Do you want to know how to analyze people and to best interpret what their behaviors mean? If yes, then keep reading... People aren't as mysterious as we tend to think they are. We may wonder at some of the things they do and ask ourselves why we didn't see certain people coming. We may ask how a seemingly decent person can be something entirely different underneath that pleasant, normal veneer. But when we know who we're talking to, we're much better equipped to interpret the behavior of those around us more accurately and to be less surprised when people turn out to be someone else than who they lead us to believe they are. It is important to understand that there is a difference between reading and analyzing someone in your presence and telepathy. Many people confuse the two. Science fiction fans are more than conversant with the concept of telepathy. You are thousands of miles away, yet somehow, just when you are thinking about someone, they call you. This is a different story altogether. Analyzing someone is about being in their presence. You must be aware of their role at the moment and yours to accurately analyze them. How many people can do this? Not so many. If you consider the level of training that the FBI and other specialized security departments go through to enable their operatives to learn how to read their targets and suspects, it is safe to say that not so many people can read and analyze someone instantly. This book is a stepping stone on the path to gaining a better understanding of human nature. I hope you'll build on it, by applying what you learn in your everyday life, using it to more effectively your interactions with others, in order to be more successful in your relationships, your work and your social life. Analyzing people at first glance is natural. We all do it and there is no point in denying it. Through instinct and experience some people are better in this process than others. This is also undeniable. However, science and research has made it possible to learn a few ways to make sure that the analysis we make of the people that we meet for the first time is not based only on instinct and experience but also on undeniable scientific facts. "How to Analyze People" has the purpose of presenting those ways to the general public, to explain them and to point out the necessity of incorporating them into our way of sizing up people and drawing our conclusions about them. Many texts speak only about the ways of observing the eyes. Other texts refer to the body language or "non-verbal communication" as it has become to be known. A few more texts refer to how the pitch and intonation of a voice carries out the messages. These are all gathered up in one text so that the total sum of the observations that need to be made in order to make our analysis as correct as possible

and draw a correct conclusion out of it, is brought to common knowledge in the hopes of avoiding misunderstandings and unnecessary emotional outbreaks that may lead to unfortunate and regrettable actions. Actions that are unbecoming to a modern and peaceful society. Download Your Copy Now! Click the Buy Now button on the top of the page
