The U-point technology is delivered by the Google Nik Collection, a professional high-end photo editing "plug-in" suite, used by professional photographers. The Google Nik Collection and

its integration into GIMP will be discussed in its whole. So in addition to gaining great expertise in GIMP, this book will also cover the complete Google Nik Collection. We'll download and install the software, together with a special plugin that will let you work with the Google Nik Collection from out of GIMP. You'll learn everything about all the powerful blending modes, and the practical use of each blending mode will be shown and explained. You'll learn how to select hair, how to use and make patterns and gradients, and how to use and adjust a tablet. You will learn everything about brushes. How to create brushes yourself, the many special effects you can create with brushes (e.g. to create a flock of birds with just a single stroke, or to create grunge textures), and how to download free creative brushes. We will look at a popular skin retouching technique used by professionals called "frequency separation", and different methods for dodging and burning (selectively darkening and lightening of an image). We will discuss color theory, and its direct connection to the ways color is manipulated in photo manipulation programs. We'll discover creative filters that bring a different look and feel to your image. The book is created for the Windows (7,8,10) user. With some extra steps however, the Linux user can also follow along. The book has been printed in black and white to keep the price as low as possible. About the writer: Bernard 't Hooft has over 15 years of experience with professional photo editing, and teaches photo editing at the VolksUniversiteit in the Netherlands.

College soccer star Mark Zupan had been out drinking one night and had passed out in the back of his best friend's

pickup truck when his friend got in the driver's seat, decided to take the truck for a spin, and accidentally crashed it. Thrown into a canal and stuck in frigid water for fourteen hours, Mark was finally rescued and learned soon after that he'd broken his neck. He'd most likely be a quadriplegic and spend the rest of his life in a wheelchair, doctors told him. At first Mark's only goal was to walk again. When that proved impossible, he fell into the depths of anger and despair, retreating from the world and the people closest to him. But love, friendship, and a new sport, quad rugby (a.k.a. "murderball"), helped Mark create a new existence that's truly exceptional. *Gimp*, the no-holds-barred memoir of a Paralympic athlete and the star of the Academy Award-nominated documentary *Murderball*, is an inspiring, defiant, and revealing celebration of spirit and will that confounds readers' prejudices by offering proof that a guy in a chair can still do amazing things: have sex with his girlfriend, party with his friends . . . even crowd-surf at Pearl Jam shows.
