quickly. The book is a great guide for those who are seeking to make their app based on Django 3 and is a step-by-step guide to deploy your app serverless[ly] in the cloud.

In High Probability Trading Strategies, author and well-known trading educator Robert Miner skillfully outlines every aspect of a practical trading plan—from entry to exit—that he has developed over the course of his distinguished twenty-plus-year career. The result is a complete approach to trading that will allow you to trade confidently in a variety of markets and time frames. Written with the serious trader in mind, this reliable resource details a proven approach to analyzing market behavior, identifying profitable trade setups, and executing and managing trades—from entry to exit.

The first guide to programming in MQL5 is here "Expert Advisor Programming for MetaTrader 5" is a practical guide to creating automated trading strategies in the MQL5 language. Take

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

advantage of MetaTrader 5's new features and take your trading to the next level You'll learn how to program expert advisors quickly and easily using a ready-made framework created by an experienced MQL programmer. This book will teach you the following concepts: Learn the basics of MQL5, including variables and data types, operators, functions, event handlers, and object-oriented programming. Place, modify and close market and pending orders. Calculate, verify and add stop loss and take profit prices to an open position. Add a flexible trailing stop and/or break even stop to your strategy. Manage your trade risk with money management. Use pending orders to scale in and out of positions. Use price, time and indicator data in your expert advisors. Control program execution by trading on new bar open, and add flexible trade timers to your strategies. Walk through the creation of several basic trading strategies from start to finish. Inform the user with dialog boxes, email alerts, mobile notifications and sounds. Draw trend lines, arrows and text labels on the chart. Read and write data to CSV files. Learn the basics of creating indicators, scripts and libraries in MetaEditor. Debug, test and optimize your trading strategy. And much more Whether you're an experienced programmer moving from MQL4, or a novice just starting with MQL5, this book will give you the foundation to quickly program fully-featured and robust trading systems. All programs and source code files featured in the book are available for download at the book's official website at <http://www.expertadvisorbook.com>

Brand new and fully updated for the latest versions of MetaTrader 4, "Expert Advisor Programming for MetaTrader 4" is a practical guide to programming expert advisors in the MQL4 language. Leverage the latest features imported from the MQL5 language, including object-oriented programming, enumerations, structures and more. This book will teach you the following concepts: The basics of the MQL4 language, including variables and data types, operations, conditional and loop operators, functions, classes and objects, event handlers and more. Place, modify and close market and pending orders. Add a stop loss and/or take profit price to an individual order, or to multiple orders. Close orders individually or by order type. Get a total of all currently opened orders. Work with OHLC bar data, and locate basic candlestick patterns. Find the highest high and lowest low of recent bars. Work with MetaTrader's built-in indicators, as well as custom indicators. Add a trailing stop or break even stop feature to an expert advisor. Use money management and lot size verification techniques. Add a flexible trading timer to an expert advisor. Construct several types of trading systems, including trend, counter-trend and breakout systems. Add alerts, emails, sounds and other notifications. Add and manipulate chart objects. Read and write to CSV files. Construct basic indicators, scripts and libraries. Learn how to effectively debug your programs, and use the Strategy Tester to test your strategies. All of the source code in this book is available for download, including an expert advisor framework that allows you to build robust and fully-featured expert advisors with minimal effort. Whether you're a new trader with limited programming experience, or an experienced programmer who has worked in other languages, "Expert Advisor Programming for MetaTrader 4" is the easiest way to get up and running in MQL4.

Trading forex is completely different from trading other markets. With low entry costs, 24-hour accessibility, global players and high degrees of leverage, there are enormous opportunities but also very real potential hazards along the way if you don't know what you're doing. Leverage can work both ways you control large positions, but small moves in your favor can mean big returns on your investment. For these reasons, forex trading deserves its own volume, devoted entirely to SFO (Stocks, Futures, Options) Magazine articles explaining the ins and outs of currency trading. Forex traders don't need to follow hundreds of stocks or commodities to get a flavor for the market just the movements of eight major currencies: the U.S. dollar, Japanese yen, European Union euro, British pound, Canadian dollar, Australian dollar, New Zealand dollar and Swiss franc. Trading a country's currency is like trading the outlook for the country, so it helps to have a bit of fundamental knowledge. But it's also a

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

highly technical form of trading. This book helps you assess how to best synthesize your forex strategies to make the most of market movements. Learn from the top forex trading experts in the world. The key to trading currencies is figuring out what central banks will do before they actually make their moves.

