**Road to Success** Viswanath Venkatesh,2011 This book provides guidance and tools to help PhD students and junior faculty members successfully navigate and mature through the various stages of an academic career. Senior faculty members can use this book as a source of ideas to advise their PhD students and junior colleagues. This book presents knowledge that is seldom imparted in PhD programs, and organizes the same as advice and tools related to achieving success at research, teaching and service, all while maintaining work-life balance. The advice and tools provided are based on years of experience of the author and guest contributors, who have successfully navigated many of the same challenges and mentored many PhD students and junior faculty members. This book is suitable both for those who seek careers in research universities or universities that promote greater balance across research, teaching and service. Life in academia is like life in no other profession. The intellectual freedom in conducting research coupled with the ability to positively impact the lives of students through teaching makes it exciting and noble. The road to success in making a difference through knowledge creation (research), knowledge dissemination (teaching) and activities related to both (service) is riddled with many challenges. While PhD programs are designed to teach students the nitty gritty details of conducting research, few focus on the broad issues of how to build a successful research program, how to build an effective teaching portfolio and how to do deal with the many other challenges encountered. Navigating the broader challenges of academia is often accomplished by trial-and-error or ad-hoc mentoring one may receive. This book, which provides advice and tools, seeks to help researchers achieve success by navigating through these very challenges. The book comprises 20 chapters that are organized into five major sections: 1.Research 2.Managing the PhD program 3.Life after the PhD 4.Teaching and service 5.Broader advice In addition to the author, both junior and senior scholars have provided contributions to share their own experiences and observations of others who have been successful. The most important component of the book is the various tools (e.g., how-to advice, checklists) that are provided to help junior researchers head up the road to success and to arm senior researchers to guide junior researchers along the way. The various tools target the following six areas: 1.Building and sustaining a research program 2.Writing a paper 3.Responding to reviews 4.Planning and monitoring through various stages of the PhD program 5.Becoming an effective teacher 6.Achieving work-life balance

*The Empowered Professor* Dana Mitra, 2022 How can new faculty find success in academia and what can universities do to support them? In this book, the author demonstrates how a coaching-focused stance toward faculty development can improve equitable conditions within the university and contribute to faculty retention and well-being. For faculty and graduate students, this book emphasizes the skills needed to be a successful academic with a focus on lifespan learning. For universities, this book articulates how institutions can implement an equity-driven plan for faculty development. In the first section, Mitra investigates the structures that can contribute to inequities, spotlighting the unspoken assumptions and lack of clarity of institutional processes. In the second section, she interweaves the building blocks needed for faculty success (agency, belonging, and competence) with the traditional academic expectations of research, teaching, and service. With engaging vignettes and extended examples of faculty experiences, *The Empowered Professor* centers on the space in which

individuals can find success within academic settings while maintaining the integrity of themselves. Book Features: Action steps universities can take to improve faculty recruitment and retention. Workbook-style exercises to help academics connect personal goals and experiences with book content. An equity-driven model of faculty development that connects individual goals with an understanding of academic structures. Research-based evidence on how inequitable structures are perpetuated by university policies, with insights for increasing diversity, equity, and inclusion.

**Sustaining Your Well-Being in Higher Education** Jordan Cummings, 2024-09-02 This book provides an evidence-based approach to sustainable self-care, anchoring these strategies in individual academic workers' core personal values. It teaches readers how to use their values to leverage self-care strategies into a workable, individualized, and effective map to wellness. Working in the demanding environment of higher education can leave little time for self-care, yet making space for wellness and self-care is essential to creating a creative and innovative environment for academic work. This book shows how to create and successfully implement realistic self-care plans. By identifying core values and using these to develop individualized self-care plans, *Sustaining Your Well-Being in Higher Education* pushes back against a one-size-fits-all approach while also discussing the role of self-care in academic labor activism and providing strategies for readers to become advocates for better self-care practices within their zones of influence. Designed to provide academic workers with the skills they need to develop workable and sustainable self-care plans, this book is an invaluable resource for students and professionals working in all areas of higher education.

**How to Write a Lot** Paul J. Silvia, 2007-01 All students and professors need to write, and many struggle to finish their stalled dissertations, journal articles, book chapters, or grant proposals. Writing is hard work and can be difficult to wedge into a frenetic academic schedule. In this practical, light-hearted, and encouraging book, Paul Silvia explains that writing productively does not require innate skills or special traits but specific tactics and actions. Drawing examples from his own field of psychology, he shows readers how to overcome motivational roadblocks and become prolific without sacrificing evenings, weekends, and vacations. After describing strategies for writing productively, the author gives detailed advice from the trenches on how to write, submit, revise, and resubmit articles, how to improve writing quality, and how to write and publish academic work.

**The New Academic** Simon Clews, 2021-08

**Feminist Repetitions in Higher Education** Maddie Breeze, Yvette Taylor, 2020-09-30 To do feminism and to be a feminist in higher education is to repeat oneself: to insist on gender equality as more than institutional incorporation and diversity auditing, to insert oneself into and against neoliberal measures, and to argue for nuanced intersectional feminist analysis and action. This book returns to established feminist strategies for taking up academic space, re-thinking how feminists inhabit the university and pushing back against institutional failures. The authors assert the academic career course as fundamental to understanding how feminist educational journeys, collaborations and cares and ways of knowing stretch across and reconstitute academic hierarchies, collectivising and politicising feminist career successes and failures. By prioritising interruptions, the book navigates through feminist methods of researcher reflexivity, autoethnography and collective biography: in doing so, moving from feminist identity to feminist practice and repeating the potential of queer feminist interruptions to the university and ourselves.