This special combination book, *Expert Advisor Programming and Advanced Forex Strategies*, will provide you with a solid foundation of the techniques required for profiting by combining expert advisor programming with advanced forex strategies. When finished you will have a deep understanding of the forex market from several angles. The emphasis throughout is on practical applications. **Part 1: Expert Advisor Programming for Beginners: Maximum MT4 Forex Profit Strategies** You will discover step by step along with clear visuals on how to profit with MT4 programming. Automated trading is often shrouded in mystery along with many misconceptions about who it can benefit. We peel away the layers of this misunderstood world in the book. **Part 2: Expert Advisor and Forex Trading Strategies: Take Your Expert Advisor and Forex Trading To The Next Level** You will learn advanced trading strategies along with easy to understand visuals on how to increase profits. This is a unique combination of manual and automated trading. Therefore it is for the intermediate to advanced manual trader and those seeking an insight into programmed trading.

I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!

**Profitable Trading with Renko Charts** One of the oldest and most popular Japanese charting methods, Renko can be used to profitably trade all types of financial markets and instruments — and over any time frame. Renko charts offer traders many unique and unmatched advantages over other charting methods:

- Renko charts are simple to use
- Trends are easier to identify in Renko charts since the price is always either clearly bullish or bearish
- Due to their uncluttered appearance, significant tradeable patterns are much easier to spot in Renko charts
- Being objective in nature, entry and exit signals are clearly defined in Renko charts, making it easier to trade profitably
- By eliminating insignificant price action, Renko charts help traders control overtrading — one of the biggest sources of trading losses.

This comprehensive book provides step-by-step guidance, from the basics of Renko charts to advanced methods of analysis and trading, keeping in mind Indian market characteristics:

- What a Renko chart is — and how to plot it
- How to use the traditional tools of technical analysis on Renko charts

## Download Ebook How Hard Is Mql4 Programming A For The Absolute Beginner Jimddandys Mql4 Programming Books Book 1

Thorough description and analysis of major price patterns in Renko, along with examples and trading rules for each • How to use the unique features of Renko charts to identify strong sectors and strong stocks to trade • How to profit from the unique Renko chart indicators • How to effectively use Renko charts across multiple time frames • Tested and effective trading strategies for all kinds of markets, with rule-based entry and exit criteria • PLUS: 250+ charts and examples from Indian markets. With recent advancement in technology making Renko easily accessible on popular charting software, this book will help both experienced and novice traders to profit from this very powerful system.

Finally, the first comprehensive guide to MQL programming is here! Expert Advisor Programming guides you through the process of developing robust automated forex trading systems for the popular MetaTrader 4 platform. In this book, the author draws on several years of experience coding hundreds of expert advisors for retail traders worldwide. You'll learn how to program these common trading tasks, and much more: - Place market, stop and limit orders. - Accurately calculate stop loss and take profit prices. - Calculate lot size based on risk. - Add flexible trailing stops to your orders. - Count, modify and close multiple orders at once. - Verify trading conditions using indicators and price data. - Create flexible and reusable source code functions. - Add advanced features such as timers, email alerts and Martingale lot sizing. - Avoid common trading errors and easily troubleshoot your programs. - Adjustments for fractional pip brokers and FIFO. - Plus, learn how to create your own custom indicators and scripts! Whether you're a beginner or an experienced programmer, Expert Advisor Programming can help you realize your automated trading ideas in the shortest amount of time. This book features dozens of code examples with detailed explanations, fully-functioning example programs, and reusable functions that you can use in your own expert advisors!

The first guide to programming in MQL5 is here! Expert Advisor Programming for MetaTrader 5 is a practical guide to creating automated trading strategies in the MQL5 language. "While institutional traders continue to implement quantitative (or algorithmic) trading, many independent traders have wondered if they can still challenge powerful industry professionals at their own game? The answer is "yes," and in Quantitative Trading, Dr. Ernest Chan, a respected independent trader and consultant, will show you how. Whether you're an independent "retail" trader looking to start your own quantitative trading business or an individual who aspires to work as a quantitative trader at a major financial institution, this practical guide contains the information you need to succeed"--Resource description page.

In 1976 the Big Thompson River flood in Colorado took 150 lives, including those of seven women on staff with Campus Crusade for Christ International. Deeply grieved by the loss, survivor Ney Bailey embraced a journey of faith that led her to a life-changing truth: No matter how things look and no matter how we feel, God is in control. In Faith is Not a Feeling, Ney reveals how life's tragedies and challenges lead each of us to an important decision about how we will relate to God. Building on a foundation of experiences all believers can relate to, this well-loved speaker and teacher shows how you can take advantage of the endless opportunities life provided to deepen your trust in the Lord. Faith is Not a Feeling has taught hundreds of thousands of people how to choose to believe God's promises over their own personal feelings. Now you, too, can discover the secrets that will allow you to face painful experiences with a measure of objectivity, use your feelings to take you to God, and experience true peace in the midst of failure and trials. Best of all, you will learn how to obediently and confidently take God at His word as you never have before.

Institutions move and manipulate the markets. That's why you need to learn to think and trade like an institution.
